Two Y. W. C. A. Staffs Join in Giving Tea.

Members of the Interracial and International staffs of the Y. W. C. A. gave a tea Thursday afternoon from 4 to 5:30 o'clock at Ellen Smith hall.

The program was planned by Lois Lefferdink, Catherine Williams, Dorothy Cook, Audrey Reed and Alma Williams. Miss Violet Chan and Miss Richardson poured at the tea. Catherine Williams and Margaret Buol were the co-chairman of the party.

Prizes Given at

Beaux Arts Ball The annual Beaux Arts Ball at Morrill hall Thursday evening was a colorful affair with guests appearing in all kinds of varied costumes mostly patterned in a modernistic style. The grand march was participated in by all the costumed attendants.

Two etchings were given as the prizes to Mrs. John J. Grainger Doane, university and to Gilbert librarian, and John Champe, who were judged as wearing the most beautiful and the most amusing costumes, respectively. Mr. Doane and Mr. Champe came dressed as

a pair of cactus plants. Mrs. J. E. Lawrence received the prize for wearing the cleverest costume which was designed by Mary K. Thorpe. Dr. and Mrs. Clayton Andrews were picked as the best costumed couple at the ball. Sally Pickard, last year's honorary colonel, who was present at the affair, was selected as the best looking girl in attendance. The winners of these prizes were

awarded ten dollars each. Entertainment during the evening was provided by a group of dances. Flavia Waters Champe presented a primitive dance. A ballet dance was given by Lois Rathburn, one of Mrs. Champe's pupils, while Mary K. Thorpe portrayed a dance entitled a machine dance.

De Molay Dance

Is Friday Event. The Lincoln chapter of DeMolay will hold a bowery party Friday, Feb. 12, at the Scottist Rite temple. Prizes will be given for the costumes most representative of the bowery theme. Leo Beck and his orchestra will play. The chap-erons will be Dr. and Mrs. Fred-rich Eiche and George Brinton.

Ann Amsden Sets

Date for Marriage. Miss Ann Amsden, a member of Alpha Phi Sorority, has chosen Saturday afternoon, Feb. 20, for her marriage to George Bnejamin Joyce '32 of Alma, Neb., who was affillated with Phi Delta Theta. The ceremony will take place at 4:30 o'clock. Miss Betty Amsden, sister of the bride, will be maid of

And so the Brahma heifer and the Arizona razorback pig do bat-tle for supremacy of the Nebraska agricultural college campus. Now they have been imported and are attracting more attention than any co-ed on the campus. Not even Cleopatra could cause more confusion than Ramona or Pedro. They both are supreme in their elements. But the Brahma heifer is quite wild and likes to dominate beasts about her and so does the razorback pig. He has a long snout for smelling opponents and long legs with which he may spring at them in terror.

Not to be outdone, Ramona has a characteristic hump on her back which can be used handily in battle for blood. Likewise the razorback pig has his long bristles instead of hair and when they stick a person it feels like a porcupine going through a pineapple.

Ramona has the advantage over the pig. She can go days, at a stretch, without water while the pig needs it every few feet when on a merry chase for prey. mona evidently has a stomach like a camel while Pedro has a stomach like a No. 2 tin can.

TOO MUCH SNOW WIL PROTECT HOPPER EGGS

Grasshoppers Are Difficult To Kill; Especially in Mild Winter.

part of the university curriculum two years ago by Dr. William Strong, he said. Doctor Strong, with Waldo Wedel, carried on the If grasshopper eggs are down two inches of more in the soil there work for two seasons, and taking is little danger of their being killed the lead from the work done by A. T. Hill, of Hastings, the Pawnee by direct action of low tures, even when the air temperatures go down to as low as 29 de-The results of that work as well grees below zero and the ground is bare, says Prof. M. H. Swenk of as that of Mr. Hill are incorporated in a paper by Mr. Wedel en-titled "An Introduction to Pawnee the agricultural college. Since low temperatures this winter have been accompanied by snow, the soil tem-Archaeology," to be published by the American Bureau of Ethnology perature where the grasshopper eggs are located is far above any point of danger. The snow has acted as a good blanket for the After all, it's a Townsend pho-

eggs so far. Probably the winter conditions most unfavorable for the survival of grasshopper eggs are when heavy snows thaw and the surface soil becomes thoroly water-soaked, and this is followed by cold weather without snow, so that the bare surface soil is frozen in its water soaked condition and subjected to the influence of low air temperatures for a considerable period. Under these circumstances, surface

soil temperatures go lower and the grasshopper eggs are more susceptible to cold.

