TRI-DELTS LAST VICTORS

Plans for the annual Intersorority sing which precedes the masquing of the Motar Boards and tapping of the Innocents on Ivy day, are being made by the A. W. S. board which sponsors the contest. An effort will be made this year to have a 100 percent entry of all sororities, according to Bereniece Hoffman, president of the A. W. S. board.

Letters will be issued to each sorority Monday requesting that all those groups wishing to enter the contest file their intention before Friday, April 8, at 12 o'clock. Each group will be limited to

two songs this year, and may dress in any costumes they choose. A majority of the group should be represented in the singing rather than an octet or quartet. Alumnae are allowed to help in the preparation of the songs, but they may not take an active part in the singing on Ivy day.

cup is permanently given to a group which wins it for three consecutive years.

Delta Delta Delta is in posses-sion of the cup this year having won first place in the contest last year. Kappa Alpha Theta took second place, and Alpha Delta Theta, third, last year.

Bereniece Hoffman, president of the board will award the cup immediately after the sing on Ivy day. Judges for the event will be announced at a later date.

structor in the art department of the University of Wisconsin. Examples of his work in ceramics, and some of his paintings have been shown in several western exhibitions.

Much of the data concerning early civilizations has been desolely from ceramics of these periods, according to Dr. Williams. He says: "Many people do not realize how much of the

history of the world has been reconstructed for us by archeologists and anthropologists who, in some cases, have had little more than odd bits of pottery here and there from which to learn about the people who made them. In our own

university, the department of anthropology is conducting investigations to find out about the primitive tribes who lived in Nebraska centuries ago. The remains of the pottery which they made, help greatly to throw light on the kind of culture they had."

Dr. Earl H. Bell, of the depart-ment of anthropolgy of the uni-(Continued on Page 4.)

FACTORS TO BE CONSIDERED IN SELECTING A VOCATION First Prize Essay in the Chancellor's Contest

"You couldn't get me to enter that vocation. Don't you know there is no money in it?" Such statements have reached their present popularity within the

past few decades. Formerly a person selected a vocation because the work held some attraction for him or, more likely, because it had been the occupation of his ancestors. The advance of industrialism

effected several changes. A larger number of fields were open to a statements made in reply to the person selecting a vocation. More committee's invitations to send in-terviewers," stated Professor Bulimportant, factory made goods ap-Custom "Many firms refer to the peared on the market. soon labeled some of these as necessities. They became essential for the happiness of a person but could not be obtained without money. So the money a person might earn came to be the primary measure of his happiness and the major factor to be considered in

the selection of a vocation. It is unfortunate that money and happiness have come to be syn-

onymous in this respect. Their interchangeability has placed the primary emphasis upon the wages paid in a vocation. People have come to select a particular vocation as their occupation almost solely because it has the reputation to them of paying high wages. And come from many of the nation's if anyone ventures to suggest such a basis of selection is wrong, he is met with the rejoinder, 'Money talks.

Select Best Paid Work.

ing the depression. "What kind of man do the ma-jority of companies want," the chairman was asked, "the high scholarship type or the fair schol-arship man with a personality?" Such a philosophy apparently makes the selection of a vocation easy. One need only cast about until he discovers the field in which the largest wages are paid and in

If not, he may turn to the next best vocation without seriously damaging his happiness. To the thoughtful person, however, the selection of a life work is not such a simple procedure. He

knows it is one requiring the proper balancing and co-ordination of a number of factors before the correct vocation may be deter-minded. He has as his ideal vocation that one in which he can accomplish the greatest permanent good for the largest number of people. Such a criterion realizes that the zenith of life's happiness is not to be attained solely thru material possession but only by the full development of one's aptitudes thru the rendition of sub-stantial services to others. It is interesting to follow the development of such reasoning as applied to the selection of a vocation.

The first step would be the se-lection of a field in which the person has some special ability. Such a selection is essential if he is to find any pleasure in the work. It cannot reasonably be expected that the momentary pleasure of a week-ly pay check can offset the distasteful features of a daily task in which the person has no interest. It is well established that a person cannot long find a work in-teresting if he has no capacity for

that work. So it is that inherent ability must be taken as a primary guide, even if only to insure hap-piness of the individual while at work.

