The power of the United States supreme court to invalidate legislation has reached socially damaging proportions, in the opinion of American college students, and should be curbed without delay. Revision of the constitution so

as to check the power of the high court is favored by a majority of students, according to an Associated Collegiate Press survey just completed.

ening to note that Senator Donahey, who is usually classed in the conservative bloc in congress, has finally recognized need for change. His statement indicates quite clearly a trend away from the traditionally-held belief that the constitution is a sacred document, one which must not be changed lest we gain the wrath of the gods. "There is even a new and more liberal attitude growing among the general public toward constitu-tional change. This is as it should be. The ironical fact is that for

The obvious question is: where does the power lie? In the consti-tution, as the court proclaims: or too long most of us have clung to the time-worn theory that to in the persons of the court who change the constitution is plain define the constitution in prac-tice?....The fundamental con-cepts of democracy....are really heresy. "It is just as ridiculous for us only petrified prejudices, opinions

to believe that we could write a constitution in 1936 to govern the political, social and economic attitudes of Americans in 2083 as is to believe that a group of individ-uals could be expected to draft a document in 1789 to fit the needs of Americans in 1936. Yet a cry for constitutional change has always been met with charges of 'communism' and 'un-Americanism.' So we see an attempt to abolish child labor by constitutional change failing not because Amer-icans feel child labor should be allowed to remain in our economic system, but principally because it iggests constitutional change." Meanwhile, Duquesne Univer-sity students, in response to a questionnaire, voted 56 percent in

favor of curbing the power of the supreme court. It is increasingly evident, said the Duquesne Duke in commenting editorially on this vote, that the interest of college students is steadily swinging from the frivolous to matters of national concern.

You Can Depend on the Man Who Advertises

NINE times out of ten you will find that the man who advertises is the man who most willingly returns your money if you are not satisfied.

He has too much at stake to risk losing your trade or your confidence. You can depend on him.

He is not in business for today or tomorrow only--but for next year and ten years from next year. He knows the value of good-will.

You get better merchandise at a fairer price than he could ever hope to sell it if he did not have the larger volume of business that comes from legitimate advertising and goods that bear out the promise of the printed word.
