

Red Guidon.
There will be a meeting of the Red Guidon association Wednesday, May 4, at 7:30 p. m., in the Motor Transport Laboratory. Maj. Wood will speak. Members are urged to attend.

**CAMPUS PEP GROUP
PLEDGES 26 WOMEN**

Tassels Rush Coed Rooters in Outdoor Ceremony Tuesday Night.

Twenty-six new members were pledged into Tassels, girls pep organization, at an out-of-door ceremony following the annual Tassel picnic at Irvingdale park last night.

The pledging service was held on the hillside during which time the president of the group, Virginia Nolte, welcomed the new girls into the pep club and the outgoing presiding officer, Martha Morrow, introducing the alumni sponsor, Jean Wall, and the faculty advisor, Dr. Edna Schrick. Both of the sponsors are former members of Tassels.

Pledge Twenty-six.

The twenty-six girls pledged into the organization are as follows: Mildred Bowder, Ruth Ann Sheldon, Betty McKinney, Gweneth Orr, Prindilla Chain, Dixie Davis, Jean Hooper, Ann Husted, Margaret Krause, Sarah Smeerin, Mary Ellen Osburn, Opal Hedlund, Morrow, introducing the alumni Eleanor Spragg, Helen Amee, Charolotte UH, Janet Harris, Betty Pierce, Victoria Ekblad, Jane DeLateur, Marian Miller, Lucille Thomas, Jean Parkinson, Frances Vaughn, and Ella Marshall.

**Public to Inspect
Geology Exhibits
at Annual Review**

Department Shows Mining, Vertebrate Projects Thursday Night.

In collaboration with the Engineers and Pharmacy students the Geologists of the university are holding open house on Thursday, May 5, at 7:30 o'clock. The complete Geology Department will be on display with many interesting and educational things to be observed.

This display includes a miniature oil field and various mineral show cases. This miniature oil field contains the equipment that would be found in any large oil field in either Kansas or Oklahoma. Methods of drilling, capping and refining are all included in this display. The mineral show case shows the various types of gold found in the natural state. There is also a large diamond display showing all diamonds from the poorest to the finest grade.

Fossil Work Room.

The large work room of the Museum will also be open to the public. Within this room will be found the equipment that is used to reconstruct the fossils after they have been sent in from the fossil fields. This will give the public an opportunity to see and study the animals that formerly

roamed the plains of Nebraska. Another interesting part includes the invertebrate display, where various small animals such as clams, mollusks are shown. These small animals are found in different strata and are used to tell the age of the formation. Microscopes have also been fitted out with lenses containing microscopic invertebrates to be used by spectators if they so desire.

Microscopic Exhibits.

The study of minerals too small to be seen by the naked eye has been placed at the public's disposal. Polarized light is used to identify these minerals. The amount of refraction of the light determines the type of mineral. The Fluorescent mineral display is believed by geologists to be well worth the trip to Morrill Hall. This is a display where minerals that are dull and drab under the sun or under electric lights are brought to a dazzling degree of brilliance when subjected to the light rays emitted from a mercury lamp.

The practical part of the department will also be on display with many maps that indicate the methods used by geologists to locate oil fields and rock formations. The All Geology Field Day will be held on this day.

**Music Will Figure
In Student Union's
Cultural Programs**

Although there are as yet no definite plans for musical activity in the Student Union building, a large place on the Union program will be given to music if the students desire it, according to Miss Marion Steel, social director.

Initiative in regard to music will be left to student committees with suggestions and encouragement from the directors, Miss Steel indicated.

I'm Still Alive, by Grace, receives the homing books.

During this period, all fines are removed, and persons returning books to the library will be spared the embarrassment of questioning. Citizens who complain about the high taxes or rave about politics in government may prove their sincerity by returning any books which some little bird has accidentally placed in their homes.

It is reported that when Boston sponsored a similar drive that so many books were returned in the first three days that four special policemen had to be hired to hold back the crowds.

