#### We Raise A Protest.

SIMULTANEOUS with the approach of the much heralded military rendezvous, scheduled this year for Dec. 6, are mutterings and complaints concerning the "highway robbery" tactics pursued by the "jingoists" in charge. In today's student pulse column there appears such a voice expressing the opinions of the vast majority of students as regards the inhibitory entrance fee attached to the formal season's gala opener.

Many of these dissensions and malcontentions come from even the staunchest supporters of the military department. These persons feel that as a servant of the campus and performing as it supposedly does, for the interests of the students, the Military ball steps from the bounds of practicability into the realm of exhorbitance when \$2 is demanded from the hard pressed student.

If such a price were needed to cover the expenditures of the affair, matters might assume an entirely different proportion. But as they stand at present the best excuse that can be offered is the ridiculous and laughable proposition that it is used to aid needy students in securing basic drill uniforms which they do not want in the first place.

Colonel Oury in a statement last year concerning the use of funds as profits from the Military ball declared that the ball is a "Godsend to several hundred worthy, but financially dependent male students, who according to law, must take military training."

It is a well known fact among students on the campus that the number of applicants seeking aid through these channels is ludicrously insignificant. It taxes even the most biased mind to justify the compilation of a four years for the sole purpose of loaning \$10 for a comparatively short time to a few needy students. If every student receiving these loans tore his uniform to shreds and refused to make good the loan, there still would be a surplus fund in the department's coffers. What are they trying to do, establish a sinking

Then spectators are charged 35 cents apiece for a balcony view of the gala occasion. From a most unusually fair estimate, as the balcony is always packed, attendance numbers 500, bringing in an aggregate of \$175. Thus these two sums in themselves net a nice total of \$550 which in itself is enough to conduct almost any social event.

ently averaged around \$400 in cost, many falling below that mark, sometimes by as much as \$100. Use of the coliseum costs another \$50, decorations \$25 and sound equipment \$25. This leaves such things as operation expenses and advertising to be covered by the other \$50. This latter sum, as vouched for by experiences of the Innocents, Interfraternity council, and Mortar Boards, has been sufficient for the remaining expenditures.

Then why in the name of all that is reasonable must the remaining 800 couples pay

an additional \$1,600? It is only natural that the consensus of opinion as so aptly expressed in today's student pulse by B. W. should hold the belief that "big shots of our beloved mili-tary department are feathering their nests for their old age at our expense.'

The Military's is not the right of commercialization. Theirs is not the power of mandafory action. Why should the student body suffer the yoke of such assumptory shackling? There is absolutely no known reason for placing a higher price on the ball than on any other social event of the university.

Why does Miss Amanda Heppner, together with the faculty committee, allow the Military department this prerogative of charging \$2 when others cannot do likewise? If the students are going to be exploited why not let everyone in on the "racket"? Does Miss Heppner feel that such a price is logical and just? Does Miss Heppner (together with the faculty committee) harbor the belief that such a price tends to promote harmony and good will on this campus? Does Miss Heppner (together with the faculty committee) sincerely believe that the Military department is more worthy and needy of this nice tidy sum than any other organization?

The Nebraskan emphatically does not. The Military department may consist of tin soldiers but as yet they are far from being tin gods. The Nebraskan suggests that immediate action be taken to (1) stop the influx of money into the military coffers and (2) to remember foremost and always that it is the student that should be served and considered. That is the purpose of a university.

#### STUDENT PULSE

Brief, concise contributions pertinent to matters of student life and the university are welcomed by this department, under the usual restrictions of sound newspaper practice, which excludes all libelous matter and personal attacks. Letters must be signed, but names will be withheld from publication if so desired.

Can War-Gods Make 'Music?' TO THE EDITOR:

To date this semester there have been aired innumerable points in the sad state of A.W.S. BOARD MAKES affairs around this school. These you have forcefully and commendably brought to light, with the long needed comment and uprisings in the student body. But why stop now? If you are out of material, may I suggest some-

How about the biggest racket on the campus? How about the Military ball? Every year a thousand and a half students pay over \$3,000 to jam the coliseum at the opening of the formal season. What return do they get for this sum? Let's follow the progress of some innocent student.

First, he enters the coliseum, and stands m line for an hour to check his coat. Then, if the gentleman is lucky enough to be able to party set for Thursday, Nov. 21, walk, he bravely enters the stomping ground members of the A. W. S. Board upstairs, with his hair rumpled, his tie askew, are making plans for their big nis shoes crushed, and his new tux shirt beaten and mangled past all hope of repair.

There he faces probably the weirdest mixture of sounds emanating from one orchestra Armory, where the party is to be that is possible for ten men to manufacture. held, is expected to portray an Can this be the great orchestra that has been imaginary toy shop, with Molly conservatively estimated \$6,000 during the past publicized over every classroom billboard on Carpenter as the shop keeper. the campus for a month? Surely not. But it is what we paid for, that is what the military department hired for us.

Last year we went, full of hopes and expectancy at hearing Louis Panico and his swell pand. What did we hear? Louis and his trumpet and ten recruited musicians. What can we expect for \$400? Yet we paid \$3,000 for the privilege of dancing to a really good band. What became of the rest? Surely it cannot priced at twenty-five cents, may be that the eminent big shots of our beloved military department are feathering their nests this year. for their old age at our expense.

