Something To Sacrifice.

Sixty years ago an equestional institution was born to this state, having before it the mission of vending choice morsels of higher education to future intelligentia of the com- anything of remunerative value. in learning, clamor for a chance to know what perity" idea, is coming of that material representation of the idea pioneers had in setting up a big schoolhouse on veritable plains,

In the life of a new western civilization. sixty years is a record span for any instituespecially if those years have been crowded with the elements of growth such as the University of Nebraska enjoys. Six docades are but the average life of a normal individual, yet the normal individual lives much during a lifetime. A person numbering that many annual cycles in the motivation of time has been able to see this state grow from a prairie plains region, which had hardly lent itself to the turn of the plow, to a powerful unit of a greatly disected country.

What can the state point to as to the results Portrait of of sixty years in the support of a university! Numbers, and size—those are the main accomplishments. Numbers in carollment; size in zeulty, buildings and acreage!

Quality ! Well, yes, In degrees, for one can point to hundreds of aspects in which the College graduates will be doing it now. . . .

hearts when the best of the faculty pulls out to right over! take more exalted positions at mercasid pay. But they do not know how else to meet the

he building program must go on. Students flock in by the thousands and they must be given room, it is claimed. More room and greater numbers in students makes it imperafive that the faculty list be increased to certain extents. Yet, with limited appropriations for the building program is curbed; but, sad to studes plied high powered buggies back for relate, the instructional staff suffers also, yet more heavily. Strong men are being lost from the faculty so rapidly that it is fast becoming-

a safe wager to predict the next in line. It is true that students must have room in which to study and attend classes and it is true that other institutions are building and expanding at a rapid pace. Is it advisable, however, for Nebraska to compete with other TO THE EDITOR universities in the construction policies! If the university cannot afford to keep up its building program, then the building program must be sacrificed. Professors can teach their classes under the blue skies, if needs be, or the attendance can be curbed. But never will everlasting good come from a crippled faculty, no matter how excellent the housing equipment

An Improveemnt issue goes to press carrying a story of the resignation of thre prominent faculty men. My, My!

4 Hunting We Will Go.

"Johs! Well, now, young man, I just wish we had something for you to do. But things are kind of slack; the times, you know.

Several hundred students, it is safe to say, have heard that story a dozen or two times as led varsity yelling. Attempts were made to each member of the mottley job-hunting crew devise means and methods that would be new. has seraped his shoes over Lincoln's parched Then, after a certain amount of ferment, one streets. Jobs are hard to get. Students are, of the men who had experience in yell leading in fact, ready to swear that there ain't no such was asked to come over and show the cheer,

with the setting and background of a gorgeous ways worked, worked again. economic depression. There is only one scene, and it is a lengthy, drawn-out affair that to let things go on that way again? seems to know no end. Young Joe College

plays the leading role in his efforts to beguile the fair Annie Employment into a love pact. Everything would be sailing fine if it were not for Old Man Down-in-the-Dumps who strokes the handle bars of his sleek mustache in villainous fashion as he wafts clouds of gloom into an atmosphere of hope and ambition. Joe started out with great prospects, he s thought. For hadn't be nearly entired the fascinating Miss Annie into his stronghold on three distinct occasions? Once he was sure he had succeeded and the curtain was about ready to be dropped so that the scene of depression could be shifted. But Old Man Downin-the Dumps was still to be reckoned with, staging an informal fashion revue. He placed the fog of Disparagement over the on their third floor beginning doorway of young Joe's den just as Annie was about to say "yes.

And so Joe goes on hunting jobs. It used day, to be that depressions were nice times to go to "Go to school when you can't get comployment so that you will be ready for it when times are better." That was the slogan which prompted greater attendance during slack periods known as the depressions of the good old days. It was then that, despite lack of each for university expenses, a student could work his way through on the small and odd jobs be could garner throughout the city. Older and Eleanere Gustin, '29, will generations, at least, point to those eircum-

If that is true, then the good, old days have really gone. This economic eras a seems to have characteristics of its own. Veterans in them to university women along the depressing business avow that there never with correct accessries fitting has been anything like it. Students cannot campus wear and campus funcpick up even the simplest forms of employ. Ition: ment. There are some who have been in town fastions in a collegiate parade. All university women are invited trying to get even the resemblance of work, to the affair, They are not looking for high-toned positions, as many are impressed, but, rather, will accept,

Is it'any wonder that enrollment in the unithe sages would have it, it is well to know the versity drops! Even the sinecre note that one benefits of the fondling child that has been his college lacks the punch it would have had reared. > Glorifying of the American girl and glorifying of the American criminal should give way to glorifying of the American student. A rubber-stringed box car syther to the person who first a ports sight of one.

Wonder how many carloads of dust were this work, something must be sacrificed. Thus, raised above Nebraska highways as ye eager nice months under the shadow of The Sower!

MORNING MAIL

Back to the Old.

Last fall the new system of elicer leading went into effect. Publicity said that there would be no more of this namby-pamby waving of arms out in front of the student body. I challenge any member of the student body to so state if at any time they saw any one of the three cheerleaders do any eart-wheels, backflips, or hand-springs. Nothing against those men, understand, but they were not going to do the same as had been done in previous years, and yet to the best of their ability they did identically the same. Why try to get an aerobat that can sway the multitude! The cheer leading staff is not supposed to be a three ring circus, but it is composed of men with sufficient courage to get out in front and lead the student body with the student body following them, not pulling against them.

Then another thing concerning the doing away with the socalled motions of leading cheers. Last fall a group of prospective yell leaders was picked, none of whom had ever This year's tale is a pitiful story. It begins viously. The good old method which had al-
