The present form of the bulletin was developed from a chart which was used in the instruction of advanced students, Captain Spoerry explained. Requests of students and their enthusiasm for the value of the compiled material led to second semesters of this year as mimeographed copies having made.

Since mimeographing of the survey, copies have been given to advanced military science students and some have been mailed to other schools in the country. Rotarians to whom Captain Spoerry lectured Tuesday also received copies of the bulletin.

the library's relationship to intellectual life and its part in the educational system, ideal purposes of of a library were cataloged.
"Inspiration to Students."

A library which is functioning to the fullest extent," said Mr. Doane, "not only supplies books assigned students for required reading and class reference, but also serves as an inspiration to students to the pursuit of intellectual ideals. A library should inspire greater use of books and teach their place in the life of a well-rounded and cultured member of society.

In order to accomplish its purposes, it was pointed out, the li-brary must have an adequate staff of well-trained and carefully picked people who are capable of giving students books asked for and can also advise them in further use of books.

TWO PRIZE TRIPS OFFERED from work in this department.

Yellowstone Park Tour Is Award of Nebraska Game Commission.

Two prize trips to Yellowstone park have been offered by the game, forestration and parks commission of Nebraska to county extension agents with the best forestry and tree planting programs in their counties this year, the commission announced Wed-The awards provide for a maxi-

mum of \$250 of expense money for first and second place county programs. The county agents receiv-ing the trips will be required to take pictures and obtain other information which the rest of the county agents of the state can use encouraging future forestry and tree planting work, Arrangements will be made for trained men in the park to spend some time with the agents while they are taking the pictures and making their study.

FAIR RALLY SET TONIGHT LOAN APPLICATIONS Ag Students Will Hear Two

Professors and Make Further Plans. A Farmer's Fair rally will be held Thursday at 7:15 in the stu-

dent activities building on the Ag campus to boost interest in the coming annual Ag college event.

Principle speakers will be Prof. H. D. Douthit, instructor of ag short courses, and Prof. C. W. Smith, instructor in agricultural engineering. Further plans for the fair will be discussed and stickers, posters and tire covers advertising the event will be given out for students to take home over vacation.

ENGINEERS DO LITTLE EXTRA SERVICE WORK

Considerable Machine Shop Work Done on School Equipment.

The engineering department of the university does not, as many other universities, make a practice of performing service work, according to Dean O. J. Ferguson. Very little if any is performed and this is mostly on university equip-ment, he said Wednesday.

Considerable machine shop work is necessary in maintaining university machines and the university has a shop for this purpose. However, the mechanical engineering department tools and equipment are much finer and more precise than the ordinary, and much technical work is performed upon them.

The highway testing of the de-partment does considerable work in co-operation with the state department of public works, All expenses are paid by the state, including personnel, reports, inspection, overhead and maintenance. Jobs for three full time men, others part time, and a considerable student employment, result from this. A large number of students make their way through school,

The mechanical engineering laboratory make a small number of lathes each semester. This work is done by students who are studying production methods, and sales of such apparatus. The lathes are sold by special arrangement with purchasers. The foundry department makes castings and various parts for machines.

Announcement, Bargain Special on Rent-A-Cars. Flat rate \$1.95. Good only on Monday, Tuesday Wednesday and Thursday of each week. Includes time to 1:00 a. m. and ten miles of driving and insurance fee. Always open. Motor Out Company, 1120 P St. B6819.

MUST BE APPROVED

Crop Production Loan Group To Investigate All Applications.

Crop production loan committees are now organized and approving loan applications in sixty-nine Nebraska counties, Director W. H. Brokaw of the agricultural college extension service said Wednesday. County officers in a few more counties are considering the appointment of loan committees, but most of the organization work has

Applications for the federal money are pouring into the re-gional office at Minneapolis by the thousands, L. J. Paulson, in charge of that office, told Brokaw in a telephone conversation. Any delay in getting the checks from the regional office has been due to congestion in the auditing department there, Paulson said. The men furnished by the Nebraska extension service to check over Nebraska applications are keeping up with their work every day.

Credit situations are said to have eased up in many Nebraska communities since the applications have been approved by the county committees and sent off to the re-gional office. Paulson thought he had the difficulties worked out and that the checks would be coming into Nebraska promptly.

County officers and committee-men have considered the matter seriously and sensibly, Brokaw feels. They expect their farmers to meet their obligations this fall according to the agreements signed with the government. They are urging farmers not to borrow unless they must, because debts are always hard to pay in times of low prices.

Brokaw and his assistants have met with all the county officers and committeemen of the sixtynine counties to explain the purpose of the loans, means of getting them, and the ways and the steps in filling out the application blanks and forms required. Any mistake in filling out the information, Brokaw has explained, will mean
