TEACHERS TO GATHER ON CAMPUS JUNE 27 FOR 3-DAY CONCLAVE

Educational Problems of Present Day to Be Discussed.

School administrators and teachers from all over the state will gather on the university campus June 27, 28 and 29 for a three day educational conference planned to bring before those interested methods in both elementary and high school grades.

According to Summer Session Director R. D. Moritz current problems of education including those of school finance, improvement of instruction, curriculum adjustment, social and economic problems of the New Deal, and the rural school and its problems will be discussed.

Programs for each day have been set up around the problems of the social sciences and present trends in society. Emphasis will also be given to selection of subject matter, problems of supervision, and special methods of class room teaching.

Talent of national reputation has been secured to lead the discussions and speak at the conference. In addition to well known Nebraska educators, Edgar Wesley, University of Minnesota; Marvin S. Pittman, Michigan State Normal; Helen McIntosh, grade supervisor at Grand Rapids, Mich.; William H. Burton, University of Chicago and Alice Cusack, primary supervisor at Kansas City, will participate in the conclave.

The three day meet will open at 8:30 Wednesday morning, June 27, with Prof. R. D. Moritz presiding. Greetings to the visitors will be extended by Charles Taylor, state superintendent of schools, and the aims and purposes of the conference will be set forth by Dr. F. E. Henzlik, dean of Teachers college.

At 9 o'clock Doctor Wesley will address the group on "The New Deal and the Social Studies" and his talk will be followed by "Fundamental Essentials in Good Supervision" by Doctor Burton. An open discussion at 11 o'clock will close the morning session.

H. W. Anderson, superintendent of Omaha schools, will preside during the afternoon session which opens at 1:30 and the first address (Continued on Page 2.)

Guy Chambers Asks Alumni Support of University in June Issue of Alumnus

The June issue of the Alumnus, university alumni magazine, is dedicated to the memory of Fred Morrow Fling, former head of the department of European history, who died June 8, and Prosser Hall Frye, former professor of English, who died June 3.

Included between the covers of the last issue of the magazine until next September were extensive reports of the annual alumni roundup, reports of the financial condition of the alumni association, reports of the officers of the organization, and news of general and alumni interest.

Prominent among the articles in this issue was the president's report, written by Guy W. Chambers, retiring president of the University Alumni association. In his article Chambers voiced a plea for university alumni to support their institution, pointing out the disastrous consequences of the recent legislative slash in university appropriations. In addition he cited numerous examples where communities have slashed their school budgets, where the economy effected was damaging. As a partial remedy for the situation, Mr. Chambers advocated that university alumni, graduates, and friends of education stir themselves to

GEOGRAPHY STUDENTS TO GO ON FIELD TRIP

Saturday's Trek First of Two Planned for Summer.

All students enrolled in the laboratory courses in geography at the university summer session will take a field trip Saturday, June 23, according to an announcement made Wednesday by E. E. Lackey, associate professor of geography. In addition to the regular geography students, however, other geography students and those interested in geography may be accommodated it was stated.

Saturday's trip is the first of two trips that will be taken by geography students this summer. Included in Saturday's trek are Weeping Water, Louisville and the State Fish Hatcheries at South Bend. Nearly 100 miles will be covered by the auto caravan.

The cost of transportation will be about \$2.

Rebuilt Square Indian Hut to Be Dedicated Soon

The first square Indian house ever rebuilt by white men will be dedicated near St. Helena, Neb., Sunday, June 24. The building was unearthed by a university archeological party last summer and was reconstructed by Mr. Will Schulte, on whose farm it is located, during the past winter.

Located close to the Missouri river southeast of Yankton, the St. Helena site was given a great deal of study last summer by a university field party under the direction of Dr. Earl Bell, assistant professor of anthropology at the university. The reconstructed square house which will be dedicated Sunday is the farthest western example of such Indian art. This type of house is one usually associated with eastern tribes.

Doctor Bell, who is now working near St. James, will be the principal speaker on the special dedication program. Rev. B. H. Teves of St. Helena, Senator J. P. O'Furey of Hartington, and Representative W. H. O'Gara of Laurel will also appear on the program. The Hartington drum and bugle corps will furnish music. A winding trail down the river bluffs with parking space near the river has been constructed for this event.

united action. Likewise he pointed out that the alumni should be willing to support such campus projects as a student union building.

