

CAMPUSOCIETY

ASIDE FROM THE NUMEROUS initiations and "probation weeks", there isn't much scheduled in the way of entertainment during the week; and the two spring parties on Friday and Saturday, and the Prevue Opening of the Park on Friday are the only events planned for the weekend. In Omaha, however, one of the theatres is presenting "The Student Prince", which started Friday and will run through this coming Thursday. This is not the first time that the production has been there, but it promises a bit of variety for those who enjoy musical comedies, and many plan to go some time during the week.

CHI PHI held initiation ceremonies last Saturday afternoon for the following men: Bob Funk of Lincoln, George Pipal of Humboldt, Fonda Rock of Lincoln, Jerry LaNoue of Winser, Frank Mossman of Omaha, and Gordon Graham of Scottsbluff. Chi Phi also announces the pledging of Harry Sorensen of Hardy.

AND THE BETAS also initiated last Saturday. The new members are Joe Roth, George Eager, and Bob Beightol of Lincoln; Horace Crosby of North Platte, Ross Alexander of Omaha, Winfield Elias of Wymore, Paul Richardson of Cambridge, John Parker and Raynor Riggs of Central City, Jack Nicholas of St. Joe, Bill Marsh of Fremont, Fred Keichel of Tecumseh, Bob Miller of Crete, and John Landis of Seward.

PRIZES at each table and favors to everyone attending will be given at the Phi Omega Pi mother's club benefit bridge this afternoon at the chapter house at 2 o'clock. Plans have been made for about ten or twelve tables of bridge. Mrs. Eugene Reed is in charge of arrangements, assisted by Mrs. Elvin Moonaw, president of the group, and Mrs. Erwin Hopt.

FORTY MEMBERS of the Chaparrons club will meet at the Alpha Xi Delta house this afternoon at 2:30 to hear a book review presented by Mrs. Frances Peon. Mrs. Ella Marshall, Alpha Xi Delta housemother, is chairman of the entertainment committee and is assisted by Mrs. Pearl Petermichael, Mrs. Paul Ream, Mrs. Maude Moore, Mrs. Frank Schrader, Mrs. Anna Hyland, and Mrs. Ezra Pullman.

ON THE FOURTEENTH of April, Miss Mary Alice Kelley of Omaha, who was a Kappa here, will be married to Koburn Tomson of Topeka, Kas., Phi Psi and Innocent. The couple plans to live in St. Paul, Minn.

AND MARIAN GOUDY, Tri Delta from Denver, has set June 6 as the date for her marriage to Dr. A. R. Eyres of Pullman, Wash. The event will take place at the First Methodist church in Omaha at 8:30 in the evening.

LAST SATURDAY evening Miss Virginia Crooks of Lincoln was married to Samuel Gallamore of Fairbury. Mrs. Gallamore was a Gamma Phi here and Mr. Gallamore was a Phi Sigma Kappa. The wedding was held at 8 o'clock in the evening at the First Christian church in Fairbury.

SUNDAY the school of music sponsored a reception in the N club rooms following the concert of the

WHAT'S DOING.

Tuesday.

Phi Omega Pi mothers club, 2 o'clock benefit bridge at the chapter house.
Chaperons club, 2:30 meeting at the Alpha Xi Delta house.

Wednesday.

Alpha Omicron Pi alumnae, 6:30 dinner at the home of Mrs. Will Logan.
Theta Sigma Phi, 6:30 dinner at the Lincoln hotel.

Thursday.

Alpha Chi Omega mothers club, 2:30 meeting at the chapter house.

Friday.

Teachers College Woman's club, 2:30 meeting at the home of Mrs. Herbert Brownell.
Tau Kappa Epsilon, spring party at the Cornhusker hotel.

Saturday.

Alpha Tau Omega, dinner at the Cornhusker hotel.
Sigma Kappa, dinner at the Lincoln hotel.
Delta Gamma alumnae, 7 o'clock banquet at the University club.
Delta Sigma Lambda, spring party at the Cornhusker hotel.

Sunday.

Alpha Tau Omega, dinner and informal reception at the chapter house.

University orchestra in the coliseum. One hundred and fifty guests attended, among whom were the members of the orchestra, the Tassels, and the faculty of the school of music.

NEW INITIATES of Chi Omega were entertained at a tea Sunday afternoon by the alumnae at the home of Mrs. Gayle C. Walker. The affair took place from 3 until 5, and the sorority colors, cardinal and straw, were used in the appointments. Mrs. Karl Arndt, Mrs. McEachen, and Mrs. O. B. Clark gave short talks.

AMONG THE new pledges to Sigma Alpha Iota are Helen Ulery, Helen Naeve, Elsie Mansfield, Velora Beck, Roberta Willbee, Marjorie Scott, and Evelyn Stowell. Among those having pledged Delta Omicron is Sally Peltier.

ON THE LAST day of the art exhibit of the Nebraska Art association, last Sunday, Professor Paul Grumman of Omaha was the lecturer. The exhibit was in Morrill hall and Professor Grumman spoke at 3:30 in the afternoon.

SUN—(Mat. 10c—Nite 15c). Now showing: Two Big Features "FRANKENSTEIN" and "COLLEGE HUMOR."

150 STUDENTS HEAR MONROE LECTURE ON SINGLE TAX SYSTEM

Speaker States Plan Would Put World Back at Full Ploy.

