A COOL DIP IN A SPARKING swimming pool—it's one of the best remedies for that energyless feeling that comes about the middle of a hot afternoon. It seems that a good many of ye summer school students have already realized this, judging from the number that chowd the various pools. And it's not at all a bad idea! If you haven't already found it out, try it!

SPEAKING OF SWIMMING reminds us of athletics, which reminds us that Nebraska's Coach Lawrence M. Jones' new house at 3145 So. 31st is almost ready for occupancy.

TWO FORMER UNIVERSITY students, Miss Wilma Jelinek and Lieut. Morris Craig, of Annapolis, Md., were married recently. Lieutenant Craig is a graduate of Nebraska dental college and is a member of Alpha Tau Omega and Delta Sigma Delta, dental fraternity. He took the competitive examination and received a commission in the dental corps, U. S. navy, and was assigned to the U. S. naval academy as first tour of duty.

ANOTHER UNIVERSITY student, Miss Dorothy Porter, became the bride of Kenneth John Vogt at a Sunday evening ceremony. Mrs. Vogt was a member of Delta Gamma sorority, while Mr. Vogt, who is a graduate of the business administration and law colleges, belongs to Phi Delta Theta and Phi Delta Phi.

MARRIED JUNE 30 WERE Miss Mary Dodrill and Delbert J. Sampson. Mrs. Sampson is a graduate of the university and is affiliated with Alpha Lambda Delta, Phi Upsilon Omicron, and Omicron Nu. Mr. Sampson is a graduate of Nebraska Wesleyan.

MRS. KEENE F. LUDDEN was Miss Inez Oleta Baker before her recent marriage. Mr. Ludden, who is of Tempe, Ariz., is a university graduate.

ANOTHER COUPLE WHO formerly attended the university, Miss Grace Kellogg and Mel Rood, were married April 24 at Plattsmouth. Announcement was made at a recent party.

AT BUFFALO OCCURRED the recent marriage of Miss Edna Steinkuhler to Lyle Haack. Mr. Haack received his master's degree in chemical engineering from the university and is a member of Sigma Tau, honorary engineering fraternity.

MISS VIOLET HUCKERT, who has attended the university, was married Sunday to Lewis F. Evans.

HONORING MRS. H. M. LE- Sourd of Boston, national sponsor of Kappa Phi, active and alumnae members of the sorority met for

a picnic supper Monday evening at the home of Miss Luvicy Hill. The evening was spent informally.

ANNOUNCEMENT HAS BEEN made of the engagement of Ruth Johnson to William H. Hammond, of Pittsburgh, Pa. Both Miss Johnson and Mr. Hammond are graduates of the university where she is a member of Alpha Chi Omega and Delta Omicron and he is a member of Sigma Tau.

WITH THE WEDDING SET TO take place in the near future, the engagement of Margaret Leonard to Jack Raynor Beard was announced Sunday. Both are university graduates and Miss Leonard belongs to Alpha Xi Delta, while Mr. Beard is a member of Theta Chi.

MUSIC DIRECTOR FROWNS ON LACK OF APPRECIATION

By ALLENE TROWBRIDGE.

I had gotten up very early that morning and I felt fine. The world seemed to smile at me as I walked slowly down the street. Many boys and girls passed me as they hurried to reach the chorus rehearsal on time. They all seemed so happy, as they entered the Temple theater, that I was tempted to follow them. After spending some fifteen minutes in thought, I finally reached a decision. I entered the building and walked boldly into the room where Mr. Howerton was teaching various pupils of the all-state high school music course to sing.

When I entered the room there was a low humming going on that sounded like a swarm of bees. It really pleased me so very much that I sat down to listen. I was almost asleep when suddenly, without a word of warning, they all began to shriek, "Out of the darkness flash me a song!" As though it wasn't bad enough to hear all of that noise, Mr. Howerton was stamping his feet and shouting instructions at them while the piano was fairly rocking as it was being played.

Then they stopped as quickly as they had begun. The director began to help the tenor section learn their parts as I moved up closer that I might hear better. The boys saw me then and laughed at me. This made Mr. Howerton very angry and he bawled them out for not paying attention. I decided right then that I was not wanted. Gathering up all my dignity, arching my eyebrows alluringly, and with my head thrown back I marched across the stage in a very stately manner. But to my dismay everyone laughed this time—even the director.

Even if I am only a tiny black and white kitten, I refuse ever to enter that building again, because there I am looked upon as a common alley cat with no appreciation for the finer arts.

