Strains of Carmen Reveal Culture of German Newspaper

By Lorraine Campbell. Miss Ingeborg Oesterlin, student from Heidelberg, Germany, stopped suddenly, in the midst of a typically German meal of summer sausage, pumpernickel bread, "holey" cheese and sauerkraut, and assumed a listening attitude. A drowsy expression appeared in her eyes and she started to hum, swaying slightly to the music. "That is to me, a beautiful piece," she said - referring to a selection from Carmen being broadcasted in a recent chain program.

This statement led to a discussion of American and European music appreciation, from which it was discovered that Miss Oesterlin in addition to being familiar with the story of practically every well-known opera, has had the privilege of seeing the majority of them presented by professional opera companies. "That is what I miss in your newspapers," she exclaimed. "Instead of your society columns, we have pages devoted to German cultural affairs - operas, recitals, concerts and dramatic events. There are no engagement announcements, vacation plans, nor society bulletins."
