

### NEBRASKA MARKSMEN TAKE CHAMPIONSHIP

#### Missouri Valley Telegraph Meet Won Third Time In Succession.

William W. McAllister, Nebraska marksman, was the high individual in the annual Missouri Valley telegraphic meet, which the Nebraska team won this year for the third time.

Bob Jewett, also of Nebraska, had the second high individual score for the entire meet and was first in individual kneeling.

Other members of the Nebraska team were H. W. Mison, J. F. Deklotz, Don Pirie, Richard Nicholson, Leon Koenig, Clarence Himes, M. F. Anderson and J. B. Douglas. Capt. H. Y. Lyon was coach of the team and the rifle range was in charge of Sergt. C. F. McGimsey.

The team standings in the meet were Nebraska, first; Missouri, second; Kansas Aggies, third; Washington university, St. Louis, fourth; and Kansas university, fifth.

Beginning Feb. 7, the score of each team for one firing a week was sent to the headquarters of the meet. This was continued for five weeks the total score calculated at the end of the period, and the winning teams and individuals determined.

Richard Nicholson, Valentine, was chosen captain of the team for next year. He is a sophomore in the Engineering college. Howard Mixson, Omaha, a junior in the Arts and Science college, was named manager.

### YOUTH BANQUET PLANNED

#### Allied Forces of Prohibition To Sponsor Meeting of Students Here.

A youth banquet and mass meeting will be given for students at the St. Paul Methodist church during the series of prohibition meetings which will be sponsored in Lincoln April 30 and May 1 by the Allied Forces of Prohibition.

Rev. W. C. Fawell, Methodist student pastor will direct the program for the affair.

Led by Dr. Daniel A. Poling of New York, the Allied Forces have carried on a speaking campaign in behalf of prohibition in 500 cities in every state in the union. Raymond Robbins will speak in Lincoln at the youth banquet.

The speakers are attempting to create a more favorable impression toward prohibition, and are enrolling the names of persons in support of the Eighteenth amendment.

### LANDSCAPING PLANS BEING CARRIED OUT

(Continued from Page 1.) sibly a little shrubbery at the ends. The section in the center occupied by the walk, running north and south, will contain no trees or shrubbery in order to leave an unobstructed view of the Coliseum from the south.

"It is possible," said Mr. Dunman, "that diagonal walks may have to be installed in order to prevent students from cutting across, and if so a little shrubbery of some sort might be put along them."

"The northeast and northwest corners of Social Science hall seem to be very bare and windy and some shrubbery may be planted around these corners, and on the west side of the Teacher's college building privet hedges in panel effect may eventually be put in."

Cleanup in Progress. As to the general campus development not much is being done besides the new mall. About ten men are working on the downtown campus and eight at the Ag campus. Lawns are being raked, rubbish cleaned up and hauled away and a general cleaning up is being made.

Several varieties of trees are being planted on both campuses, among them being: Schwedder

### Bizad Baseball Men Meet Today at 3:30

Bizad college baseball men are asked to report this afternoon at 3:30 at the North 10th street diamond for a workout. The drills will continue throughout the week at the same hour.

MINOT DAVISON, Manager.

### Two Nebraska Marksmen

Shown above are William W. McAllister, left and Bob Jewett, right, who placed first and second in the individual rankings in the recent Missouri Valley telegraphic rifle meet. The Nebraska rifle team won the conference meet again this year for the third time. Other members of the Nebraska team were Joe Deklotz, Don Pirie, Richard Nicholson, Leon Koenig, Clarence Himes, M. F. Anderson and J. E. Douglas. Capt. H. Y. Lyon is team coach.

### Weather Man Calls April the Lion For Winds, March Desolate Month

"March is reputed as being more windy than April," declared T. A. Blair, professor of meteorology, Monday afternoon, "but the real facts of the case are that April is more a lion for winds, than the desolate March."

"There is an average higher velocity of winds in April than in March," continued Mr. Blair, "for April has an average velocity of 12.6 miles per hour, and March scores only 12.5 per hour. However, the last two days have been very windy, with an extreme velocity of 31 miles per hour on April 3, and an average for the 24 hours of 18 miles per hour."

