## COURT REVISES LAW SCHOOL REGULATIONS

### Two Years College Work Required to Enter Legal Activity.

No person desiring to become an attorney can enter a law school or begin studying for admission in a law office unless, in addition to a high school education he has had at least two years work in college. This rule, amendatory of existing regulations, was adopted by the supreme court Saturday.

The court also adopted a rule which defines a reputable law school as one which is on the list of the Standardization Agency of the American Bar association. The present regulations provide for accrediting students from any reputable law school, but the difficulty arose in the definition of the term reputable.

Law schools that are not listed with the agency at the present time will have until July 1, 1940 to do so, the court decided. Only one institution in the state, a night school in Omaha, is affected by this ruling and will have to clear out the students now enrolled and secure the required listing.

Among other amendments made was one changing "may" to "shall" in the rule relating to holding annual examinations by the state bar commission.

R. D. MORITZ,  
Director of the Summer Session.

### Miss Kinscella Asked to Join MacDowell Colony

Miss Hazel Gertrude Kinscella, noted Lincoln composer, who is a member of the piano faculty of the University of Nebraska school of music, has been invited by Mrs. Edward MacDowell to become a member of the MacDowell Colony for Creative Workers at Peterborough, N. H., where she will continue her writing. Miss Kinscella was nominated for membership by Mrs. H. H. A. Beach and Rosetter G. Cole.

## NYA STUDENTS EARN TOTAL OF \$111,900

### 900 Aid Own Finances by Work on Useful School Projects.

More than 900 NYA student-workers at the University of Nebraska earned approximately \$111,900 during the 1936-37 school year, according to report from headquarters of the Nebraska division.

In this report is seen the continuance of the educational careers of several hundreds of students who otherwise would have been compelled to drop out because of financial curtailment.

Approximately half of the money expended in the National Youth Administration student aid program in Nebraska was expended within the university. The remainder went to similar programs in other Nebraska colleges. All 23 colleges participated in giving this type of employment to students, a total of 2,350 students availing themselves of the opportunity of part time jobs and earning a total of approximately \$278,000 during the year.

#### Work Varied.

Work performed by these students has varied from clerical tasks to construction of facilities and equipment to be used in educational and recreational activities on the campus. The construction of facilities and equipment has included the making of laboratory apparatus, which has been of especial value to all students of the school.

Other phases of the work have included activities designed to aid local social agencies and educational institutions in the furtherance of their programs. Work in extension departments has made college facilities available to many not in regular attendance.

The large number of students engaged in this work and the importance of the work in making college educations possible for those who would otherwise be unable to attend has made this branch one of the most effective educational programs and one of the most valuable types of student employment.

### Classes Will Meet Saturday Only for First School Week

Classes will meet regularly on Saturday for the first week of school, according to an announcement made by Prof. R. D. Moritz, director of the summer session. After the first week, however, they will meet only five days a week.

## FIELD PARTY GOES TO WEST NEBRASKA

### Barbour Heads Group to Seek Fossil Pieces for Museum.

Encouraged by the success of last summer, Dr. E. H. Barbour, accompanied by the largest field party ever to spend the summer in seeking museum pieces, left recently for western Nebraska to excavate in the fossil fields of the state.

One group, in charge of Thompson M. Stout of Lewellen, will be stationed near Broadwater the first part of the summer. Another commanded by E. L. Blue of Lincoln, will work in the quarries in and around Bridgeport. Guy Johnson and Loren Tooney of Heingford made up the third, which will work near that town. A museum group under Grayson Meade left a few days ago, bound for Marsland.

In addition to those named, Mr. and Mrs. C. Bertrand Schultz will have general charge of excavating in the Broadwater, Bridgeport and Hemingford areas, with headquarters at Bridgeport, and will visit the other fields at frequent intervals. John Mercer of Red Cloud, Jack Graham of York, Robert Kubicek of Crete, Ray Harrison of Grand Island, Vern Williams of Lincoln, Harry Tourtelot of Kearney, Robert Wolf of Red Cloud, Wesley Robbins and William Chaloupka, jr., of Lincoln will all work in the Bridgeport diggings.

This will be the second season of museum exploration in the Bridgeport and Broadwater areas, where many important fossil remains were found last summer.

The groups plan to spend the latter part of the summer at Harrison and Hay Springs.

Dr. Kirk Bryan, physiographer and geologist from Harvard, is in charge of a group in eastern Colorado and hopes eventually to correlate this work with that of the Schultz party, both being concerned with late pleistocene deposits and terraces.

Hazel O'Conner was named vice president, Mariel Jones, treasurer, and Vera Upton, secretary. Howard Kirkpatrick, director of the school, also spoke briefly. Several of the graduating class and a few alumni participated in an informal musical program.