The large number of grasshoppers in the state in 1931 following the mild winter of 1930-31 may have led people to expect that the reversal of weather conditions this winter would cause a decrease of grasshoppers in 1932. Unfortunately the scientific data at hand does not justify this conclusion, says Professor Swenk. He gives brief summaries of several experiments run to prove that cold air temperatures will not kill grasshopper eggs safely laid two to four inches in the soil. The complete report is in the hands of county agents of the state and extra copies are available at the agricultural col-

We Welcome You!

## Pedro and Ramona, Ag College Freaks, ORFIELD SPEAKS ON CHURCHES AND CRIME

Radio Talk Surveys Social Problem and Asks for Church Help.

AUTHORITIES ARE CITED

Lester B. Orfield, law college faculty, expressed his views upon the subject of "The Church and Crime" in a radio lecture from the

university studio recently.
"Is it too much to ask that the church do more than it has in the past to solve the problem of crime?" is the query of Mr. Orfield. The Nebraska professor stated

that he was in sympathy with the church and with the functions it performed in society but at the same time he should like to claim for education as well as for the church a pre-eminent place in re-ligious and moral leadership.

"The part played by the church is a social problem . . . the most that can be expected in dealing with social situations is that given certain types of phenomena, a par-ticular result will appear." he said. The problem of investigating the

social situation was declared difficuit by Mr. Orfield, due to the lack of statistics and appropriate data. The Hoover crime commission on criminal statistics found that data was nonexistent or inadequate. Quotes Parmalee.

In speaking of this lack of material Mr. Orfield deplored its absence. "Bearing in mind that we cannot go beyond personal hunches in our conclusions as to the relation between the church and crime and also that all careful studies show that there are no unit causes of crime, let us look at the authorities on the matter. Maurice Parmalee, sociologist and author in his book 'Criminology' says:
"It is not surprising that there

is a lower percentage of crimin-among those who are accounted irreligious, for this group includes a larger percentage than the religious group—this fact im-plies a high standard of intelligence and education, which is not usually correlated with criminality. This is not because intelligence and education are in themselves preventatives of crime, but because they are likely to place an individual in a position in society where the temptations are at a minimum. "For similar reasons it is not

surprising that the religions whose followers are ignorant and poor display a higher percentage of criminality. Religions differ among themselves and therefore their in-

fluence upon social phenomena is different."

Crime Causes Listed.

C. D. Dunn presented some en-lightening statistics on the subject: "Only one prisoner out of eight are active church members, while according to his figures one out of every three and a half persons were active church members, thus the active church group has less than one half of its apportionate quota. The chief function of the church in regards to crime should be prevention. Five factors for the causation of crime are: physiological, mental, social, economic, and political. None of these factors can be said to be the fault of the criminal himself, it is the business of the church to remove them.

Orfield summerized his speech, "But while the work of the church must be largely preventive it must also take remedial measures. The criminal in prison, on probation, on parole and the discharged criminal all stand in the direct need of a helping hand.

"The church is playing a part in bringing about world peace. It is playing a part in the improvement in the status of labor. It is playing a part in the improvement of the status of women and children. Is it too much to ask that it do more than it has in the past to solve the problem of crimes?'

What's in a Name? Champion Wrestler Has Title of Lillie

What's in a name? Coach Hugo Otopalik of Iowa State university at Ames is a skeptic. The answer to his dreams, as a wrestling coach, is a 115 pounder, a former state champion. His name is Lillie. A record of five falls in five contests, averaging 3 minutes and 50 seconds per fall, is the history of the Lillie of the Valley conference. A tiger Lillie maybe?