Right Selection Essential, which he has some degree of abil-ity. That done his problem is ing with one's abilities is, however,

Mortar Boards Request That Poems Be Submitted Before April 23.

IDENTITY KEPT SECRET

Poems for the Ivy Day poetry contest sponsored annually by Mortar Board, senior women's honorary organization, should be submitted to the judges before April 23. The identity of the Ivy day poet will be concealed until According to present plans of the April number of the Awgwan the winner reads the poem on the manning of law day May 5.

morning of Ivy day, May 5. Every student in the university is eligible to submit a poem in the contest. No requirement as to the length or subject is set, but it is understood that the poem which is finally chosen will have a theme suitable for Ivy day. The Ivy day idea is sought since the poem ap-pears on the Ivy day program and is read to the assembled crowd before the crowning of the May

Queen. Waitie Thurlow of Auburn, Chi Omega, was Ivy day poet last year and read her poem at the tradi-tional ceremonies. Evelyn West is in charge of the contest this year.

Dr. L. B. Walker, department of botany, has been asked to make exhibits on her research in Endogone and Ascoidea for the Inter-national Congress of Genetica which convenes in August at Cornell university.

Moving Pictures Are of Utmost Value In Education Claims Miss Shanafelt

Childrey Are Particularly tion includes minute details that Influenced by Films

Says Expert.

"Educational movies are of the utmost value to the American people," said Miss Marjorie Shanafelt, curator of visual education, in a recent interview. Today, moving pictures are constantly being "put on the spot" and punctured by siz-zling criticism, but the educational importance and discrete and a size of the spot and th importance cannot be disregarded or neglected.

"As far as the amusement picture is concerned I have no statement to make, but educational pictures used for instructional purposes are excellent. Looking at them, in this aspect, especially in

the instruction of children, they are of genuine importance," she declared "Talking sequences to pictures are not essentials to the under-standing of a child," she contin-ued. "The picture alone is enough

to convey an idea to the mind. Children comprehend pictures more rapidly than reading material, for a picture registers a thought the moment it is flashed on the screen.

and the second

said If the old adage "seeing is be-

lieving" has any virtue, education-al movies are very influential. An old Chinese proverb entertains the idea that one still picture equals

children but they are instructive in study for adults. Distant places of interest that an individual would not otherwise see are presented to him through this medium, in addition to clarifying indefinite ob jects

Movies have aided in the progress of education, according to Miss Shanafelt, and are not lacking in our institutions of learning She believes that movies should play a more important part in every phase of study but should not be depended upon or used en-tirely. "This means should supple-ment the regular reading work." ""Depits the constant criticism

"Despite the constant criticism and numerous indictments, the moving picture industry has its attributes and these should be considered in its importance to the

happiness will be found only in such a vocation. A happy person is not only a valuable asset to society but he also tends to be a very efficient one. These conditions make it imperative that the vocation selected be within the range of one's abilities if he is to make his maximum contribution to society.

Complications usually arise when it is discovered that a person is naturally fitted for several vocations. It then becomes necessary to decide which of these vocations affords the greatest opportunity for the rendition of real and permanent service to mankind. Such a decision is not readily made and will, of course, yeary with the opinion of the individual. The difficulty of deciding correctly becomes more apparent when it is remembered that those fields dealing with amusements and luxuries are not

excluded. It is often possible to make a real and permanent contribution to

society thru work in one of these callings. A certain amount of reccreation and luxury have become necessary for the most effective functioning of human beings. So it is that work in this field, while apparently concerned with transient things, may be of great assis-tance in enabling others to render services that are directly valuable.

Should Consider Service.

The problem is perhaps some-what simplified if an attempt is made to choose the vocation in which service may be rendered to greatest number of people. addition to the vocational (Continued on Page 4.) It has been my experience to find that a child scrutinizes a picture more closely and often his inspec- American people. This