We pay enough money for a good band. Then why not spend it for what we want, rather than for swelling the already overflowmg coffers of the military department? We want decent music. If the military fathers won't give it to us let's have some one who will. Let's give the opening formal of the formal season to the history department. Let's have a geography department ball or a ball of romance languages. They are as much entitled to the proceeds as the gods of war. Why not open the formal season with the Junior-Senior prom or the Interfraternity ball? How about the Innocents, Tassels, Mortar Board, or Corn Cobs? They are surely doing as much for the school as the inhabitants of Mars hall and they would give us a party minus the grand gyp. in a few words, let's get our money's worth or jet someone else take over the opening party.

Monday he addustrial cities of the east where dressed students of Sheridan school there is a demand for engineering department here under conditions on "How to Promote the Cause of education. This program is proving

Lynn Leonard

Adjournment Was

in sight as the house recessed for the week end late Friday afternoon. Staying on the job Saturday would not help matters any because the bills the solons passed Friday could not measure third reading and be enrolled and engrossed until Monday. The dispatch with which he representatives worked just before adjourning until Monday led to the belief that the session will terminate Tuesday if the senate handles without too much difficulty the bills the house will soon release.

Five Social Security

measures received the approval of the house Friday and were advanced to third reading. They were H. R. 17, the old age pension bill; H. R. 13, a bill for direct, home and transient relief; H. R. 5, bill for assistance to the blind: H. R. 19, bill for assistance to dependent, crippled, destitute, abandoned and needy children; and H. R. 18, maternal and child health assistance bill. The house approved the measures as fast as they were released from a special joint committee appointed to revise the program and relieve the difficulties developed over administration features of the program. The indication is that the solons are tired working for nothing, the ten day period for which they were to receive pay having expired some time previous.

Fight for Tobacco

and chain store tax bills was abandoned after the administration agreed to extend the gasoline tax from June 30, 1936, to March 1, 1937. Supporters of these two bills were apparently | tor Norris.

convincing the other members that the gasoline tax in the original form would not raise sufficient revenue when the governor offered to compromise by extending the tax in return for the two measures being dropped. It is this move by Cochran that probably prevented the indefinite block threatening the social security program in the house.

Awaiting Action in

the senate is the substitute bill to provide for Washington Educator Gives this compromise. The bill not only extends the gas tax but also substitutes a board of educational lands and funds for the proposed state assistance committee named by the governor. If it is passed by the senate, which is expected, the measure must go back to house for approval, and that is practically assured as the house now stands.

What Nebraskans Want

to know is, "Will Senator Norris be a candidate for re-election in 1936?" Following the printing of an interview in a Salt Lake paper in which he was quoted as saying, "I am not a candidate," the senator denied to Los Angeles reporter that he had said he would not run for re-election. -Norris then refused to discuss his candidacy further because he was on a political vacation.

Roosevelt Called on

the people of Nebraska to insist that Norris run for re-election next year. The president's statement follows:

This is the kind of thing you can say of very few persons and George Norris is one. If I were a citizen of the state of Nebraska, regardless of what party I belonged to, I would for they can be depended on to be not allow George Norris to retire from the United States senate whether he wanted to or not for the very good reason that I feel he is necessary in the senate not only to the state would draft a program providing of Nebraska but to the United States as long as he lives."

And Roosevelt is right again. That is a mighty fine tribute but not too good for Sena-

### ARRANGEMENTS FOR CORNHUSKER AFFAIR

'Toyland' Theme for Party; Three Prizes Awarded For Costumes.

With the date of the annual allwomen's Cornhusker costume entertainment of the year. The theme around which the party will be laid is "Toyland," and the Phi Lambda Upsilon Plans

The party will begin promptly at 7 o'clock with the grand march, Mary Yoder, in charge of the arrangements, announced. the judges will select the prize costumes during the march everyone has been asked to come on Three prizes will be awarded, one for the cleverest costume, one for the prettiest, one for the funniest. Tickets, be purchased at the door, no ticket campaign being conducted

### UDY CENTERS OFFER SCHOOL OPPORTUNITY

### **EDUCATION COUNCILS** FOR YOUNG CITIZENS

Program for Workless Youth of Nation.

Dr. Fred Kelly, chief of the division of higher education in Washington, D. C., outlined an individualized educational program conducted for unemployed young people out of contact with school, at a talk before the state character education conference at the Temple theater Friday morning.
Discusses Transient Problem.

Citing statistics showing that in rural localities 4 million of the 6 million young people between the ages of 15 and 24 living on farms in the United States have no contact with educational institutions. Dr. Kelly also discussed the transient problem. He stated that in June, 1935, there were 50,000 unattached young people of that age group lodged in transient camps.

Education Recommended. Kelly suggested a solution for the problem in the formation of town and county educational, recreational and vocational guidance councils "with young people given a chance to assume the initiative, honest, frank and square shoot-These councils, working with civic groups such as churches, 4-H clubs, and the Y.
