Twenty-Four Principals Appear in the Large Cast; No Leading Roles in Play; Miss Howell and Yenne Make First Appearance.

Proving their capability of bringing the best in drama to Lincoln, the University Players scored a tremendous success Monday evening in presenting the Broadway hit of last season, "Dinner at Eight."

The unusually large cast of twenty-four principals gave remarkable performance of the George S. Kaufman-Edna Fer-ber play, which was staged and di-rected by Harold "Pete" Sumption, who is also responsible for the staging of the show in the east. The dramatic ritic ritic of stage and the stage of the show in the east.

The dramatic pitch of six plays, concentrated in this single drama, provided the university thespians with a vehicle that bespoke the dawn of a new epoch in the players' history. The caliber of the play, combined with the excellence of the performance, sent the qual-ity of the University Players' work to a new height.

No Leading Roles.

With the play constructed so that there are no leading roles, the entire cast had an opportunity to play the individual parts to their greatest extent. Each role sparkled as a distinct characterization, and every actor contributed his colorful bit to the success of the drama.

None of the roles can be pointed out as the outstanding, for the al-most matchless construction of the play, defeats any domination or preponderance. The work of the individuals, which in this play can only be considered as a whole, spelled dramatic excellence in every one of the eleven scenes. Miss Howell Has Part.

Miss H. Alice Howell's work in her first appearance on the Temple theater stage in some time was well received by the first night au-dience. Her role was that of the hostess, whose dinner party pre-cipitated the action of the play.

Herbert Yenne made his first appearance of the season in the powerful role of an actor. Mr. Yenne

SEND PETITION TO ICKES

Burnett Presents University Views on Building and Compulsory Drill.

Uniting solidly behind Rev. Ervine Inglis' call for peace, a group of seventy students, university faculty members and student pastors in a mass meeting Sunday afternoon in the Temple theater voted almost unanimous approval of a petition to be sent to the Secretary of the Inter-ior Harold L. Ickes protesting the use of public works funds for the building of an armory on the campus. Chancellor E. A. Burnett appeared before the group and ex-plained the policy of the university as regards the armory project.

Flay Military Construction

The petition adopted by the group flays "the construction of another army project for a people already overburdened with a military machine," and states "that there is greater need for cultural and educational buildings." Sug-gestion is also made in the petition for the university to secure loans for the other buildings, "which are needed more," under the 30% gift and 70% plan of the P. W. A. The document further claims that maintenance by legislative appro-priation would result in additional cuts in departments now operating at minimum cost.

Gives University's Views.

Chancellor Burnett in presenting the stand of the board of regents on the project, claimed that that body felt that through the sought for governmental donation a sorely needed building that would be a
