Faculty Given Leaves.
Dr. Burnett declared that the morale and the scholarship of the faculty have also been encouraged in many ways. He explained the rule passed in 1930 permitting faculty members to ask for sabbatical leave with part salary for the purpose of study in other universities. He described the workings and benefits of the new retirement system.

Teachers have been encouraged to travel, upon their own time and at their own expense, in order to increase their effectiveness," the Chancellor stated. "Limited opportunities for research in their respective fields have been provided for the teaching staff. Research tends to develop a fertile mind and freshness of approach to teaching problems."

During Burnett's administration the university enrollment increased from 6,340 students in 1927 to 6,535 in 1929. The intervening depression caused a decrease to 5,074 in 1933, but a record was reached during the first semester of the current year when 6,546 students were enrolled.

many ways since 1928. Andrews hall was built that year to accommodate the departments of English, German, and the dental college. The second unit of the medical hospital at Omaha was built in 1927-28. After a prolonged delay, Carrie Belle Raymond hall was added in 1931, and enough additional land was secured to double the present student capacity of the building. Three small cooperative houses have also been provided for unaffiliated girls.

In 1930 the present school of music was purchased and since that time has been operated as a collegiate school of the university. The new heating and power plant which serves both the state capital and the university was built in 1930.

Latest development in the present campus is the Student Union building which will be erected at the corner of 14th and R. An additional \$75,000 will be provided by the alumni association for furnishings.
