Dorothy Van Patton has started beinging her lunch to school to eat tree, that is if she can find one on the campus. And then Ruth Thygeson may be found at her daily tryst with a certain D. U. who studies (?) with her on a bench near U hall. Who would think it just to look at him, but Bob Gannon is an accomplished tightrope walker and gets in most of his practice on a railing just outside the Cornhusker. But may be you would understand his athletic bent if you'd seen him at the Beta buffet supper last Sunday being carried around on tiny Jean Newell's back.

Grant Thomas is already pienic floor minded. Ask Ginny Anderson about it. When he called for her Friday night, instead of going straight to the Cornhusker for the Alpha Sig party, he headed for Penn woods, On the way out there seemed to be a bit of dissention in the ranks. Ginny didn't relish the idea of a romp in the woods attired in a new spring formal. So they compromised, Grant promised to be civilized and go to the formal if the grass didn't measure two hands high. More trouble followed when the measuring began, because according to Ginny's two hands, a picme was in order, while

Library Presents Display Of Ancient, Modern Volume Styles.

Smartly clad in fashions of good taste, the "Best Liressed Books" of used until it declined after fourth 1937 are well represented in the mal

but for "sound design and work-manship." This year the half-hun-dred were chosen from 600 entries, and the university library has bought 16 of the winners.

The volumes had to be excellent in their "artistic conception and cohesion of the whole." Outstanding among those exhibited are John James Audubon's "Birds of America," and "The United States, a Graphic History," a book for the masses which presents historical facts and figures in picture charts. A riot of color is "The Kochinas Are Coming," a collection of Pueblo Indian folk tales by G. M.

Past and Present.

"What Books Are Made Of" or "From Then Till Now" is the story told by the display in the case on second floor of the library. Age old copies of odd looking sheafs of odd materials, which odd materials, which pass for books are laid open in the case.

Rocks were the first books; earliest records were founds on the walls of caves. Later came the Babylonian clay tablet and the Assyrian six-sided clay prism. Papyrus, which made

made the Egyptian books was manufactured from the pith of a water plant which grew lush in the water of the Nile. The government had a monopoly on it; different areas were farmed out to individuals for cultivation

When the papyrus sheets were made, by making layers of the inner stalks and pressing them to pulp, they were fastened together in a roll 32 to 35 feet long.

Books on palm-leaf strips were used in India, Burma and Siam. The leaves were "bound" by being strung on a cord, like so many slats of a Venitian blind. Some of the books reached 150 pages.

Parchment or vellum. century, was produced from aniskins, usually eattle, and display case on the library's main books made of it represents long and tedious hours of illuminating Chosen each year by the American Institute of Graphic Arts, 50 per was invented in China in the books are selected not for novelty second century and traversed the world, reaching Philadelphia in 1690.

The exhibit is the second of a series on the evolution of the book the remaining displays in order being "Form of the Book" and "Writing Implements."