Mr. Blair states that the winds can be predicted, but the general public never pays much attention to them unless the weather bureau predicts a severe storm of some kind. The weather bureau receives the reports from all the local stations and compiles the reports, makes the maps, and posts them in the kiosks where the public can receive the latest information. By determining the direction of the wind and its history of the preceding days, a forecast can be made of coming rain conditions, which is valuable to the agriculturalist.

Winds Bring Rain. "Southwest winds usually bring rain, although this is not a sure

maple, Norway maple, cut leaf weeping birch, and two varieties of flowering crab apples which will give much bloom to the campus. Mr. Dunman claims.

As a part of the national commemoration of the Washington bicentennial a few trees were planted on both campuses by the Lincoln Garden club, assisted by Chancellor Burnett, and Dr. Pool, chairman of the department of botany, the planting taking place on Good Friday. The trees were pin oaks, sycamores, lindens, and Chinese elms.

Two small rock gardens are to be constructed on the Ag college campus, one of them west of the Plant Industry building. The work will be done at odd times from rock saved from rock houses which have been torn down.

Courts to Be Fenced. Work of installing a new fence around the tennis courts has been held up pending the receiving of another estimate, but will be done as soon as possible. The present fence has been in place about ten years and is practically worthless. The new fence will be more durable and is expected to last about twenty-five years. In case the courts are moved, it can be moved with them. A fence will also be installed around the volley ball courts on the west side of the Coliseum.

"The street in front of Chemistry hall will probably be resurfaced with oiled gravel next summer," according to Mr. Dunman. "We are waiting for a decision as to the best material to use for Professor Duff of the College of

thing," said Mr. Blair. "Rain depends on the history of the winds, and their direction."

Replying to the question of the starting point of winds, Mr. Blair gave a brief summary of the birth of winds, and their directions:

"In the equatorial regions, the air, when it becomes heated, expands and rises. This leaves a blank space which is soon filled with the heavier, cooler air from the two poles. This constant blowing in of the winds, the air rising, and being blown to the poles, produces a cycle of air currents, or winds, as we call them. As they go northward toward the United States, due to effects of the land and water surfaces, and due also to the rotation of the earth, their paths are deflected, and they become southeast, southwest, north-west, etc."

"The winds are also often accompanied by eddies, as they are called, which are storm centers, sometimes covering many states. The winds tend to circle around these eddies, and if they are warm, moist air currents from the Gulf of Mexico, they cause the air to be pushed down, which cools them, and rains result. This is true of the opposite 'high pressure' regions, where the winds are going away from the eddies and cause snow."

Engineering. Eventually this street is to be closed and we do not feel as though we could pave it only to have it torn up when the street is closed. As long as the university does not own the land north the street must be kept open."

A new blueprint showing landscaping on the campuses is being made under the direction of Mr. Dunman and when finished it will be possible to tell just exactly where every tree and shrub is located, a thing which has been impossible before.

### NEW BOOK SUPPLY COMES TO LIBRARY

#### Last Shipment of Fiscal Year Covers Many Subjects.

Twenty-seven new books have been received by the library this week, according to Mrs. Consuelo S. Graham, head of the circulation department. These are the last books that will be received this fiscal year.

Varied fields are included. History, travel, social science, political science, economics, literature, education and religion are all represented.

The new books are:

History. Shupp, P. F.—The European Powers and the Near Eastern Question 1806-07. Halberstam, C. W.—The Story of the Crusades. The Civilization of the East 1931. Blakely, G. H.—Japan and Japanese-American Relations 1925. Morrison, S. E.—Builders of the Bay Colony 1930.

Travel. Reiser, G. J.—The English: Are They Human? 1931.

Social Science. Harl, Horatio—The Technique of Social Progress 1931. Barrows, E. C.—Neighbors All: A Settlement Notebook 1929. Huston, Wendell—Social Welfare Law of the Forty-Eight States 1930. Carr-Saunders, A. M.—A Survey of the Social Structure of England and Wales 1927.

