Breaking Down A Barrier

RECENT developments in the educational world show that at last steps are being taken to tear down the traditional barrier existing between student and instructor.

A group of students in one of the residence halls at Syracuse university, under the direction of a head proctor and an especially selected group of graduate advisors, have raised their scholarship averages more than 20 percent over a year ago.

Through the closer personal contact between the student and his professor thus brought about, more than 66 percent earned better than C averages while less than 45 percent attained that rating last

Another school that is striving for this personal contact is Russell Sage college for women, where the old style grading system has been eliminated and a conference system substituted.

This problem is one that has confronted colleges and universities for a long time. It has been recognized by educators that students were not receiving the full benefits of a college education under the present plan whereby they attend classes so many times a week, listen to coldly impersonal lectures, do so much assigned reading, and are graded according to what is shown on an examination paper.

Under such a system, the main idea in the student's mind is to get through with a passing grade and eventually receive a degree, which in itself means nothing. His curiosity or thinking faculties are not stimulated in the least degree. His courses are like so many dead fish, something to be disposed

of as rapidly as possible. In this way the prime objective of a university. the development of an intellectual curiosity and of the thinking process, is defeated. The degree which the student receives at the end of his four years indicates that he has completed a required number of hours, but nothing remains to him from those hours except a few cut and dried facts.

The professor undoubtedly has more to offer than the dry accumulation of data he offers for class consumption, but how to get that extra something across to the student presents a question. There is a minimum of time allotted for class and in this small group of minutes it is hard to do more than is usually done. In addition there is always a group of dullards in every class whom the instructor, try as he might, could never interest in something more than getting by.

The only answer to this question is the establishment of closer personal relations between the two. The means of accomplishing this is not as important as the end, and need not present too great a problem. It is indisputable, however, that in order to keep up with the enlarging demands upon the educational system this relationship must be established, and it is encouraging to see more colleges falling into line with the movement.

'Un-American,'

Says Hoover.

AT almost the same time the United States senate was acting favorably on the administration's public works and relief appropriations bill, former times

President Hoover, who is more and more getting back into the political spotlight, was taking a nasty slap at President Roosevelt and his cohorts.

Many defects of the present administrative policy were enumerated by Hoover in his diatribe against the "un-American" course he claims is being taken by the administration. Among them he points out that the government has become centralized under an enormous bureaucracy and that small business men have been disabled and crushed.

Our ex-president, however, seems to forget that under his "constitutionally organized" government when men and women were masters of the government, the small business man was being crushed just as badly by the expansion of large industries which were aided and abetted by government policies.

An appeal is made to the young republicans to rejuvenate the republican party so that it can crush this democratic ogre in the next election. To do this would be to go back to the old system under which the country was operating when this great depression came upon us. The old republican ideals which originated in the time of Abraham Lincoln have long past been outmoded. If to go back to them is progress, then let the nation remain at a standstill,

EFT-WING authors and critics must have a good a deciding just what is proletarian literature. They exclude Albert Halper from their brotherhood because in his "The Foundry" he gave almost as much space and consideration to the bosses as to the workers. They exclude the poet Archibald Mac-Leish because although he does express his dislike for J. P. Morgan, he also laughs at the left-wingers themselves:"Aindt you read in d'books you are all brudders?" Indeed, those upon whom the champions of proletarian literature do put their approving stamp are few.

Among the major voices chanting on social themes are the two young English poets, W. H. Auden and Stephen Spender. Neither of them doubts that the economic system is responsible for all our selfishnesses, emptinesses, and general bad

Both Auden and Spender are remarkably adept in the handling of contemporary subject matter. They do not resort to conventional figures and rhythms, but they speak of cigaret ends, motorcycles, wires, "the black statement of pistons," and plate glass windows. And they plead with us of the younger generation to put aside the old ways for new.

Listen to Stephen Spender:

"oh young men oh young comrades it is too late now to stay in those houses your fathers built where they built you to to build to breed money on money"

W. H. Auden is even more persuasive, for he expresses the futility and frustration of our lives: "It wasn't always like this?

