Faculty Hears New Chancellor Innocents Stage

State 'No' to Chicago Plan

University Family Pays Social Workers Official Welcome

Chancellor C, S, Boucher served notice on the University faculty last night that he entertained no desires to "force" the University of Chicago educational program upon Nebraska. A dinner and reception at the Student Union afforded Chancellor and Mrs. Boucher their first official opportunity to meet the faculty.

In answering the un-asked ques-ons of the faculty regarding his stand on the Chicago plan which he aided in framing, Dr. Boucher cited two reasons for not considering its adoption.

No Mystic Formulae.

"First, no educational program can be successfully administrated in any institution until and unless the group most vitally concerned with instruction—the faculty—is, in clear majority, in sympathy with the program as a result of a conviction of its soundness.

Second, there are no panaceas or mystic formulae in education except among quacks, and merely because one program may be administered successfully by one fac-ulty with their particular student body, is no guaranty that the same program is the appropriate one for nother faculty with another student body in quite a different environment

To be wary of dogmatism means merely realization that when we make a decision on educational policy that seems right in the light of current conditions and available evidence, it is almost certain not to be right for all time to come This means that the argument that merely because certain things have been done in the past, or have been done in a certain manner, they should continue to be done, and be done in this manner, is per se not a valid argument.

My wariness of dogmatism has come from actually seeing the atational results that many perwhose judgment I had learned to respect, pronounced impossible of attainment; and what more, these results were at-
