

CAMPUSOCIETY

SPEAKING OF ESCAPADES—THERE seems to have been quite a few of them on the campus recently. One of the best was organized by the law seniors who held their annual sneak day Thursday. They walked right past the ticket window of one of the downtown theaters, past the doorman, and down to the front row where they stayed—for a while—until the management decided they were disturbing the peace and summoned the police squad. So ends our sad, sad story of how thirteen young lawyers found Justice Holmes' most profound legal theories did no good and of how the same thirteen young lawyers appeared in municipal court Saturday morning—so let this be a lesson to you.

TRI DELT had had as its guest of honor this week end its local province deputy. Miss Zee Gore arrived Saturday morning and will return to her home in Denver, Colo., this evening.

MORTAR BOARD alumni entertained the active members at an afternoon bridge party yesterday at the home of Mrs. John Beachly. Assisting hostesses were Mrs. Barlo Nye, Mrs. Herbert Gish, Alice Quigg, Jane Boose, and Bartha Hersey. The rooms were decorated with chrysanthemums. Prizes were given to the alumnae and active members holding the high scores.

THE ALLIANCE of Delta Delta Delta met at the home of Miss Mildred Chapin yesterday noon for a 1 o'clock luncheon. Mrs. Giles Hinkle was the assisting hostess. The committee in charge of the arrangements was headed by Mrs. D. S. McCauley and consisted of Mrs. M. W. Baldwin, Miss Florence Butler, Miss Fay Barnell, Mrs. J. J. Ogle, and Mrs. Valera Barnell.

THE LINCOLN alumnae chapter of Phi Beta Phi will entertain the new pledges of the sorority at a 6:15 dinner-odd evening at the home of Miss Anne and Melinda Stuart. Mrs. Earl Kline, Mrs. Victor Jouvenant, Mrs. Ernest Wait, Miss Alice Howell, and Cynthia Tupper will be the assisting hostesses.

WHEN THE Phi Mu alumnae met at the chapter house for a 1 o'clock luncheon yesterday noon Miss Mildred Kamp was in charge of the arrangements. November colors were carried out in the menu and a Thanksgiving theme was used in the speeches. The luncheon was followed by a short business meeting.

SIGMA NU wishes to announce the recent pledging of Verne Thomas of Sidney.

SINCE the end of the six weeks limit on pledging last week, many houses have new pledges to announce. Phi Mu has pledged Gertrude Chapman, Peggy Heald, Jean Nelson, Katherine Rissner, and Esther Vandeburg. Dorothy Smith has pledged Kappa Alpha Theta.

ZDENKA CHAWAT has become affiliated with Alpha Delta Theta and Doris Eastman and Ruth Shankland have pledged Delta Zeta.

APPOINTMENTS at the Alpha Xi Delta alumnae luncheon which was held at the chapter house yesterday noon were carried out in yellow and lavender and chrysan-

OVER \$900 RECEIVED IN Y.W. FINANCE DRIVE

Freshman Girls Maintain Lead as Week's Work Closes.

With the freshman team leading all other classes, \$909.95 toward the goal of \$1,141 had been subscribed in the Y. W. C. A. finance drive as the week's activities closed. Freshman workers, with Betty Magee as executive, had turned in \$370.50 to maintain a lead they have held since the start of the drive.

The junior class stood in second place, with the sophomores third and seniors fourth. Jean Rowe, freshman worker, was ahead in the race for individual honors. At the last report meeting Friday afternoon, the drive was thrown open so that any girl could be interviewed by a member of any team, irrespective of the designated lists and class contests which featured the three main days of the drive.

46 YEAR OLD CURBSTONE ON 18TH & O REVEALS TRACKS OF LIZARD-LIKE ANIMAL WHICH LIVED AGES AGO NEAR COLORADO.

(Continued from Page 1.) The entire drive, under the leadership of Marjorie Shostak, will officially close with finance vesper, Tuesday afternoon.

stone on the surface, and uncovered another track. He interpreted that to mean that the stone had hardened after the tracks were made. Then other stone had filled in on top. During the 46 years it has been a Lincoln curbstome, rain, weather, and wear have taken away the top coating and the tracks now show plainly on the surface. So this ancient record of prehistoric life has been preserved on a modern paved street where balloon tires come to rest. This was once the joke of the cat that had walked in cement has become a slab of sandstone where an amphibian walked, and the university is preparing to exhibit it in Morrill hall.

ELIGIBLE SORORITIES FOR QUEEN SECTION ARE STILL LACKING

(Continued from Page 1.) stowed upon a college publication, Frank Crabill, present editor, stated that the 1935 product would not be one degree smaller either in size or content. The 1934 Cornhusker, by virtue of its All-American ranking, automatically becomes one of the ten outstanding annuals in the entire nation as seldom does the National Journalistic Publication Board award more than that number, Crabill said.