A note of optimism was sounded by Ray Ramsay, alumni secretary, in his report to the association. It was his opinion that the alumni organization of the university was "looking up," following the disastrous consequences of the depression.

Ramsay also advocated that the alumni organization unite in a common defense of the best interests of the university, since the coming year, he felt, was a "vital acute" one.

In addition a full page was devoted to the new officers of the organization and brief biographical sketches of each one. The new officers of the organization are: John H. Agee, president; Mrs. Earl Mallery, vice president; John L. Cutright, member of executive committee, and others.

A complete report of the functions and activities of the university during the past year were reviewed in the chancellor's report. Mr. Burnett also pointed out the distinct note of "courage among the undergraduates" during

DR. BILLIG CONCLUDES TALKS FOR SCIENCE TEACHERS ON FRIDAY

Two Special Lectures on Schedule of Noted Speaker.

SCHEDULE.
June 21, 10 o'clock, T. C. 320—Special Lecture, "The Place of Science in the Public School Program."
11 o'clock, T. C. 323—General Conference.
2 o'clock, T. C. 323—Lecture, "The Development of Units of Study Which Are Appropriate for Elementary School Levels and Which Will Serve as a Basis for Junior High School Sciences."
June 22, 11 o'clock, T. C. 323—General Conference.
2 o'clock, T. C. 323—Lecture, "The Development of Units of Study for Junior High School Levels and Which Will Serve to Integrate This Work and the Science of Elementary and Secondary Schools."

Dr. Florence Billig, who has been on the campus this week presenting the second series of lectures planned for science teachers, is scheduled to conclude her group of talks Friday. Her lectures have been included in the course of study for Education 142, 122 and all other courses co-operating.

Thursday morning she will present a special lecture at 10 o'clock in T. C. 320 on the subject, "The Place of Science in the Public School Program." Her regular lecture will be given at 2 that afternoon in T. C. 323 on "The Development of Units of Study Which Are Appropriate for Elementary School Levels and Which Will Serve as a Basis for Junior High School Science."

Friday she will conclude her course of lectures with the sub-

Special Exhibit Is Planned Along With Bookmen's Showing

What Nebraska schools are doing to keep their patrons informed about the work being done in the schoolroom, is being shown in a special school interpretation exhibit in Grant Memorial Hall June 21 to 28. This exhibit, sponsored by the Nebraska State Teachers association, is being staged in connection with the display of the Nebraska Bookmen's association.

The school interpretation exhibit includes a wide variety of materials ranging from samples of superintendents' annual reports to a modern, improved report card which, in addition to recording progress in studies, reveals to the parent his child's rating in practically every phase of citizenship. There are interesting examples of excellent school newspapers, both printed and mimeographed. Included in this group are prize winners in national contests. There are also pamphlets and leaflets describing the educational situation throughout the entire country. There are cartoons and samples of publications by boards of education. There are handbooks and posters. A considerable number of American Education Week materials will give many suggestions to those already gathering ideas for the annual observance in November. The entire display is planned to offer a host of suggestions on how to tell the public about the aims, work and achievements of the schools.

"We feel that we have a decidedly worth while and helpful exhibit," states Charles A. Bowers, secretary of the Nebraska State Teachers Association and instructor at the university during the summer session. "Our display consists almost entirely of Nebraska products. Educators who recognize the value of keeping their patrons informed about the work of the local school, will find in this exhibit a wealth of suggestions. Teachers, administrators, supervisors—everyone is cordially invited to inspect the display to see what is being done in other schools in the state."

MISS ANDERSON TO MAKE TRIP ABROAD

Instructor Will Present Paper on Beet Sugar At Conference.

Miss Esther S. Anderson, member of the university geography department, leaves Lincoln this week end for an extensive trip abroad.

During her trip Miss Anderson, in addition to carrying on her work in geography, will go to Copenhagen, Denmark where she will represent the Lincoln Unitarian church at the World Unitarian conference.

In addition, Miss Anderson is scheduled to present a paper on the beet sugar industry of the United States, at the International Geographers conference to be held in Warsaw late in August.

Included on Miss Anderson's trip itinerary is the Mediterranean Sea and adjacent countries, Central Europe, England, Norway, Sweden and other northern European countries. Miss Anderson will stay abroad until September when she will return to resume her position with the geography department at the university.

