Nebraska's Big Six champions left for Pittsburgh keyed almost to the breaking point for the battle with a Pittsburgh team that they realized would prove a thunderous, crowning test of their ability. They left with a feverish prayer that Providence would be kind, and that for once Pitt would find herself on the short end of a Nebraska score, that hadn't been quite large enough since 1921. All the Pitt victories in the history of that warfare were reflected in a valiant Husker determination that nothing should come between them and victorious vengeance.

"The piece has many stirringly dramatic moments," stated Miss Augusta Nelson, instructor in Romance Languages, "and the portrayal by Yvonne Printemps is an experience in the theater that one can never forget."

Miss Nelson emphasized the fact that since the language is literary and dramatic, it will be more easily understood by American students than a fast moving comedy in which the language is more colloquial.

Cornhuskers' Fame Does Not Stop With U. S., Letters Show

Fame and name of Nebraska's Cornhuskers extends not only across the land but across the sea, and "There is no Place Like Nebraska" rings out from all over the world. Two letters recently received from former residents of the Husker state and printed in the Omaha World-Herald, show that the name is known in foreign lands.

One writer tells of a Nebraska rally on the Neckar river in Heidelberg at a dinner party given by Ingeborg Oesterlin, exchange stu-dent here last year. Progress of the football team is watched and Heidelberg residents even suggest the introduction of university matches there.

And then from Africa comes a letter saying that the Husker extend even to the "dark continent." The writer says, "On the boat from Southampton to Cape Town I met a native of the latter place. He had read of the Cornhuskers in South African papers and asked me lots of questions about our track athletes and about the game of football, as we play it.

"Just last night I met a native (white) dentist who had studied at Michigan and then returned to Durham. When I told him I was from Nebraska he said: "Oh, an-other of those big Cornhuskers." He emphasized the "big." He must have gone to Michigan when Jumbo Stichm was teaching the Huskers."