MUSEUM RECEIVES EXHIBIT SPECIMENS

Mrs. S. R. McKelvie has presented the university museum in Morrill hall with several specimens for exhibit. A large, elaborately carved teakwood bench which was made in Japan is one of the gifts. There are also two large cabinets for specimens; a mounted golden eagle with a wing spread of nearly 6 feet; an Indian squaw saddle; some imbedded calcite crystals, and many other objects which fit into the museum collections.

BURCHARD RECEIVES POSITION.

Frederic Burchard of Falls City, a graduate of the department of geology in 1931, has accepted a position with an oil company in Craig, Colorado.

FIVE MEN CHOSEN CANDIDATES FOR RHODES CONTEST

(Continued from Page 1.) Sigma Upsilon literary fraternity. Last year Johnson was made associate editor of the Prairie Schooner magazine and was on the editorial staff of the Awgwan. His stories and articles have appeared in the "Scholastic" magazine, Present Day American Literature, and the Omaha World-Herald.

West is a junior in the college of law, and was graduated as a Phi Beta Kappa from the college of arts and sciences last June. Before entering the college of law he became a member of Delta Sigma Rho, debate fraternity, Pi Mu Epsilon, honorary mathematics fraternity, and Sigma Upsilon, literary society.

Whitman is now in his third year in the college of law at the university. He received his A. B. degree from the Nebraska State Teachers College at Wayne. For two years he was a teacher of history in the Chadron high school; and he studied one summer of law at Northwestern university. He has been awarded a tuition scholarship from the university law college, and now holds a Jefferson H. Broady scholarship there. These five men will compete before the state committee which will name two men to represent the district. The district committee will choose four men to enter Oxford university in 1935. Those on the university committee this year were: Dr. C. H. Oldfather, Dr. E. H. Barbour, Prof. M. H. Merrill, and Dr. J. P. Senning.

RUST DESCRIBES FORM OF GALAXY TO PHYSICS CLUB

(Continued from Page 1.) as being of flat cylindrical or cart wheel shape. This cart wheel, is the center of the galaxy and contains some 700,000 million stars. Of this group the sun is only an average member, but its nearness to the earth emphasizes its size. The earth in turn is but a moon or satellite of the sun. On either side of the milky way are 50 globular clusters or star clouds, symmetrically arranged, which constitute the rest of the galaxy.

Using figures which he explained are necessarily somewhat hypothetical, Mr. Rust stated that the diameter of the galaxy is 200,000 light years and its thickness is 50,000 light years. To convey a conception of distance in space, he used two analogies. In the first he stated that it would take a train, traveling 60 miles an hour, 57 million years to reach the nearest star, Alpha Centauri, which is but for and a half light years away. In his second comparison, Mr. Rust calculated that two pounds of spider web would be necessary to encircle the earth, 25,000 miles in circumference, while a million tons of the same kind of web would be required to reach to Alpha Centauri. This distance to the nearest star is about 1,500,000 of the distance across the galaxy.

Mr. Rust further stated that there are probably a limitless number of galaxies in space similar to the one of which the solar system is a member. Professor Collins, who took part in the discussion that followed Mr. Rust's talk, postulated the arrangement of these numerous galaxies into super galaxies.

Judging from Friday night's turnout of about 30, President Heater declared that the new club is a definite success. This group, which met and organized on Oct. 19, was formed for the purpose of bringing together all those interested in physics to hear discussions

on scientific matters. An interest in physics is the only requisite for belonging to the club and new members will be welcome at the next meeting on Nov. 16, Heater stated.

NEW DIRECTORY WILL BE PLACED ON SALE TUESDAY

(Continued from Page 1.) piled from registration cards by commercial typists instead of student workers. This arrangement also permitted listing names of late registrants. Scheduled originally to appear two weeks ago, the date of publication was postponed due to delays in printing and binding. The price for the publication this year is fifty cents.

The directory is published annually under the supervision of the university Y. M. C. A., and under the special direction of C. D. Hayes, secretary of the men's group. "I have seen advance proofs of the new directory," Mr. Hayes stated Saturday, "and can recommend the book to students as one of the best in years. They will

find the new guides and classifications especially helpful. "We anticipate an early sell-out of the book this year since we are printing three hundred copies less," Funk stated. "Due to the limited supply available, we urge students to secure their copies immediately."

FRIENDSHIP BANQUET FEATURES DR. PAUCK

(Continued from Page 1.) that he experienced and which all foreign students experience in their first efforts to adjust themselves to a new outlook. Dr. Pauck indicated that this difficulty which foreign students have in understanding our customs is a good illustration of the mental attitude that causes international misunderstandings.

In conclusion Dr. Pauck stated: "War would be impossible if man could see his fellows as individuals and not as parts of vicious nationalistic systems. And this perspective is impossible unless man realizes that the universe has character, or a purpose which is directed by its Master—God."