Hostess Plan To Be Tried at Friday Mixer

The second summer session mixer will be held at the coliseum Friday night, June 22, at 8:30 p. m., according to an announcement released Wednesday by the summer session recreation committee.

Dave Haun and his ten piece orchestra will again play for the summer session dance. The admission price will remain at ten cents per person, the committee announced.

The mixer Friday night will be the occasion for an experiment being tried out by the summer recreation committee in the hope that a greater school spirit may be encouraged at the dances. Specifically, the committee stated, the practice of appointing five or six girls to act as hostesses will be inaugurated. These hostesses will help all newcomers get acquainted. The committee also stated that Friday night's hostesses will be designated with red ribbon badges.

The committee felt that such a practice would go far in keeping the parties at the coliseum democratic in spirit, since the size of the crowds attending the affairs has grown to such proportions that mixers are impracticable.

Five Nationally Prominent Speakers Secured For Educational Conference

Five nationally prominent educators in addition to well known Nebraska men and women have been secured for the three day educational conference scheduled on the university campus June 27, 28 and 29.

One of the chief speakers will be Dr. Edgar Wesley of the University of Minnesota. He is in charge of technique and supervision of social studies at that school and according to Summer Session Director R. D. Moritz, thru his activities in that field has won the right to be heard, not only in regard to the methods of teaching the social sciences, but also in regard to what the social science curriculum shall be.

Dr. Marvin S. Pittman, specialist in rural education at Michigan State Normal will be another of the main speakers at the conference. According to the bulletin issued by Teachers College Dr. Pittman has been in wide demand as instructor and consultant in rural education. Among other institutions the University of Michigan claimed his services in the summers of 1922 to 1926, and he is not unknown in Nebraska, having served as an instructor on the faculty in the summer session of 1928 and was a special lecturer

SCHEDULE OF SPORTS HOLDS ATTENTION OF STUDENT COMMITTEE

Prospects of a Successful Summer Is Seen by Group.

Plans for the summer session recreation program were formally completed Wednesday noon when the summer session recreation committee met at Prof. E. W. Lantz's office.

Sports for both men and women occupied the attention of the committee during the greater course of the meeting. Specifically the committee reported progress in the following programs.

1. Baseball for summer session men has been going forward with rapid strides. To date several teams have been organized and regular practice sessions are being held each evening at 6:45 p. m. on the field east of the Social Science building.

2. Girls baseball has advanced to the stage of organizing two teams, under the direction of Miss Estel Anderson. Practice is being held every evening at the same hour as the men's practices sessions.

3. Golfers are turning in their qualifying scores to Mr. Lowell De Voe or Prof. E. W. Lantz. They may be registered at any course in the city. When all scores are turned in, flights will be posted on the bulletin board of Teachers college, first floor.

4. Horseshoes are being played each evening at 7 p. m. on the field east of Teachers college. The stakes are set up, ready for any students desiring to make use of this opportunity to get in practice for a real horseshoe tournament later in the summer.

A general feeling of optimism was voiced by the committee over the prospects of a successful recreation program for summer school students.

Of particular interest to many men attending the university summer session are the "kitten ball" games. Practice sessions are being held every Monday, Tuesday, Wednesday, and Thursday evenings at 6:45 p. m., and according to reports a large number of men are turning out for this sport.

Further details of the playground baseball program will be released later when the number of (Continued on Page 2.)

here in the summer of 1929. Dr. Pittman was also advisor to the Secretary of Education for Mexico in 1929.

A third speaker for the conclave will be Dr. Helen McIntosh, grade supervisor at Grand Rapids, Mich., and who is recognized as an authority on teaching in the intermediate grades. She was formerly a member of the staffs of the University of Pittsburgh and the University of Michigan where she won distinction in her special field.

The field of supervision will be covered during the conference by Dr. W. H. Burton, professor of Education at the University of Southern California. He is the author of several widely known books on supervision and is accepted as an authority in this phase of school work. Dr. Burton is scheduled to be on the campus all summer during which time he will offer course in supervision of secondary and elementary subjects.

Primary supervision will be discussed by Miss Alice Cusack, primary supervisor at Kansas City. Miss Cusack has won national prominence in the field of primary education and is a specialist in reading and in English. Her many books on the subject of primary education are widely read.
