A Word to The Council.

JUST a word to the new Student Council which has so recently organized and prepared to take over the reins of campus government when it comes into authoritative power next fall.

The new council has a year of hard work. of tremendous tasks left unfinished by two years of effort, and a great problem of campus betterment before it. It must step into shoes that are difficult to fill, for the actions of the council both during the year now ending and the year before that leave a target which only high aiming and fine shooting can hit.

The organization ending its year of power has done a remarkably fine job. Under the segis of good leaders, and with a powerful cooperative spirit behind it, it has recorded accomplishments that will go down in university history. The Student Bookstore, approval for a Student Union building, inspection of campus organizations, and achievements in publicizing university activities are only a few of the many fine things it has done.

The new council must not let such effort, in the case of the bookstore and Union expounded for two years before action was taken, go to waste. The issues are of vital importance to the student population. As representatives of the student body, the Student Council must see they are carried thru to conclusions compatible with campus wishes.

The Student Bookstore must not escape from student hands. As proposed by the Student Council, the store would have on its board of management students elected by the council to sit with administrative officials and supervise its activities. As finally set up, management of the store does not include student participation. The Student Council of the past year carried on a long, drawn-out, vigorous campaign before meeting success by passing this store thru the board of regents. The new council can but see that those provisions so contested for shall be put in effect. The Student Bookstore is entirely and unqualifiedly a student project, from beginning to end, brought about by students patronized by students, and its management should and must have student participation to insure that campus demands will be respected and enforced.

The new conneil is faced with the problem of earrying the Student Union drive another notch forward. With regent approval secured. with eampus sentiment unanimously behind it, the Union must be built. There are means of financing other than the un-forthcoming PWA funds. There are the University Building corporation, the University Foundation, the state legislature, if need be. The Union campaign must be carried on with the flame and vigor that preceded and marked its passage by the

Then, the perennial element of factional combines, of being forced to defeat combinations and groups, in some cases, to secure the best man for the job, is up to the council to take definite action. This isn't a simple matter of saying "there can be no factional politics because we, the Student Council, say so." No indeed. This is a matter of delving into the very foundations of campus government and eampus politics in order to clarify the atmosphere of the pollution resulting from elections that must be adjudicated by the judiciary committee of the Student Council. It is well enough to argue "the women did it, why can't the men." Men's politics are laid in a frothing, angry sea of fraternity differences and personal likes and dislikes, a sea likely at any time, or at least once every three years, to wash up a new political party on the campus shores. The problem extends beyond mere denial, and may require a considerable number of hit and miss, trial and error solutions until the suitable one is found.

The members of the new council must realize they are the pick of the campus. They have a duty to perform as true and clearly defined as that of any senator or representative in Washington. They represent the student body, should reflect its ideals and aspirations, its desires and achievements. They must remember that they are public servants, with duties of officious nature thrust upon them. Co-operation is perhaps the best asset
