Telegrams To Washington

The Student Union Activities Building committee, which met yesterday afternoon in the Student council room, was so engrossed in settling to their individual satisfaction all references pertaining to the technical erection of the hoped for structure that only a few members remained aware of the real issue involved at the present time. Much argument was wasted upon the size of the ballrooms; the manner of building to be erected, whether it would be rectangular or L shaped, and the type of architecture to be used.

The vital problem now before the student body, which Mr. Wilson, architect, and only one or two committee members brought out, is not so much the size, shape or structure of the building but rather the necessary steps yet to be taken before the adequate amount of money can be procured. Mr. Wison and the board of regents are only too anxious to cooperate with the students once the monetary hurdles have been cleared. The plan submitted to Washington can be readily changed by the regents provided the new program does not necessitate an additional allocation of funds by the federal government.

The lower house of congress just two days ago passed thru to the senate a WPA bill without any special rider or stipulation allotting part of the money for the use of PWA funds. Now the WPA handles small, independent and relatively inexpensive projects. Under PWA, on the other hand, come those more costly single endeavors dealing with greater sums of money. It is under the PWA that a project such as ours would fall. Now unless the senate insists upon designating a portion of this WPA money for PWA purposes, which the house refused to do, then for the present Nebraska's prospect of securing a Student Union

Activities building is doomed. Students should act immediately, cause is by no means lost. Both Senators Norris and Burke from Nebraska explicitly expressed the desire for such a project as this and stated they would lend their wholehearted support. It is not an uncommon occurrence for the senate to send back to the house a totally revised bill for the lower branch's reconsideration. Much pressure is being placed upon this particular issue and student increments would aid immeasurably.

Ineffectual as would such a policy seem upon superficial examination, nevertheless it has been shown in the past that sending telegrams has often changed the expected outcome of a bill. As many students as possible should send telegrams to either of Nebraska's senators or to President Roosevelt insisting that the appropriation bill earmark a certain amount of its funds for PWA work. If no such earmark is made the Union building is lost for some time to come.

The importance of getting into immediate action can not be overly stressed. A flood of individual messages can work wonders. Last year a similar situation arose. All the PWA funds were to be handled exclusively by Hopkins. It was thru the efforts of certain individuals employing such tacties as these that they were finally enabled to upset the already completed program. As a result 3 million dollars was granted to aid building projects in Nebraska.

Already Irving Hill, employing student committee funds set aside for just such exigencies as this, has sent a few telegrams to the above personages. Acting in the group's behalf Mr. Hill has taken the initial step. Let as many organized houses as are possibly able respond to this gesture, A telegram from each, pleading for the betterment of our university by urging the earmarking of the appropriation bill for PWA funds, might easily become a lasting contribution to the school. Wholeheartedly take up the cause and see the project thru to the finish. Do not let it die. Here is a chance to materially aid that institution which is your institution. Each organized house should speed at least a single entreaty to Washington without further delay.

STUDENT PULSE

Brief, concise contributions pertinent to matters of student life and the university are welcomed by this department, under the usual restrictions of sound newspaper practice, which excludes all libelous matter and personal attacks. Letters must be signed, but names will be withheld from publication of so desired.

TO THE EDITOR:

Some time ago you produced a few editorials with a slight tone of ridicule toward the Kosmet Klub. Suddenly they stopped, and I wondered why. But after witnessing for the third time that political farce labeled the tapping of the Innocents, I can readily see why the inquiry ended so abruptly.

At the time of my entrance into the university, the Innocent society meant to me just as it must mean to hundreds of gullible freshmen every year, little short of immortality.

that are tapped during their junior year, make a speech before some high school society, and tap a successor for the following year, do not represent the cream of the Cornhusker crop. but merely the members of fraternities that are fortunate enough to have a man in power. These young men who enjoy the privileges of Innocents pledged to them a year in advance have only to sit on their doubtful thrones and wait until their representative for the following year is ready for the ceremony. By being a little bullheaded and compromising, the Innocent in power can give and receive favors, support undeserving candidates for his fellow Innocents and insure his man one of the coveted seats, regardless of comparative merit.

