BERWANGER: BY A NEBRASKAN

Jumping Jay's A Great Back, But On the Wrong Eleven.

BY ARNOLD LEVIN.

I watched Jay Berwanger Saturday-the guy with the mile-long preputation. He's good, there's no disputing the facts, but he's on the wrong team.

In other words, I think Jumping Jay is too good for the Chicago eleven. With a good line and capable blocking backs he'd be another "Red" Grange, or Chris Cagle, but as is he's a great player on a mediocre team. The burden falls on him and him alone. He runs like a demon; his passing is good, but nothing extraordinary Saturday; his punting is excellent and his blocking superb, but he doesn't have teammates of fine enough caliber to maintain his

Consequently, Jumping Jay tires. He can't hold the dazzling pace he sets for sixty straight minutes. He needs rest, someone on whom to rely for a few minutes of relaxation on the field.

Jay Tired at Half. At the end of the first half Saturday Berwanger was visibly worn out. He had carried the ball, but not too much, punted, passed, blocked for his backfield, and run back punts. His sprint around left end for the Maroon touchdown was beautiful-the ne plus ultra of football efficiency, but he didn't have much help from his mates. He outsped Nebraska. And he kept on outspeeding Nebraska un-til he was whittled down to Cornhusker size and then taken for a

With the exception of that one 12-yard sprint, Berwanger didn't do a great deal of harm to Nebraska. He made a couple nice gains from scrimmage, ran back a few punts with some gree of success, but his running wasn't a revelation. His twisting punts caused Nebraska fumbles. and he maintained a nice average during the afternoon. His passes were unsuccessful, but he pulled one All-American trick that left Huskers gasping—that sudden stop and long flip to the opposite corner of the field. But his end had stopped a moment too soon, and the ball was just out of reach.

Jay Didn't Carry Much. I expected Jay to carry the ball more than he did. Maybe he was self-conscious about calling his own signal, maybe he was saving himself for a decisive spurt. His touchdown run gave Nebraskans an inkling of what he might have done during the afternoon. Many fans were surprised that he didn't do more. Of course, Nebraska had soncentrated on him, the way any opponent would concentrate on a

man eleven. I think Berwanger is a great ack. He's every bit as good as Weinstock, Nicksick, Munjas, of last year's Pittsburgh team, and he rates right up there with Lund of Minnesota—one of the Huskers'

most potent opponents.

I can't help but reflect a bit—
what a swell pair Berwanger and
Nebraska's Cardwell would make.

Darlington Author of New Office Management Text

Prof. George M. Darlington, as mistant professor of accounting, has written a new text on office management. Its distinctive feature is the liberal use made of questions and problems in illustrating the application of management principles. Professor Darlington reported a record enrollment in beginning accounting classes, which necessitated dividing the class into two laboratory groups.

Seniors on the Husker's starting lineup-Bernard Scherer, Dallas, S D., end; James Heldt, Scotta: luff, tackle; John Williams, Lincoln, guard; Ladas Hubka, Table Rock, guard: Paul Morrison, Lincoln, center; Henry Bauer, Lincoln, quarterback; Jerry LaNoue, Wis-ner, halfback; Robert Benson, Pender, halfback,

The frosh squad averages well up into the 190's thru the line the backfield shows a lot of power and speed.

FROSH FOOTBALL **OUTFIT TRIMMED** TO FORTY-THREE

Petz, Weir Make First Cut Friday; Term Squad 'Best in Years.'

Forty-three stalwart freshmen survived the first drastic football squad cut of the season. The deed, committed by Coaches Petz and Weir, kept both mentors ponder-ing until long after office hours on

Friday night.

This year's freshmen squad has been termed by the entire Cornhusker coaching staff as "the best bunch of Nebraska yearlings in re-cent history." The coaches could scarcely make a distinction between those who should be permanently on the squad and who should not, since almost without exception every one of the youthful gridders loomed up as an embryonic Cornhusker. Each gave the impression of previously having had an apprenticeship to the Husker tactics.

Those in the backfield who especially are motives for coaches beaming smiles are Bill Callihan, Ralph Tucker, Marvin Plock and John Saunders, all of whom were former every day expressions in state prep grid circles. In the line Howard Richards, Bob Mills and George Seeman at ends, Jack Mc-Pherson, Dale Seligman and Sam Schwartzkopf at tackles, Bob Reichstedt and Edward Sauer at guards, and Bob Ramey and Charley Brock at center are the yeo

The present squad now includes: Backs, Bill Andreson, Bill Calihan, Hugo Hoffman, Thurston Phelps, Ralph Tucker, Marvin Plock, W. C. Long, Harry Waddick, Robert White, Harold Rahn, Warren Fred-ricks, Jacob Dietrich, Robert Neuman. Clement Theobald, Saunders, Ends: Howard Richards, Bob Mills, Don Michealson, Enycart, Robert Elliott George Seeman. Tackles: John Reitmeyer, Jack McPherson, Rolyne Boschult, Bill Anderson, Dale Seligman, Robert Elliot, Roy Hutchinson, Sam Schwartzkopf, Mervin Kolell, George Meler, Herman Strasheim. Guards: Bob Reichstedt, Edward Sauer, William Hermann, Gene Schrike, Paul Bauman, Harry Plambeck, Bob Heilig, Glenn Ridle, Kenneth Enyeart, Centers: Charles Brock, Bob Ra-

Biblemen Get Offer Of Two Chain Hook-Up

Nebraska was prodded ever onward in yesterday's en-gagement with Chicago by an inspiration different from the usual surging "school spirit." Coach D. X. Bible was of-

fered a coast to coast hook-up on both the National and Columbia broadcasting sys-tems if his Husker eleven went through their first op-ponents like they were a green light or at least makes a good impression on the system officials present in the

"I feel that if we can get a spot on the hook up it will be a good thing for Nebraska athletics and the school as a whole," Bible commented.

depict the errors commonly mad in executing the plays. Ed Weir traditional cameraman, showed th pictures and gave a chalk talk.

