## Architect's Eye-View of Athletic Field Entrance

The finishing of construction of the reviewing stand entrance on 12th st. north of the campus at the first of the year will mark the virtual completion of the entire north side improvement project.

Located on a slope, the structure will overlook a ten acre area north of the stadium and the coliseum which has been cleared of

all buildings, leveled, sowed with grass, and fenced, preparatory to marking off for various practice fields.

Twenty-four monolithic granite pillars which were donated to the university several years ago when the old Burlington station of Omaha was torn down will be formed in a double row backed by evergreen trees along 12th st. at approximately Vine st. When

viewed from the north, it will appear as two sets of wide stairs descending to the playing fields and a 28 foot by 50 foot stand, suitable for such campus events as football rallies and parades.

A federal grant and money supplied by the university athletic department is financing the entire project, without the aid of any state tax money.