In past years such practices have passed unquestioned, but last Thursday, when the excitement created by the football tactics on the lawn had died down, there were many who paused to reflect and wonder if those chairs were really filled with the thirteen representative men of Nebraska. There has been much discussion on this subject during the last few days, and I believe that the campus is beginning to wake up to the fact that our present method of choosing Innocents and the caliber of the Innocents chosen is not at all what Dr. Condra and the other founders of the organization had in mind.

If something is not done in the near fu ture to remedy the situation, the day will come when Ivy day or the Innocents will carry little significance to the students of Nebraska or to anyone else, for like the jvy that dies from year to year, the Innocent society is dving. But there is still time for something to be done UNIVERSITY GIRLS WILL about it. The movement must be made from within the society itself, and a little sacrifice will have to be shown, but if only for the sake of tradition, it should be saved.

I may be a bit hasty, and possibly radical in my beliefs, but if so, I am not alone, and Lincoln Firm Invites Coeds we would like to be shown. An answer would be appreciated.

CONTEMPORARY COMMENT

National

Restaurant Week

This week more than 50,000 eating establishments in the United States are observing National Restaurant week.

"The restaurant industry is one of the foremost employers of labor," Secretary of Commerce Daniel C. Roper said in commenting of coeds. on the inauguration of the week. "The industry devotes a larger percentage of its gross income to pay roll than any other retail trade.' The president of the National Restaurant association. Frank O. Sherrill, points out that restaurant sales have increased 1 percent in the last two years. Yet many workers employed in restaurants in Bloomington and elsewhere Florence Smeerin, Virginia Anderare working as many as 17 and 18 hours a day, and an 80-hour week for a salary of little over \$10 a week.

The facts do not coincide with the statements made by the leaders of the association. If a larger percent of the gross income is be- FISCHER FIGHTS ing devoted to the pay roll, the wages of the worker should show a difference. Americans have now come to look upon a six hour day as a normal working day and a 17 hour day is with a grade of 2.410, and Delta regarded as extreme

The tragedy of the 80 hour week and the low wage scale of the industry is that the ma-ties, in the order of their scholasjority of the persons employed are young per- tic averages, are as follows: sons, many of whom have a family to support on the meager wages which they are receiving. In addition, although the industry is one Sigma Phi, Kappa Sigma, Delta of the foremost employers of labor, there is a Tau Delta, and Zeta Beta Tau. rapid turnover in the labor and the persons Sigma Kappa, Pi Kappa Alpha employed have no assurance of security. Since the establishment of America's first eating Xi, Lambda Chi Alpha, Sigma Nu, house 300 years ago, the industry has made great advancements, but before it rightfully go far in providing a decent wage and security Phi's 2.804 and Alpha Xi Delta's for its employes. National Restaurant week might well be dedicated to that purpose.-Indiana Daily Student.

Collegiate Polish, Over Confusion

Sheltered in the moment, man regards his present systems of culture with a curious stolidity and takes his own particular social milieu Delta Delta Delta, Pi Beta Phi, for granted with sanguine assurance. Thus we and Delta Zeta. Honorary Bizad fraternity, Al-pha Kappa Psi, topped the list are chained forever to relative values. We can know no other environment than the present; even our imaginings of other modes is limited by experience; and so the best we can do is placed second when their comlive our little lives in studied nonchalance.

The college youth is an admirable success at such techniques. By careful practice he has fraternity. Their average was become adept at simulating an attitude of sophisticated assurance. His mannerisms are less The other professional fraterniindividual than mass; he assumes the fadisms of his day in droves, hardly aware of his own ma Epsilon, Phi Mu Alpha, Delta

conventionality. Those incubated in the college environment tend to be very world wise and smile in kindly condescension at the rusticities and egoisms of the professional sororities were less urban localities. The new barn of Silas, the taken in the following order: Sigsewing circle which meets at Minnie's househow quaint! And all the while we concern ma Phi, and Delta Omicron ourselves with rushing teas, riding habits, publicity chairmen and gowns of mousseline de soie! How infinitely more elegant; how much

Perhaps it may be said of us that at least we are consistent in our perversities and that was 3.125. consistency of standard is required. But even consistency may be an illusion. Thus we are almost reduced to a state wherein we hesitate to proclaim exact knowledge of anything except our own ideas. At least we must scorn any peremptory proclamation of values.