International Survey Committee—International Survey of the Young Men's and Young Women's Christian Associations 1932.

Political Science. Rappard, W. E.—The Geneva Experiment 1931. Feunre, Victor—Scientific Disarmament 1931.

Economics. Willoughby, W. F.—Financial Condition and Operations of the National Government 1921-1930. Wilbur, R. L. and DuFoy, W. A.—Conservation in the Ford Motor of the In-terwar 1930. Newwood, E. P.—Ford Men and Methods 1931.

Literature. Crane, Hart—The Bridge 1930. Galworthy, John—The Creation of Character in Literature 1931. Hayes, Helen—The Buddhist Pilgrim's Progress 1930. Bhagavadgita, Malabarhata—The Song of the Lord 1930.

Education. Byrns, Lee—Check List Materials for Public School Building Specifications 1931. Hahn, Julia—A Critical Evaluation of a Supervisory Program in Kindergarten-Primary Grades 1931.

Magge, H. J.—Unit Costs of Salaries in Teachers' Colleges and Normal Schools 1931.

Religion. Evans, Joan—Monastic Life at Cluny (910-1157) 1931. Gwynn, John—Remnants of the Later Syriac Versions of the Bible 1909.

For the first time in history Dartmouth students turned out in a body to welcome the homecoming of an individual instead of a team. Jack Shea, winner of the 500 and 1500 meter Olympic speed skating titles was the recipient of the unusual honor. Although it was too cold for the band to play over 500 students turned out to honor the speed skating star.

### BIG SIX ATHLETES MAY QUALIFY FOR OLYMPICS

#### Track Meet Here at Lincoln May 20 and 21 May Be Used as Tryout.

Big Six outdoor meet billed for May 20 and 21 at Memorial stadium may be designated as an Olympic preliminary tryout, if permission dispatched Monday by Herb Gish, director of athletics to Olympic authorities is granted.

Olympic officials have announced a new plan which makes it possible for a candidate to qualify for the semi-finals of the Olympic tryouts in any authorized meet. Winners of the first three places in any Big Six event, if this innovation is made will automatically qualify for the semi-finals to be held July 8 and 9 at Chicago and Long Beach, provided the marks measure up to certain specified standards.

Sanction for a similar request is expected to be made by officials of the Nebraska College Athletic conference meet scheduled for the stadium May 19 and 20. There is also a possibility that the Nebraska Intercollegiate Athletic association, which includes the four normal schools and the University of Omaha may decide to change their plans and stage a meet at Memorial stadium, in order to give their athletes a chance to qualify for the Olympic trials.

### MUSIC SCHOOL WILL ENTERTAIN TUESDAY

(Continued from Page 1.)

work that is being done in the various departments of the School of Music, the director believes.

The symphony orchestra under the direction of Professor Steckelberg will repeat its presentation of the New World Symphony by Dvorak, having very successfully presented the score at the Joslyn Memorial in Omaha March 27. Mr. Joseph Littau, director of the Omaha symphony orchestra, stated following the March 27 concert of Professor Steckelberg's musicians: "The group played remarkably well, their work being very creditable." The largo scherzo, molto vivace, finale, allegro con fuoco movements of Dvorak's composition appear on the program.

Union Program Announced.

"I would at this time, desire to announce the May 19 program of the university choral union to be held in Grant Memorial in the evening, stated Director Kirkpatrick. "Excerpts from the opera 'Faust,' and a group of miscellaneous numbers will compose the evening's concert. Perhaps the university symphony orchestra will also appear, making the evening's music of the ensemble order."

Tuesday evening's program:

Each, Now Let Every Tongue Adore Thee; Palestine, Adoramus Te; Fanning Song of the Vikings; glee club, Harold Hollingsworth, director.

Each, Chromatic Fantasia and Fugue; Auldre Pierce, (Mr. Harrison).

Bisset, Aria, Je dis que ne m'espou-vante, from "Carmen," Elizabeth Ann Rogers, soprano.

