

# Mingling with Marg

More muddy feet and snowballs, same old stuff...with zest seeming to be at a new low this week—even a small crowd at the tea dance...must be the after-taste-of-spring letdown...but suffering no such let-down is Peggy Sherburn, for even though she now calls Rex Brown, AGR, a has-been steady, she gets along without him very well...and a candy passing we neglected to tell you about was that of Kappa Delta Marion Stone, and cigars to the Kappa Sigs from Don Siemson...and at the tea dance crowd we noticed lots of the usual stags, such as that all-around-mighty-fine fellow, George Kirk, ATO; Beta Dick DeBrown; ZBT Paul Krasne with a new "A little shorter, please" haircut; Rah-Rah Gene Richardson, Sigma Nu; DU Heavy Day; and Fred Koch... among some of the going together often couples were Sigma Chi Don Hartman and Tri Delta Alice Blackstone, who go steady, and Sigma Nu Len Dirks, who has played around all these years but finally decided that Pi Phi Petie Horner was just about "it"...and believe it if you will, Gamma Phi

Marion Bradstreet was there without the usual escort, Bill Buchanan, Sig Alph...a new steady deal which happened just like that is now between Farm House Tom King and Carol Briggs, who had all of two dates together before making the great decision...and picking up with rapid velocity is the affair of Eldridge Bever and Marjorie Sweeney, who last week end called it two in a row...and with romance as the campus knows it at a seeming new low, bridge has become the past-time of the mob, and the card-room at the Union is full to overflowing almost any time of day... in yesterday's column we should have said that Kappa Lulubel Emerson was wearing the Phi Alpha Delta pin of Tom Pansing...

Sigma Alpha Mu wishes to announce the initiation of Homer Labovitz of Lincoln.

PI KA announces as its new officers Frank Lawlor, president; Darrel Peters, vice president; Robert Kemp, secretary; Kenneth Simmons, treasurer; Will Simmons, social chairman.

### Aids discovery of positron.

Until Dr. Anderson's discovery all electrons apparently moved in the same curved path, but his experiments proved that some particles, with life of not more than one billionth of a second, moved in the opposite direction, which led to the discovery of the positron or positive electron.

Anderson and his assistants recently built equipment which will measure charged particle energies up to a thousand million electron volts. After exhaustive study and research with this sensitive ma-

"The type of pieces desired are ballads, such as might be used by the Ritz brothers or Yacht club boys," Edelstein explained. Those interested in learning subjects for lyric writing or in learning moods as aids in composing tunes, may secure information or scripts at the Kosmet Klub office.

Ticket sales are swelling thru Kosmet Klub workers and a stand at Magees. Reservations are to be made at the Temple box office during the week preceding the show.

## Coeds, you can't miss after you read this—men, beware!

Dateless week-ends delight no girl, particularly when their not so attractive sorority sisters sport full datebooks, or run around the house bubbling over about corages that just came.

Far more helpful to the man hunter is a knowledge of how to find an intriguing conversational topic and a few tricks of the trade than complete equipment for the chase, such as a perfect torso and a pretty pan or a million bucks and a convertible coupe.

Sometimes it is not a habit she needs to acquire, but one she needs to lose, that is her nemesis. It may be something as trivial as the way she giggles, or her posture—the way she walks or sits. Praise the gym teachers who can convince girls what an essential part of beauty correct posture is.

### Mystery is effective.

Time honored but not worn out—is in fact more effective than ever—is the old maxim of being mysterious...keeping her escort wondering what she's going to spring next, in habits as well as clothing. The old good-night kiss isn't nearly so sacred when it's as sure to come as next semester's fees, and her favorite color isn't quite so effective worn every day.

And lines. Lines are almost universally condemned at public lectures by self styled "love experts," most of whom look like they never heard one. But for boys who don't take them too seriously, or use similar artifices themselves, nothing can beat a good line, even if just in self defense.

### Don't talk of other dates.

How in the name of cupid some girls (or boys if you want to go into it) can continue date after date to talk of past dates or former

sweethearts after so many denunciations of these tactics by both sexes, is beyond belief. Regardless of how interested your companion may try to appear about your previous loves, if he cares a "taker's don't-say-it about you, you an bet your last hairpin that he is rapidly becoming disgusted.

It seems to be pretty generally conceded that the best way to woo a man is to get him to talk about himself. Ask questions, and don't be small about them. Plunge right in with "What would you rather do more than anything else in the world?" or "What do you do when all your studies are finished and you have no work to do?" or "Do you approve of Hell week?" If these don't make interesting conversations, they will lead to something that will.

### Sit and talk—it's nice.

Most important and most momentous: Don't jump at every offer to go to the movies or a dance. Accept some, and other times respond "Let's just go for a walk." (Substitute "drive," "listen to the radio," "play pong-pong" or "tennis.") Or just say "There's nothing I'd rather do than just sit here and talk to you." Do these and your escort will worship the very dollars you keep in his pocket, and you too.

Lastly, remember that men love to be gallant, and if the opportunity to be so doesn't arise, be charitable and help gallantry along a little. Don't hop too ably in and out of rumble seats. Let your date open doors. Take his arm going across rough spots. Be mildly and lovingly frightened of his fast driving, thunder-storms and roller-coasters. Don't carry this article where he can see it.

## Rush cards ready morning of May 6

### Schramm asks races for rushees cease

## Communism--

Continued from Page 1 him with foreign "isms" in his school. Along the same line the current poll discovered that many students did not know the differences between communism and fascism.

More "no opinions" than usual (which are not included in final tabulations) were registered on the fascism-or-communism question. A student at the central Y. M. C. A. college in Chicago said, "As long as there is a choice between life and death, I won't have to make a choice between fascism or communism."

In Wooster college in Ohio a student who claimed socialism as his political affiliation favored communism, saying, "Fascism is its own goal—dictatorship. Com-

munist is a pathway to socialism and better living."

Choosing fascism was a University of Texas student who declared that he "would rather work for the state than share the results of my labor with some one else."
