SCHOOLS TO RECEIVE AID FROM UNIVERSITY

Extension Department Will Supervise Courses by Correspondence.

That the department of public instruction of South Dakota has made arrangements with the extension division of the university to make high school correspondence units available to standard schools of that state, was disclosed Tuesday by Director A. A. Reed.

I. D. Weeks, state superintendent of public instruction in South Dakota, according to Director Reed, has authorized the use of supervised study courses in order to enable many schools in that state, which would otherwise probably have to close, to remain open. As a means of financial retrenchment they may now curtail the correspondence units to be given number of teachers and substitute under supervision.

Two or three other states are at present negotiating for similar arrangements, Director Reed said. He pointed out that the extension division of the university is a sectional nucleus for this branch of high school instruction because of developments made since the receipt of a \$5,000 endowment from the Carnegie Foundation for the Advancement of Teaching and the Carnegie corporation of New York.

Twenty-nine different high school supervised correspondence study courses are now available including work under the general headings of art, commercial arts, English, languages, mathematics, journalism, science and social science.