De Berlioz, Adagio, from Ninth Concerto; Bernice Runding, (Mr. Steckelberg).

Each, My Heart Ever Faithful; Schubert, Du bist wie eine Blume; Betty Benedict, (Miss Wagner).

Ravel, Pavane; Brahms, Rhapsody in G Minor; Ruth Hird, (Mr. Schmidt).

Vendi, Quartet, from Rigoletto; Roife, From the Valeria and Hilda, from "Roberta"; Margaret Mackenzie, soprano; William Jackson, mezzo soprano; William Stevenson, tenor; Sylvia Peppie, bass.

Each, Prelude, Sonata No. 6; Wieniawski, Capriccio Valse; Naomi Randall, (Mr. Steckelberg).

Schubert, My Abode; Mouszorsky, Hopalong Cassidy; Schubert, My Heart Ever Faithful; Dvorak, Symphony in E Minor, No. 5; largo scherzo, molto vivace, finale, allegro con fuoco, symphony orchestra, Mr. Steckelberg, director.

A senior girl is "definitely afraid of remaining single. She wears woolen underwear, it's fashionable. She has given up wearing Saturday night's orchids Monday morning. She can crack her gum. She no longer says 'lousy.' That's how the Bulletin of Barnard college defines a senior woman.

### Extension Division Offers Courses In High Schools; Tests Show Results

The first test has been made by the university extension division in its supervised correspondence study for high schools with the examination of typing students at Chester high school, according to Earl T. Platt, assistant director in charge of this branch.

The examination revealed the medium for the eighteen students studying typing was twenty-five and a half words per minute. The published form for this test at the end of five months work in seventeen and three-fifths words per minute, according to Mrs. Mary Niles, division agent who conducted the examination.

Of the eighteen students tested, only six had completed the entire course to date. The highest rate of speed discovered was forty-five words per minute. The Blackstone stenographic proficiency test, form B, was employed. Students wrote for three minutes only.

Since the University of Nebraska received last fall the Carnegie \$5,000 grant to carry on this work, more than forty high schools have registered for courses. The courses offered are designed to enrich the curricula of smaller high schools that otherwise could not afford the courses. The extension division recommends that all correspondence study be taken under the supervision of the local schools.

The study at Chester high school is under the co-supervision of Supt. Dean Mooney and Miss Clara McKinney, a member of the high school faculty. Mr. Mooney is preparing a master's thesis on this subject, Mr. Platt explained.

Platt pointed out that the enrichment of the curricula in Nebraska small high schools by the use of supervised correspondence study gives promise of meeting the following definite needs of these schools.

1. Provision may be made for the problem and gifted pupils.

2. Provision may be made for the irregular student.

3. Irregular courses may be

### Vogeler Asks Diamond Managers to Report

College baseball managers will draw up a schedule of games for inter-college hard ball competition Tuesday at 4 o'clock, Rudy Vogeler, director of intramural athletics, announced Monday. The group will meet in the N Club room at the coliseum.

### PAINTING LOANED SCHOOL

#### National Academy of Design Has Picture Displayed in Morrill Hall.

"The Fall Season," a painting by Bruce Crane, is now on display in the third-floor corridor of Morrill hall. The painting has been loaned to the school of fine arts by the National Academy of Design. A fund known as the Ranger's fund makes these displays possible. According to the policy, the paintings are loaned to various institutions for a certain period of time. If the Academy does not reclaim the paintings within the given time, they become the property of the institutions possessing them.

### PAIRINGS DRAWN FOR INTRAMURAL DEBATE PROGRAM

(Continued from Page 1.)

I think that it is good training, mightily good training," Vogeler stated.