One hundred and fifty university students heard John Lawrence Monroe of Chicago, director of the Henry George Lecture association, discuss "Taxation and Our Economic Crisis" at a convocation held in Social Science auditorium yesterday morning. Dean J. E. LeRossignol presided. Advancing the single tax as a solution for our taxation difficulties, Monroe believes that "the single tax will put the world back to work at full time and full pay." He explained that the single tax would relieve the tax burden on agriculture and industry, and end land speculation, by taxing the value that the community contributes to the land, and not the improvements which the owner adds himself.

Penalizes Production. "Industrial depression and unemployment are the inevitable consequences of our tax system which penalizes production and encourages land speculation," makes industrial, residential, and

DR. LEWIS TO SPEAK AT PSI CHI MEETING

Lecturer Has Psychology of Normal Speech as Subject.

Dr. Don Lewis of Iowa State university will speak to the members of Psi Chi, honorary psychological society, March 29, in the Social Science auditorium at 8 p. m. The lecture will deal with "Experimental Approaches in the Psychology of Normal Speech," and will include slides and a discussion of the various experimental methods of measuring human speech. Dr. C. E. Seashore, head of the Iowa university psychology department, is sponsoring the tour.

Orlus C. Irwin will speak to the same group on April 19 on "The Development of the Infant." Irwin is of the research department of the University of Iowa and is the head of the Iowa Child Welfare Research station.

These lectures are open to anyone interested in the field of psychology.

Engineering College Alumni Visit Campus

Out of town alumni visitors at the university college of engineering recently have been: Edgar H. Landgren, who will take his C.E. degree in June, and who is chief draftsman and structural engineer for the Cudahy Packing company of Omaha; and Tom F. White, Chadron, who was graduated in electrical engineering in 1932.

Peace of World Menaced So Long as Munition Makers Not Muffled--Hill

Nations More Heavily Armed Than in 1914 States Professor.

"Unless nations are able to muffle munition makers and to compromise their own differences, the present armaments race, which is assuming greater proportions than anything which has ever preceded it, is likely to continue consuming billions of dollars and menacing the peace of the world," Norman L. Hill, professor of political science, stated in an article in the Sunday Journal-Star.

"During the last few months events have been pointing toward a new armaments race," Professor Hill continued, "Particularly as several of the powers have not yet reached the limits placed upon them by the Washington treaty of 1922 and the London treaty of 1930 and therefore are in a position to inaugurate a new era of competition by bringing their armaments up to the prescribed maxima. Until 1936 the nations will be restricted by the existing treaty provisions, but thereafter they will have a free hand unless, in the meantime, a new treaty is negotiated," Dr. Hill added.

More Heavily Armed.

At the present time the nations of the world are more heavily armed than they were in the crucial year of 1914 and the contemporary building programs will tend to increase the amount to a staggering total, Hill indicated.

"The true significance of this becomes all the more apparent when one reflects on the fact that the nations, skeptical of the utility of heavy capital ships, have been specializing since 1922 in cruisers and lighter craft," Dr. Hill said. "Implying that perhaps the main stimulus for the new armaments race was provided by the failure of the world disarmament conference and by the international conditions in Europe and the Far East which contributed to the inability of that conference to conclude a treaty, Prof. Hill went on to state that the conference or rather its steering committee has striven tenaciously, but in vain, to find a formula for disarmament.

"Because the failure of the conference has become more widely acknowledged, the nations have listened with renewed interest to the perennial cries of militarist groups for an enlargement of national defense programs and have as a result increased the regular appropriation bills in the respec-

tive countries to almost stupendous proportions," he said.

Navy May Cost \$500,000,000.

Hill declared that if the execution of the present program carried out during the next five years in the United States, as intended, it would create for us the largest peace-time navy in history, maintenance of which would run at an annual cost of about \$500,000,000.

Other nations are taking similar measures and, according to Dr. Hill, these policies in reality present a very serious menace to the peace of the world.

"Nations rise instinctively to the defense of cherished ideas but even when hesitant, manufacturers of munitions with powerful lobbies, who have excellent reasons for aligning themselves with those who believe that to prepare for war is to avert it, prod them along."

"Therefore unless nations are able to muffle these munitionmakers and to compromise their own differences, the present race is most likely to continue, consuming billions of dollars and seriously menacing the peace of the world," Dr. Hill concluded.

"Good order and justice—that is the religion of democracy," Dr. William L. Bryan, president of Indiana university, declared recently.

A serum that is claimed to be a 100 percent cure for whooping cough has been perfected by Prof. Louis W. Sauer of the University of Chicago medical school.

5 about Cigarettes

Practically untouched by human hands

WE'D like you to see Chesterfields made. We know you'd be impressed by the absolute cleanliness of our factories.

The tobaccos are the best that money can buy.

Expert chemists test for cleanliness and purity all materials used in any way in the manufacture of Chesterfield cigarettes.

The factories are modern throughout. Even the air is changed every 4 1/2 minutes.

When you smoke a Chesterfield you can be sure that there isn't a purer cigarette made.

In a letter to us an eminent scientist says: "Chesterfields are just as pure as the water you drink."

Inspectors examine Chesterfields as they come from the cigarette making machines and throw out any imperfect cigarettes.