Odds and Ends in the World of Books:

Hervey Allen's book—Action at Aquila is rapidly challenging The Citadel for first place honors in the fiction best seller race. . . . Thurman Arnold, who has recently been a right hand man for the president, has been praised considerably by his critics for his book, The Folklore of Capitalism. The book is well up on the non-fiction best seller list. . . . One of the biggest surprises on the best seller list is the huge sales of Einstein's The Evolution of Physics. . . . For group non-fiction greatest circulation in the libraries, the muckraking books on medicines, drugs, cosmetics, and other highly advertised products still rank first.

Among the more popular of this type is 100,000,000 Guinea Pigs, or is he a savior? Henry Wolfe in The Octopus of Europe says that Hitler is definitely mad.

Dozens of books were coming home to roost after disappearing in a most mysterious fashion. During this week, the city library is sponsoring a book campaign to recover the 5,000 odd books which have been "lost, strayed, or stolen" from that institution in the last three years. A huge book at the entrance of the library entitled

What with civilization growing more deadly all the time, if you have any desire to die a natural death, you'd better take an option on a cave.

Women claim this is a man's world, but everywhere we go it seems to be terribly cluttered up with woman.

**BARB INTERCLUB COUNCIL
ENDORSES FINGERPRINTING**

Unaffiliates Support Move to Register Students at Police Office.

The Barb Interclub Council, in its regular meeting Monday night, went on record as supporting the move to have all students fingerprinted as a means of civil identification. This fingerprinting would be entirely voluntary, and would be used only for civil purposes.

The move has been introduced on this campus by Alpha Phi Omega, service fraternity, and the actual work will be done by members of the police department. May 11 to 14 has been tentatively set as the time for having this identification recorded. Ag campus will have its opportunity May 18. No charge is made for this service.

**Music Group to Hold
Union Luncheon Meet
Saturday Afternoon**

Delta Omicron, music sorority, will give the first sorority luncheon in the new Student Union building Saturday.

Helen Johnson, president of the sorority, is in charge of the program and Geraldine Krause is in charge of the decorations. The program will be presented by members of the sorority.

FARMER'S FAIR.

Ag students will gather for a Farmer's Fair rally at 12:45 o'clock this afternoon in Ag hall.

Farmer's Fair committees which will meet this week are: Home furnishing committee, 7 o'clock tonight in the Home Ec parlors; Mid Way committee, 5 o'clock tonight in 303 Ag hall; and Ticket committee, 8 o'clock Friday morning in 302 Ag hall.

**R. O. T. C. BATTALIONS
PREPARE FOR REVIEW**

Col. Duesenbury to Hold Federal Inspection on May 18.

Col. Oury and his R. O. T. C. staff will stress special training in the cadet corps in the next two weeks in preparation for federal inspection May 18. According to the Colonel, the new inspector, Col. Duesenbury, is a "very close marker."

The Cadet Corps parade held Tuesday afternoon was designed to prepare the battalions for the parade and review requirements of federal inspection. Said Col. Oury concerning the parade, "It isn't for fun; it's for instruction."

Concentration Necessary.

Altho the local R. O. T. C. unit has received an excellent rating every year under Col. Oury, the commandant expressed doubt that the high mark would be retained. He declared that a good deal of concentrated effort was necessary. Three ordinance inspectors from corps area headquarters are here for the week, checking every rifle,

**ALL UNIVERSITY GLASSES
TO DISMISS FOR IVY DAY**

All University classes will be dismissed on Thursday, Ivy Day.

Classes held on the College of Agriculture Campus will be dismissed on Friday and Saturday in addition to Ivy Day.

Classes under the direct control of the Engineering, Law and Pharmacy Colleges will be dismissed after 11:00 o'clock on Friday.

Pre-med students of sophomores junior or senior standing are excused from classes on Saturday to attend pre-med activities at the College of Medicine in Omaha.

pistol, and artillery piece. "Every screw, nut, and bolt" will be examined for rust, said Col. Oury. He indicated that administrative inspection would be sometime this week.

"Rebel Wedge Splits Spain." Well the country has been pretty well broken up into small pieces by the war.

Wait a minute; try this line on your reasoning faculties: "Einstein says reality begins where matter ends."