The following pairings were made for the first round of the elimination tournament: Phi Alpha Delta will take the affirmative against the winner of the Kappa Sigma-Delta Sigma Lambda match; Phi Sigma Kappa will take the affirmative against Sigma Phi Epsilon; Alpha Sigma Phi will take the negative against Zeta Beta Tau; Phi Delta Theta will take the affirmative against McLean hall; Alpha Theta Chi will take the negative against Alpha Tau Omega; Phi Kappa Psi will take the affirmative against Delta Upsilon; Delta Theta Phi will take the negative against Tau Kappa Epsilon; Beta Theta Pi will take the affirmative against Sigma Phi Sigma. A complete list of the pairings appears in Tuesday's Daily Nebraskan.

Perfumed anesthetics which give the patients subconscious sensations of fragrance will be the next discoveries in the surgical and medical world, predicts the head of the organic chemistry department at Columbia. Imagine floating in an atmosphere of black narcissus while tonsils go!

### Prof. Orfield Publishes Article in Law Bulletin

An article, "Should Nebraska Adopt the Model Code of Criminal Procedure?" by Prof. Lester B. Orfield, College of Law, appears in the Nebraska Law Bulletin. It was cited in an opinion of the Nebraska Supreme Court handed down Feb. 25, Kirchman v. States, 241 Northwestern Reporter 100.

Three potential presidential nominees hold degrees from Johns Hopkins university. Governor Ritchie and Newton D. Baker received their A. B. degrees in 1892 and 1896 respectively. President Hoover was the recipient of the honorary L. L. D. in 1920.

### Box Butte Experiment Station Near Alliance Devoted to Crop Surveys

Concerning itself with tests affecting the crops of the western part of Nebraska, especially potatoes, the Box Butte experiment farm of the University of Nebraska located near Alliance is the newest member of the substation system.

The Box Butte experiment farm, provided at a recent session of the state legislature, was established in Box Butte county through its board of county commissioners. The farm contains 160 acres of land and four buildings owned by the county and leased to the agricultural experiment station of the university for a definite period of years.

There are three main reasons why this station was created, according to Supt. John Pospisil. The first reason, he declares, is the value of potatoes in crop rotation. Then there is the problem of studying the diseases in the potatoes and in the soils that are found in western Nebraska. And third, he points out, the new farm is ex-

pected to continue the work in small grain studies.

One of the principal lines of work is an extensive crop rotation experiment, planned for the purpose of determining the rotation best suited to the production of maximum crops of clean potatoes. Rotations of various lengths are included, with potatoes following all of the various crops produced in the region.

One important problem is whether the virus that causes diseases in potatoes is native in this region and if not when it will leave.

He points out that since the farm has been in operation only two years no definite results can yet be pointed out, due to the shortness of the period the experiments have run.

Apart from the land and buildings, the improvements and equipment supplied by the state university are worth \$5,573.64.

### VOLLEY BALL SWINGS INTO SECOND ROUND

#### Sixteen Teams Will Meet in Four Leagues Tuesday Afternoon.

Intramural volley ball tournament swings into the second round Tuesday afternoon when sixteen teams meet in four leagues in another step toward supremacy in each group.

Alpha Gamma Rho is favored to take Tau Kappa Epsilon because of the former team's showing last week against Delta Tau Delta. Beta Theta Pi will probably find a tatar in Delta Sigma Phi, while the Farm House-Phi Kappa match is in the same category.

Today's schedule:

FOUR O'CLOCK. Sigma Phi Sigma vs. Alpha Tau Omega on Court 1. Phi Sigma Kappa vs. McLean Hall on Court 2.

FIVE O'CLOCK. Beta Theta Pi vs. Delta Sigma Phi on Court 1. Phi Kappa Psi vs. Lambda Chi Alpha on Court 2.

Delta Sigma Lambda vs. Sigma Phi Epsilon on Court 3. Alpha Gamma Rho vs. Tau Kappa Epsilon on Court 4.

### Miss Mabel Lee Writes For Phys Ed Magazine

The March issue of the Research Quarterly of the American Physical Education association contains an article entitled "A Survey of Athletic and Gymnastic Costumes Used by American Girls and Women" written by Miss Mabel Lee, chairman of the department of physical education for women.

### Boys Wanted at 1535 R. Board and Room \$22 per month or Meals \$4.50 per week.
