Jane Walcott, Associate Editor.
Robert Wadhams, Business Manager.

All Work And No Play—

Inevitable in the summer time is the idea which persists in the minds of many taking work in the University that time is limited and consequently not a minute of it should be wasted on activity that does not contribute directly to academic achievement.

The majority of students realize, however, the value of recreational and social activities. They have, for the most part, spent a strenuous year in some field of activity. Many are educators who are attending the University to attain higher degrees, or merely to become more adequately informed on subject matter or skilled in the technique of teaching. Summer is for them vacation time; they spend it, not in rest and relaxation, but in work of a strenuous and difficult nature.

The Nebraskan admires this spirit—this desire to improve and better oneself in order to be more capable of doing one's work and to be more at ease in a complex world. At the same time an attempt should be made to overcome the tendency to spend all one's time in study.

Perhaps for some such a warning is unnecessary. Not all those registered in the summer course take their work with such seriousness that they forget to have vacation.

The Nebraskan advocates a bit of vacation for all along with the school work. Surely this is the only sane way to live, not only in summer, but the year around. Educators, as well as students, are fortunate in being allowed a three months' vacation in the summer. Such extended exemptions from duty are not common in other business or professional lines. The teachers and students can afford to spend part of their summer vacation in training themselves for their jobs. They can at the same time spare a few hours to enjoy well earned leisure.

In order that strangers at the University will not be without recreational facilities, a University official, with the aid of a student committee, plans each year a recreational program for both men and women students who wish to participate.

Attendance at University parties and participation in recreational activities last summer was unusually fine. Because of the interest shown the program will be continued and perhaps extended this summer. Plans have already been made and announced in today's Nebraskan for a baseball tournament, with practices beginning Friday evening. Other events of this kind, as well as affairs of a social nature will be carried on during the summer session.

Because such activities are beneficial to the individual and because they promote comradeship and a spirit of friendliness among students the Nebraskan favors these activities, and recommends them for students in the summer session.

CALDWELL, JACOBSEN, FRANCIS TO COMPETE IN CHICAGO CONTEST

(Continued from Page 1).
also placed fourth in the 100 yard dash.

Francis to Put Shot.
Sam Francis, Nebraska's number one weight man, will use his mighty left arm in an attempt to heave the shot into the placement bracket at the Chicago meet. Sam won first place in the shot put in the recent Big Six meet, with a

distance of 48 feet 11 1/2 inches. Sam's mightiest heave was that of 51 feet 9 3/4 inches, made at the Texas Relays. Francis has won every event in which he has been entered this year.

Coach Schulte is hopeful that the Nebraska men will make an excellent showing in the meet and according to recent performances, they should come out in creditable fashion.

INDIVIDUAL TRAINING PURPOSE OF FOURTH STATE MUSIC COURSE

(Continued from Page 1).
boys at the Delta Sigma Lambda fraternity house.

With all students in the course recommended by music supervisors, and by their superintendent of schools, they have all had training and have shown ability along musical lines. A complete daily schedule with work in orchestra, band, and chorus has been planned as well as recreational and social activities.

Rehearsals in Mornings.

Mornings will be spent with a general rehearsal of the all-state orchestra, under the direction of William W. Norton, and of the all-state chorus, under the direction of George R. Howerton. These practices will be followed by an ensemble practice for small orchestral groups and sectional orchestral rehearsals and by private lessons or practice in the instrumental and vocal departments. In the mornings, also, there will be a music supervisors course in public school music.

In the afternoon there will be general rehearsals of the all-state band and all-state chorus. These will be followed by ensemble practice for small vocal groups and general rehearsals. The time from 4 to 5:30 will be spent in recreation, under the direction of Lowell S. Devoe, and Miss Frances Stowell.

Radio broadcasting is also a feature of the course, and once each week solo broadcasts are made over KFAB by those students who perform best in studio auditions. Several ensemble broadcasts will be made with the whole group.

Visiting Instructors.

Mr. Norton and Mrs. Howerton, visiting instructors who will be in charge of the work of the high school music course, are both trained in music and in music instruction. Mr. Norton is former president of the North Central Music Supervisors conference. He was formerly on the staff of the National Camp at Interlochen, Mich. He was recently appointed national chairman of the festivals and contest committee of the national conference and is also a member of the executive committee. He is president of the Michigan Music Educators association and a member of the Michigan Council on Education.

Mr. Howerton is director of music at Hiram college. Choral groups under his direction have appeared in concert in Cleveland, Columbus, Cincinnati, Toledo, Erie, Rochester, Buffalo, and Chicago. Mr. Howerton is also organist-director of the Plymouth church of Shaker Heights in Cleveland, O.

peoples who resided there at some-time or other represents all the known cultures of Nebraska. The university scientist says the Niobrara valley from Lynch on east is a region containing an unusually promising number of significant sites which will probably give up information on the types of people who inhabited the middlewest in the pre-modern days.

GOLDS INSTALLS NEW AIR CONDITION PLANT

Charles Leopold, Engineer, Supervises Installation Of Cooling System.

Months of study by Nathan Gold, and the engagement of Charles Leopold, expert on air conditioning installation, have made the new air conditioning plant at Golds a successful enterprise.

Mr. Gold inspected installations in dozens of eastern stores and even viewed the equipment that is used to cool and freshen the air in President Roosevelt's private office. He discussed the particular problems which confronted the Lincoln department store with heads of several engineering firms. Charles Leopold, the engineer who was awarded the United States Capitol installation, was selected to do the job.

The engineer and a crew of men inspected the store and reviewed Lincoln weather conditions, in order to make the installation a permanent success. The system took weeks to be installed and store executives are well pleased with the result.

184 STUDENTS LEAVE FOR FORT CROOK CAMP

thur H. Smith; Robert Teeple; Milton Wittman; Donald H. Wy-more; Carl R. Yost; and Eugene B. Yost.

Those stationed at Fort Riley are as follows: Sam H. Adams; Joe C. Brown; Joseph A. Kavalee; Joe W. Pospisi; and Leonard F. Rastede.

FIRST REGISTRATION FIGURES SHOW TOTAL OF 1,328 ENROLLED

(Continued from Page 1).
charged those students registering late.

Students are permitted to select courses from both the long and short sessions. The short session will close July 17 and the long session will close Aug. 7.

Students Now Charged Late Registration Fee

A fee of \$1 for each additional week after classes have begun will be charged all students registering late. The regular registration period closed at 5 o'clock Wednesday, and an additional fee of \$3 is charged all students registering after that time.

Graduate students may register until Thursday, June 18, without additional charge. After that date, no registrations will be accepted.

Classes Convene On Saturday This Week

Classes will meet regularly on Saturday this week, it was announced by Prof. R. D. Moritz, director of the summer session. Following this week, class sessions will be held only on the regular five days a week.

H. JACOBSEN TO RUN IN REGIONAL CONTEST

Harold "Jake" Jacobsen, speedy Husker trackster, has accepted an invitation to compete in the regional A. A. U. track meet, this week at Minneapolis, Minnesota. He will run in the 100 meter dash and in the 200 meters.