"One of the beauties of this university (Wisconsin) is that you can raise a big fuss here and nobody is greatly disturbed by it. This university is known thruout the world as a place where something is boiling over all the time." Prof. John D. Hicks of the University of Wisconsin lets off steam to mothers and dads visiting the campus for parents' week end.

CAMPUS WORLD

Dr. G. W. Rosenlof, professor of secondary education, has been invited to speak before a session of the Kansas State Teachers Association meeting in Dodge City and Hays, Kas., this fall. He has also been invited to speak before teachers of North Dakota at the annual conference of the group. Dr. Rosenlof will address the Saline county teachers of Kansas Aug. 23 to 27 and on Aug. 28 will deliver two addresses before teachers of Dodge county at Fremont. Sept. 3 he will lecture before a meeting of Platte county teachers at Columbus.

In a letter to Miss Mamie Meredith of the department of English, Dorothy Luchsinger, former Lincoln girl who graduated from here in 1933, says she has accepted an assistantship at Cornell university. She will study there for her master's degree in home economics and administrative work, a field in which she has been interested since leaving Nebraska. After her graduation here she attended Mills college in California, from which institution she has a leave of absence next year. While in the university, Miss Luchsinger was prominent on the agricultural college campus and took an active part in the programs of Farmers Fair.

Dr. Earl H. Bell, assistant professor of anthropology, who is in charge of a large field party in northeastern Nebraska, reports that the summer's archaeological work is progressing satisfactorily. For the present his headquarters are in the old CCC camp at Niobrara.

"The Michopaleontology of the Niobrara Formation in Kansas, Nebraska, and South Dakota," is the title of a new bulletin by Gerald J. Loetterle, assistant paleontologist for the Nebraska geological survey.

R. R. Bennett, formerly one of the hydrologists for the Nebraska geological survey, has accepted a civil service appointment with the United States geological survey. Bennett's headquarters will be at Austin, Tex. His job here was to chart seasonal water measurements of test wells throughout Nebraska.

MANY TEACHERS ARE FINDING POSITIONS

The following 70 teacher placements were reported to the University of Nebraska teacher placement bureau:

- Georgia Sitzer, Alvo.
- Emory Shriver, Columbus.
- Irma Flickinger, Halsey.
- Evelyn Wells, Edison.
- Katherine Christensen, Norfolk.
- Lillian Lindahl, Lincoln.
- Norman Hillier, Omaha.
- Ruth Nebel, Mullen.
- Estelle Bredthauer, Scotia.
- Marguerite Harman, Greenwood.
- Bernese Ault, Evanston.
- Emma Vanatta, Hickman.
- Grace Hess, Craig.
- Jane Vansickle, Lincoln.
- Margaret Hufnagle, Beatrice.
- Lynia Robert, Belgrade.
- Beth Schmid, Falmouth.
- Carol Wilder, Hickman.
- Ruth M. Johnson, Banet.
- Kathleen Hassler, Scotia.
- Ester Schoenleber, Ord.
- Kathryn Young, Weldon, Ia.
- Paul Polmantier, Omaha.
- Ray Ryerson, Loveland, Colo.
- Paul Witt, Mowile, Ia.
- Wilbur Olson, Mullen.
- Ernest Gorr, Bridgeport.
- J. C. Reeves, Omaha.
- Voris Peden, Lewiston.
- Valecia Davis, Allen.
- Harriet R. Martin, Holmsville.
- Lorne Simons, Pleasanton.
- Lenore Birney, Alliance.
- Marian Borkenhagen, Coin, Ia.
- Ingram Clark, Cairo.
- Helea Steffensmeyer, Harrison.
- Richard Fischer, Red Cloud.
- Helen Kropf, Red Cloud.
- Helen Marry, Red Cloud.
- Ray Eouall, Red Cloud.
- Margaret Phillippe, Unadilla.
- Rosalie Farley, Walthill.
- Helen Lutz, Grant.
- Harriet Dunlap, North Platte.
- Golda Bauer, Waverly.
- Ethel Sievers, Silver Creek.
- Eltzabeth Gross, Lincoln.
- Ruth Lambert, Mary.
- Sylvia Korbel, Plattsmouth.
- Betty R. Lindholm, Unoin.
- Luree Barrett, Rosalie.
- Beryl Rice, Waukegon, Ill.
- Marie Baeder, Eagle.
- Ruth Thomson, Hornick, Ia.
- Mary Alice Willman, Springview.
- Marguerite Hollenbeck, North Platte.
- Edith Meierhoff, Alliance.
- Edwin Melby, Wahoo.
- A. G. Spohnheimer, Genoa.
- Twila Blocka, Burke, So. Dak.
- V. R. Wilcox, Agenda, Kas.
- Betty Long, Lewiston.
- Dorothy Farmer, Callaway.
- Pauline Lee, Pleasant Dale.
- Carl Grill, O'Neill.
- Dora Wood, Newman Grove.
- Ruth Brownson, Ashland.
- Eva Nelson, Howarden, Ia.
- Velma Bernholtz, Kearney.
- Ruth Pyle, Ashland.

