

**SAUER COACHES COACHES!**  
Former Husker Grid Star  
Tutors Sports Class.

George Sauer, former Husker grid star, now coach at New Hampshire university, is instructing a coaching class during the summer session in the fundamentals of football. Meeting from 9 to 10 each morning, the class is designed to review the major sports for its members to prepare them for coaching positions.

The first four weeks will be spent with football, and then two weeks will be spent on basketball coupled with track sessions in the afternoon. Assisting Sauer with football is Burry Shire, who will play with the professional Green Packers team next year.

**Workers Bring  
To Light Bones  
Of Large Camel**

What is probably the world's largest camel seems destined to take form and shape this summer as Nebraska museum workers who began work this week concentrate their efforts upon the Broadwater site where last fall the first bones were discovered. To date an excellent skull which measures more than a yard in length, a massive jaw bone, several bulky vertebrae and an assortment of leg bones have been recovered. Thruout the winter miscellaneous pieces have been sent in to Lincoln by S. R. Sweet, T. C. Middleswart and W. F. Chaloupka, of Bridgeport.

Aided for the first time by a WPA consignment, student workers will have opportunity to spend more time on the difficult task of removing fragile bones.

**RUNNERS GO TO MINNESOTA**  
Squad Will Enter Collegiates  
Today, Saturday.

Six members of Nebraska's track squad will race in the national collegiates at Minneapolis today and tomorrow.

Those entering the meet are Harwin Dawson, Big Six broad jump champion, who will also compete in the 220; Eldon Frank, who took both hurdle events in the conference; Ray Baxter, high jump; Bob Simmons, 440 champion; Bob Mills, shot and discus and Wilson Andrews, distance runner.

**COLISEUM POOL OPENS  
TO WOMEN SWIMMERS**

Free Periods Set at 4:00  
During Week, 1:30-3:00  
On Saturdays.

All girls registered in summer school will have the opportunity of a daily swim in the coliseum pool, according to plans revealed by the physical education department.

The pool will be opened to them from 4 to 5 o'clock Monday through Friday each week, and from 1:30 to 3:00 on Saturday. A charge of ten cents per girl will include a sterilized swimming suit and a clean towel for each swimmer. In addition all girls must furnish their own bathing caps and shoes. The latter need not be worn in the water but they must be worn up to the time girls enter the pool, according to Miss Danielson, assistant instructor of physical education.

No girl will be allowed to swim until she has obtained a health permit from the student health office in Pharmacy hall. These permits will be given free to all summer students and must be kept and presented each time the holders desire to swim.

A series of mixed "splash parties," swimming affairs open to both men and girls, is planned for the near future.

**PETZ SCHEDULES FREE  
SWIM HOURS FOR MEN**

Intramural Director Urges  
Big Turn-Out to Retain  
Pool Periods.

Free swimming in the coliseum pool is to be offered all men registered in the summer session. Hours are from 12 to 2 p. m. and 5 to 6 p. m. Monday thru Friday, and 3:30 to 6 o'clock every Saturday afternoon.

Health permits, available without charge at the student health office in Pharmacy hall, must be shown by men each day before entering the pool. Harold Petz, director of intramural athletics, stated that he hopes to see a large number of men take advantage of these swimming hours; otherwise they will be discontinued. Howard Koeneke is acting as life guard, and the university will not consider it worth while to retain him unless there are at least eight or ten swimmers at each period.

A swimming class for adult beginners meets from 11 to 12 daily. The threefold purpose of this class is to teach all to swim, to give the members acceptable methods for teaching others, and to carry them as far as they care to go toward earning a Red Cross certificate.

True Chappell, former student with Herbert Schmidt and Bettie Zabriskie, and now a student at the Curtis Institute of Music, has returned to Lincoln for the summer.

**MEN'S SOFTBALL PLAY  
ORGANIZED EACH NIGHT**

Equipment Provided at 6:30  
South of Teachers'  
College Hall.

Tonight at 6:30, and continuing thruout the summer session, softball equipment will be available for all who wish to play on the Teachers college diamond, directly south of the building. A member of the physical education department will assist in organization of teams to play a regular schedule.

It will not be necessary, however, for men to belong to regular teams to take part in this activity. If students merely wish to organize a game of workup, play catch, or use the equipment in some informal manner, there will be no restrictions. All equipment will be placed on the field each evening, and need not be checked out by individuals.

**SCHULTZ IN NEW MEXICO;  
TO LEAVE FOR NEBRASKA**

Assistant Museum Director  
Visits Guadalup Caves  
Near Carlsbad.

C. Bertrand Schultz, assistant director of the museum, who is now at Carlsbad, N. M., with Mrs. Schultz, Harry Tourtelot, Scott-bluff, and Robert Kubicek of Crete, will leave the party this week end to go to his headquarters at Bridgeport, Neb., where he will direct all museum parties in the western part of the state.

Mr. Schultz, together with Tourtelot, Kubicek and R. M. Burnet, director of the Carlsbad museum, has been exploring the caves of the Guadalup mountains, which are noted for their valuable deposits of Pleistocene animals and their association with early man. Burnet is given credit for the discovery of the famous new caverns in the mountains. He has been co-operating with Nebraska scientists in carrying on the work in the cave region begun by the Philadelphia Academy of Sciences in 1928. Schultz remained at the Carlsbad site six weeks last summer and uncovered a large amount of Pleistocene material.
