

TREND OF THE TIMES

GERALD BARDO

Mahatma Gandhi is not yet thru with Great Britain. He intends to continue his weaponless battle for India's freedom.

Representative Bertrand H. Snell of New York is the man republicans would have for speaker of the house.

Our Nebraska Senator R. B. Howell in the first of a series of articles in the Omaha Bee-News will not have it that the depression is the reason for more taxes.

of European nations to shoulder the \$12,000,000,000 plus of war debts they owed us.

To citizens he says, "These debts are due you, and so important are they to you, to your children and your children's children, that you should ponder each settlement independently."

Vice President Curtis said Monday, "If the next republican national convention nominates me for vice president, in 1932, I shall accept."

Farm board officials have admitted losses of \$225,000,000 of the government's revolving farm relief fund.

By presidential decree the Bruening government in Germany is empowered during the reichstag recess to change present customs schedules and to enter into a system of bilateral treaties with foreign countries concerning tariffs.

agreements to be made with England.

A Miss West was last spring notified by Miami university that she could not return to her classes because she failed in her studies.

Now there is a chance for a fight. N. W. Warren Barbour, once amateur heavyweight boxing champion of the world, former mayor of Rumson, N. J., wealthy thread manufacturer, and a Republican, has been appointed by Governor Larson to succeed the late Dwight W. Morrow as United States senator from New Jersey.

Republicans are happy over Mr. Barbour's appointment. The lineup in the senate now is republicans 48, democrats 47, farmer-labor 1.

On September 30, 1931, women in Spain were enfranchised. Now two have been given places in the Cortes or parliament, and another was appointed by the provisional government as a member of the committee which was to draft the new constitution.

University Women; Victoria Kent, president of the Women's Club of Madrid; and Matilde Huelci.

October class 1 railroad earnings were half those of last year. Approximately the net operating income was \$64,500,000 as compared with last year's, October earnings of \$112,250,999.

The first step toward settlement of the China-Japan conflict is made. The Chinese and Japanese delegations at Paris have accepted the resolution of the League of Nations' council. United States supports it.

Governor Bryan believes that Nebraska can care for the needs of its own people. So he has said he told President Hoover and relief organizations some time ago. Complaints are said to have come to the governor about Red Cross work in drought stricken, north Nebraska.

For the last eleven months the gasoline tax receipts in Nebraska have been \$8,611,261. This

is approximately \$250,000 above those of the corresponding period last year. One-fourth of this goes to county road work.

Here are some of the things which will now come under the new British tariff: Glass bottles and jars not containing merchandise, battery carbons, yarns wholly or partly of wool, household linen, candles, sporting guns and rifles, air guns and rifles, pistols, domestic spoons and forks of metal other than gold or silver.

A ship with five tons of gold bars and forty-five tons of silver aboard was sunk twenty-eight miles off the coast of France in 1920. In August of 1930 the definite location of the treasure was found.

"Will you vote to consider—and will you vote in favor of—a proposal under article V of the constitution of the United States for the repeal of the eighteenth amendment there to, to be submitted to conventions in the several states for ratification or rejection?"

This question is being asked the 531 members of the house and senate by the women's organization for national prohibition reform. Of 251 who have answered, 149 were affirmative, 49 negative, and 53 noncommittal.

NEBRASKA STUDENTS WILL SOON HAVE THE CHANCE TO EXHIBIT AQUATIC ABILITY UPON COMPLETION OF POOL.

(Continued from Page 1.)

The purifying system is not the only features of the new pool cleanliness of the purity and are the top sewer drains with a top deck around the pool which will prevent any water carried out by the swimmers from running back in the concrete and tile basin. It will be drained into the sewers.

Then there are the air sprays. There are two of them. One on the north and one on the south side of the east end of the pool. From time to time the air will be turned on and ripples will be sent from the east to the west end. The ripples, comparable in miniature to the breakers which come in from out-sea, will carry any film or sediment which floats on top and force it into the west end sewer drain.

The university is careful and cautious. It believes in the axiom, "a load of prevention is worth more than a box of cure," so they have installed non-skid tiling. Perhaps to guard against the possible over working of our health department, the university made special mention to Robinson, who is building the colossal water con-

tainer, that he must install this type of tile to prevent slippage as the motorist who puts on chains thinking it might rain. Anyway, a new type of tile, sprinkled with chipped "beef or asphalt" while warm, which makes it impregnable to slippage has been included on both ends of the pool and around the run-way.

Insulation Noteworthy. Other very new features, if not so novel, are the special insulation which has been placed on the ceiling, erection of fifteen tier bleachers at the east end of the natatorium, and three diving boards.

The insulation on the ceiling will prevent the customary deafening echoes which abound in many indoor pools. The ceiling lights will also be strengthened by larger reflectors.

One of the three diving boards will be located in the center of the west end of the pool. It will be ten feet high. On each side there will be one low board.

The pool, which will be completely tiled, will be decorated around the top by alternate green and black blocks each a foot square. Side walls will be yellow

as high as the windows. This will have a black border.

If all these semi-exclusive features do not prove incentive enough for your turn out, an announcement of special inducement is in order. The pool will be one of the best of its kind in this section of the country, and a thousand spectators will be able to observe the Big Six natatorium do battle for championship. The big tank is 15 by 75 feet and 10 feet deep at the west and directly beneath the diving boards.

Subject to much spirited controversy last year, it is thought that the pool will be a haven for Cornhusker students to whom it will be open at all free periods when there are no classes or when the varsity squad is not using it.

CHILDHOOD CLUB MEETS

Education Group Sponsors Dinner Wednesday; 130 Girls Attend.

One hundred and thirty girls attended a dinner party sponsored by the Childhood Education club, Wednesday evening, at Ellen Smith hall. Louise Cogswell, president of the group, presided.

DECEMBER 4TH. \$2.50 THE COUPLE

MUSIC CORPORATION OF AMERICA PRESENTS