SPEER BELIEVES WAR IN AFRICA AVERTABLE R.O.T.C. Major Addresses National Sojourners Friday.

That an arrangement of conces sions satisfactory to Ethiopia and Italy and to Great Britain, will avert an Italo-Ethiopian conflict, was the opinion expressed by Maj. Charles E. Speer, of the university R. O. T. C., when he addressed the Lincoln chapter of National Sojourners Friday evening.

"Italy is not likely to incur world condemnation by forcing a conflict," stated Major Speer. Besides, war on Italy's part would be which she has pledged to uphold."

Major Speer believes that Mussolini would be satisfied if given control over territory adjacent to the Italian Somaliland and would give Eritrea to Ethiopia.

Three Engineers Hired; Upward Trend Indicated

Several calls for engineers have been received at Dean Ferguson's office recently which seems to indicate an upward turn in business. Three graduates of the mechanical engineering department have reported for duty with the Allis Chalmers Co. of Milwaukee. They include E. D. Beachler of Sioux City; Earl C. Mantor of Lincoln J. Robert Pilling, jr., of

Ed Weir reports his freshman squad is the best in years-which is saying a lot when you consider A review of last season's games the year Sam Francis, Lloyd Cardwere shown the group this afternoon by using moving pictures to frosh ball.

Annual Sugar Beet Acreage in State Is Usually Second or Third Highest According to Report of Dr. Anderson

In a late comprehensive bulletin dealing with the sugar beet industry in Nebraska and published thru the conservation and survey division of the university, Dr. Esther S. Anderson, assistant professor of geography, shows that Nebraska usually ranks second or third among the states in sugar beet produc-

tion. Miss Anderson says that the

the cultivation of the sugar beet and for 1926-30, 84,000 acres. The figure rose still higher in 1933 when 88,000 acres were under cul-tivation. But in 1934, the drouth year, lack of water for irrigation good cash crop.

60,000. The Nebraska faculty member, who is nationally recognized as an authority on this subject, says: to the community from the sale of "Sugar beets can be grown suc-cessfully in western and central sale of cattle and sheep fattened Nebraska because of the excellent on beet tops

annual acreage of sugar beets in topographic soil and climatic cona violation of four peace treaties this state varies from 65,000 to ditions, plus the availability of wa-95,000 and the tonnage ranges ter for irrigation. Careful studies show that the beet grown in the show that the beet grown in the A review of acreage figures in-dicates that more and more fields inversely with the average temperature in the growing season and are being given over to this type of agriculture. From 1924-28, inversely with the total autumn rain." Doctor Anderson points out that

the sugar beet industry here is beneficial to the state in many ways, namely: 1. The sugar beet is usually

in central and western Nebraska 2. Thru crop rotations and by sent the total down to a low of careful methods of cultivation, it adds fertility and improves the

4. The character of beet cultivation requires much labor and, therefore, supports a denser population than other types of agricul-

5. Because of the transfer of large quantities of raw and refined materials, excellent lines of communication have been developed. In conclusion, her bulletin says, "Beet raising and community wel-fare are closely related. The introduction of sugar beets into the agriculture of a region adds a type of stability to agriculture that is not found in other agricultural regions. Not only during the summer months are more people given work than could be accommodated otherwise, but during the winter, many are given employment in the factories. This means cities are developed, educational facilities are improved and more desirable social opportunities are available and lines of communication are extended, reducing to a minimum some of the chief disadvantages of rural life."

Busiest of Seasons Enjoyed by Tractor Testing Laboratory

The tractor testing laboratory at the University college of agricul-ture reports one of the busiest seasons since tractor testing was begun fifteen years ago. Up to the present fourteen tractors have been tested this season, nine of which have been tested since July 1. At the present time the first American made Diesel powered wheel tractor is being tested and applications are on file for five

Interest among the users of trac-tors is reflected by the fact that Agricultural Experiment Station Bulletin 292 printed last January, which reports the results of the 1934 testing season, is out of print and is being reprinted. The bulle-tin which will include the results of the 1935 testing season will be printed in January of 1936. The tractor testing bulletin, which appears annually in January, always includes reports on tractors tested in previous years if those tractors are still on the market. A three page report of each test is issued soon after the test is completed.

MUSICIANS INVITED TO PANHELLENIC AFFAIR

Women Students May Meet Professional Groups' Members.

Women music students have been extended invitations to attend the music panhellenic tea to be given today from 3 to 5 o'clock at Ellen Smith hall. At this tea the students will have the opportunity of meeting girls of the professional music sororities.

The program for the afternoon consists of an hour musicale followed by the tea at which Miss Amanda Heppner, dean of women, will preside.

Arrangements are being made by the three professional women's music sororities, Mu Phi Epsilon, of which Irene Reimers is president; Delta Omicron, headed by Vera Mae Peterson; and Sigma Alpha Iota with Lois Rathburn in