Perhaps it wasn't, but it is. Put the car away; when life fails, What's the good of going to Wales! Here am I, here are you:

But what does it mean? What are we going to do?"

Whether or not you are in sympathy with these young Englishmen's social philosophy, you must agree that their writing is effective stuff. Even when Auden writes that "Financier, leaving your little room. The game is up for you and for the others," he does it so facilely that one admires him, no matter what he may be saying.

The new collected poems of Auden and Spender have been popular volumes in the United States. Almost everyone agrees that these young men are versifiers of an ability not to be found in every year, and a good many people are willing to agree with them in their damning of the financiers and the empty life engendered by the economic system.

Here is proof, then, that poetry is, after all, a fitting medium for the expression of our chaotic

Editors Outline Objectives of '35

Recently an outline by various college presidents of the duties and objectives of college newspapers was compiled by the associated collegiate press. Here is presented the opinions of editors themselves concerning their duties.

Maintain Free Press Rights. By William Ferris, Editor, University of Michigan Daily.

The most important objective of the college newspaper in 1935 is the maintenance of its right to express free criticism of campus and national institutions. Under no circumstances should the college press become controlled by either faculty or student groups who have no knowledge of newspapers and whose interests are not in sympathy with the journalistic profession. Campus political institutions are eternally endeavoring to influence (they call it "co-operation") the college paper for the benefit of their own ideas or functions. No paper can maintain the respect of the majority of the members of its community if it appears to be the branch of any other campus group or organization. Once this right is established beyond question,

would suggest the following as objectives: 1. Honest news reporting. It is easy to

favor one group in reporting campus controversies. This should not be done by an intelligent and conscientious newspaper.

2. A liberal editorial policy. Most metropolitan newspapers are owned by wealthy men. They reflect the opinions of their owners. College papers can be a far more honest expression of general public opinion on national matters than can class controlled metropolitan

3. College newspapers are in the unique position of having a large number of men in the faculty, experts in their own fields, who may be interviewed on important issues of the day. I believe that college papers should place more emphasis on educational interviews of this type and less on circulated comic strips and other so called feature services.

Use Editorial Power Wisely. By Tom A. Dozier, Editor, University of Georgia Red and Black.

I think that the principal theme of college editorial policy should be conservatism. Not the conservatism of the indifferent, the narrow and the backward, but the conservatism that marks the really great newspapers of the United States. For too long, the college press has been prone to fly off into a frenzy about things which, after a little weighty deliberation, may be worked out sanely and

College editors have placed in their hands a power the potentiality of which few of them realize. To use this power wisely then should be the main editorial objective of 1935.

Wake Up Conservatives and Liberals. By Albert Kosek, Editor, University of Minnesota

Daily. What should be the objectives of the college newspaper in 1935? Here is my answer. Purposely I make them only two in the hope that by limiting their number we may better assure their fultillment.

1. To poke a finger into the ribs of conservatives and liberals (who, after all, predomiway, prod them into activity. The radicals have made themselves heard, and three cheers to them for doing so. But-for those of us who are not looking to soviet Russia-let us shake those in the middle and on the right loose from their dangerous apathy.

2. To cry out vigorously when freedom of assemblage, expression and of the press are impinged upon. With Hitlers here and with Huey Longs on the way up, it might be wise to keep one eye to our liberties lest we look around some day and find them gone. And let's not forget Mr. HearstDon't Be a Camp Follower. By Amos Landman, Editor, Brown University Daily Herald.

The notion that the college newspaper should reflect" campus opinion belongs to the collegiate era of gin bottles, gals, and five-day week ends, as depicted by the late lamented College Humor of the 1920's and by the movies. Campus opinion, unfortunately, is too much concerned with the next date or dance or class president or rushing party. Undoubtedly those matters are of a certain interest and local significance, but the college newspaper's editorial page is not going to be worth reading if it confines itself to such petty affairs. The truth is, it seems to me, that if the newspaper is going to lounge about, complacently playing the part of a mirror, the opinion it reflects will be unbearably Nebraska, Creighton university, insipid.