REED WARNS OIL WELLS NO SURE THING THO POSSIBLE

(Continued from Page 1.)

operation are now declining, while consumption is on the increase. In the third place, because of the prorating program in the oil producing states, the investment in the drilling of a well may not be returned to the operator for a considerable period of time. And last but not least, Nebraska is offering a prize of \$15,000 to the company or individual who makes the first discovery of oil. There is an equal amount offered for the first discovery of gas.

Under the provisions of the state law, Reed and his assistants in the conservation and survey division, under the direction of Dr. G. E. Condra, are authorized to receive, examine, and file the logs and drill cuttings of all the wells drilled in the state. Considerable time is spent in studying the rock samples from each drilling and regular reports are made to operators. The same law also serves to protect the investor, since it is practically impossible for an operator to make unfounded claims as long as university scientists are on the examining end.

"There is a general feeling over the state that a good many wells have been drilled which were capable of producing oil but which were plugged for the personal gain of the operator," Reed stated. "Cases of this kind are practically non-existent. In the first place, a good showing of oil is an extremely difficult thing to hide, since drillings are closely scouted by other companies."

Reed pointed out that wells are now being drilled north of Harrison in Sioux county; northwest of Chadron in Dawes county; north of North Platte in Lincoln county; south of Creston in Platte county; northwest of Homer in Dakota county; south of Reynolds in Jefferson county; and southeast of Dubois and south of Dawson in Richardson county.

Wells Over Mile Deep.

If all the oil and gas test wells recorded by the university were placed end for end they would reach a depth of 122,276 feet, or an average depth of 2,028 feet. According to Reed's data, the deepest of these is located near Harrisburg in Banner county. This well was drilled to a depth of 5,697 feet. The well near Holdrege nearly equalled it in depth with a distance of 5,678 feet. Including the relatively deep wells drilled for water or in prospecting for coal the number of wells which have served as tests for oil and gas in the state approximates 100. Thus, says Reed, prospecting for oil is hazardous. The investor should be sure that his operator is well qualified to make a complete test and that the financing has all been taken care of. He should be equally certain that scientific methods are used in making a location. Figures indicate that only one test well in a hundred is a producer. The odds in Nebraska may be even greater than 100 to one.

"The depth to which it is necessary to drill to make a complete test depends upon the geologic formation," Reed explained. "A well 565 feet deep near DuBois was a

complete test while Nebraska's deepest well, nearly 6,000 feet in depth, lacked 2,000 feet or more of being a complete test of all possibilities.

"A large percentage of Nebraska is covered by a thick layer of mantle rock and it is not possible to determine the lower geologic formations from a study of the surface materials. Seismograph surveys are the best adapted to this region but they are expensive. 'Doodlebug' methods which pretend to predict the presence of oil are unreliable. 'Creekology,' another favorite means of locating a well, is based upon the assumption that the meanderings of a creek or riverbed reflect the sub-surface structure. This also is an unscientific and unreliable procedure.

"The conservation and survey division of the university is interested in discovery of oil and gas within the state. And because of its sincere interest the department does not unduly encourage or discourage reliable and honest endeavors to discover oil. We do believe, however, that development should be such that investors are fully aware of their chances for success," Reed stated.

'Merchant of Venice' Set for July 28, 29

(Continued from Page 1.)

school musicians were guests of the department on Wednesday evening, and from the spontaneous response they gave, found the play much to their liking. "The Merchant of Venice" is of equal interest to high school teachers and students since the play is an important part of most English literature courses.

A small admission charge will again be made for this production, since expenses, even in a summer theater, count up. There will be no reserve seats, nowever.

"Tuesday Evenings" Changed.

With an extra production of "The Merchant of Venice" scheduled for the last week in July, a change in program on the "Tuesday Evenings" sponsored by the department of speech has been necessary. Two dramatic recitals have been scheduled for July 13 and July 20th in place of the experimental bill of one-act plays. The shorter plays will be presented at the departmental farewell party on August 3rd.

Because of the overflow crowd at the first program, the main theater in the Temple building has been booked, assuring ample room for all who wish to come. The programs begin promptly at 7:15, run for an hour and a quarter. No admission is charged for these student offerings and with the added seating space an even more cordial invitation has been extended by the summer staff of the department of speech.