Man is an inconsistent creature, and his attempts at consistency are often ludicrous. The span of illusion is unbounded. We, as college students, may act sophisticated or even blase, but at heart we admit our confusion .-Minnesota Daily.

Man's Own Show-

Civilization

Will world peace ever be possible? That question has been asked innumerable times, and today it is a more important question than ever before.

The revolt of youth, of democracy, against Now I realize strongly that those thirteen men | possible war again brings justified hope that

a world peace will be possible. Those who believe that mankind is in the grip of irresistible forces such as war, hatred, show only their ignorance of history and mankind.

It has been observed through the ages that man has inhabited the earth that he has needed certain characteristics in order to live and progress, but as soon as he no longer needed those characteristics, they disappeared.

Cannibalism was once predominant among the people of the earth. At that time it was necessary to eat human flesh in order to exist. But conditions changed. It became no longer needful to practice cannibalism, and it has been abandoned except in the most savage tribes; tribes who have not undergone that progress enjoyed by the world in general.

A philosopher of ancient Greece said that slavery must always exist. That without it there could be no leisure class to further learning, invention, and the arts. But slavery has been outlawed today.

World peace is possible and inevitable, The world is in its infancy. When children are young they fight, but when they grow up to adults they cease scratching each other's faces.

Early in the history of the world, the main object of man was to kill. He had to if he expected to live. Man and beast differed little in their needs and emotions. But man was destined to progress. Those who claim that war is the result of capitalism have their theory disproved by the fact that the most predomi- legian.

nant era of war (in its broadest sense) was during the simplest economic period experienced in history. Man killed then because his stomach demanded it.

Peace is not a thing that can be gained in a day, a month or a year. But eventually it is inevitable, if man is to continue to inhabit the face of the earth. Psychologists agree on Prof. Diers Directs Group one thing-that the foremost instinct of man is self preservation. With the modern instruments of warfare-paradoxically, the instruments of progress which have been turned to he wrong use-another world conflict would dispopulate the earth shortly. Man will not extinguish his very existence.

With the same modern instruments of transportation and communication, the world will ultimately unify. It cannot do otherwise. Modern invention has opened a way for a democratic world, not so conscious of class and civil strife.

War is a demonstration of physical force and might. The world is gradually abolishing the idea that might is right, and with that realization will come world peace. The world has never before felt the uselessness and disaster of war so vividly.

Only those who make profits from war promote it. People do not make wars; they only fight and die in them. With a free press democratic government is possible, and demoeratic governments outlaw war .- Daily O'Col-

Dean LeRossignol plans to leave June 9th for his summer vacation and will not return until the end of January. He has accepted a half year's leave of absence. In expressing his regrets for being unable to enter the chess competition in order to test out the "altitude theory," he remarked. "It reminds me of the Irishman who, when asked to change a ten dollar bill, said: 'I cannot, sorr, but I thank you for the compliment.'

AG COLLEGE KEEPS PICNIC TRADITION

200 Students Gather for Annual Fair Clean-Up.

More than 200 ag students gathered at the annual Clean-Up day picnic at the activities building on Ag campus Sunday to dismantle booths and return tables and other properties to their regular places. The picnic, which has been held the day after every Farmer's Fair since the organization of the first fair 15 years ago, is one of the fa-

vorite traditions of ag college. All persons who take part in the fair come to the picnic to clear away all traces of the occasion and to make the campus ready for school the following day. The men wear overalls and the coeds wear cotton dresses. After their morning's work, the Farmer's Fair board gives a luncheon for them. Usually the lunch is held outdoors, but this Sunday the picnicers were interrupted by rain and forced to seek shelter in the Activities building.

Moving pictures, taken of the group at work, will be shown next spring at the first rally for the 1937 Farmer's Fair, moving pictures are also a part of the tradition surrounding the fair.

In charge of the picnic was Janice Campbell, who was assisted by the concessions committee which she heads,