The college paper must be in the van; it dare not linger as a camp follower. It must adopt a set of objectives, a platform if you please, and a set of principles by which to go. There must be some point to its editorials.

The paper can crusade for some definite improvement in the campus situation by intelligent, constructive, and helpful criticism. By persistent efforts it can bring about that improvement, for the college paper is usually the best and most powerful medium on the college campus, if it is intelligently used. The goal may be an innovation in the curriculum, or any one of a host of judicious changes.

Second, the paper can use its editorial columns profitably by working for some less tangible goal, but one which is none the less of the greatest significance. Many editors are doing just that by their attacks on Hearst and by their devotion to the cause of peace. The immediate result of such editorial badminton, shuffleboard, and ten comment is perhaps negligible, but it is of definite niquoits. importance in helping to mold thoughtful and considered public opinion.

There is no reason why the college paper should refrain from comment on national and international affairs, for if the editorial writer is up on current events, as he should be, and if he is careful and thoughtful in what he writes, his views are valid in themselves. His editorials are also significant as an expression of the opinion of the rising generation. A balance, however, should be struck between editorials commenting on local events and conditions ans situations beyond the campus.

But the diversity of suitable topics should not cause him to permit unconnected and aimless edits. And, as a parting shot, the editor should never lose his sense of humor.

Stimulate Reader Thought. By Charles H. Bernhard, Editor, University of Wisconsin Daily Cardinal.

The editorial objective of a college newspaper, not only in 1935, but every year, ought to be the stimulation of thought on the part of the readers. If people agree with you, you will have a pretty trip thru the Black Forest and dead newspaper. But you will also avoid contro- along the Rhine. Dr. J. Alexis, versies which may become unpleasant. In other words, if it is your aim to end your administration | ment will introduce him as editor with nothing but happy memories of the German numbers, "Phosphoresz-complimentary tickets received it is far better to enz," and "Ich sah den Wald sich stay away from subjects which might lead to challenging letters from readers and possibly a few broken friendships

It is the duty if not the privilege of editors to raise a little polite hell with the sacred shibboleths of readers. Question the value of military training. You may get quite a kick-back, but you will also get a stimulating discussion and an awareness that you have been responsible for some thinking on the part of your subscribers. The objective of the 1935 newspaper editorial page ought to be first, readerstimulation and, second, self-stimulation. Perhaps that last objective ought to be ranked first.

Blish Bakes Bread in Order

If any housewives still bake their own bread, they probably still wish it would turn into light, crisp loaves each week. Because it doesn't always do that, Dr. M. J. Blish at the university proffers them much sympathy.

In the laboratory Dr. Blish has baked countless thousands year a fixed amount of funds are of loaves of bread in the last dozen?-

STUDENT ATHLETES TAKE PART IN MEET

Represent 100 Activities at Physical Education Demonstration.

One of the highlights of the Central District Convention of the American Physical Education association, which opened at the Fontenelle hotel in Omaha last Wednesday and which ends today, was the athletic demonstration, held Friday, March 22, at the Ak-Sar-Ben coliseum. Approximately 100 students and faculty members of the university took part.

Over 100 different activities were shown and participated in by delegates from the University of Nebraska Wesleyan, State Teachers' colleges at Wayne, Peru, and Chadron, and the Omaha and Council Bluffs high schools,

Coach Schulte's tracksters demonstrated several of the fine points in track technique and Coach Bible used several football men for demonstration.

Crittendon, Andrews and Wimberly took part in fencing demonstrations, while Herman, Bignell, Reynolds, and Green participated in gymnastics, tumbling, and wrestling exhibitions.

Forty-five women, including faculty members, under the direction of Miss Mabel Lee, head of the women's physical education department, took part in demonstrations of Grant volley ball, archery,
