

**Education--**

(Continued from Page 6.)  
 before huge appropriations are made for education whether the money is being spent to the best interest of the people. Perhaps it would be wiser for the state of Nebraska to spend a million dollars on the rehabilitation of farms than to spend an additional million dollars on the state university. The needs of agriculture and of industry are also great in the present era. Although additional expenditures for education might indirectly improve agricultural and industrial conditions in the future, the immediate needs of these two important fields of life are so great that the state dare not ignore them. Worn out fields and broken down factories are no boon to the college graduate. Would not youth prefer to inherit a prosperous state and nation rather than to possess an AB?  
**Education can perform functions.**  
 Education has the ability to show that it can, despite limited financial resources, perform its functions well. It seems right that education should share with other important functions and not excuse itself for proper functioning with the cry of limited means.

**They're healthy at Iowa State!**

AMES, Ia., Nov. 18.—A higher percentage of students have passed physical requirements of United States Air Corps examinations at Iowa State college than at any other college visited by the Air Corps Examining board, Lt. Whitnell T. Rison said here yesterday.  
 Out of 110 students applying for appointments as flying cadets, between 20 and 25 have passed physical requirements.  
 Iowa State college candidates did not have much difficulty with eye tests—usually the biggest pitfall in such examinations. Capt. Henry C. Chenault of the medical corps attributed this unusual eye strength to the heavy diet of milk and eggs that midwest youths follow.  
 Appointees from this area will go to the army field at Lincoln, Neb., for a three months training period and will then be transferred to Randolph flying field in Texas. Most appointees will begin training next summer, but appointments may be deferred until the completion of college work.

**Deck tennis victors are announced**

Winners of the fifth round deck tennis tournament are as follows: Chi Omega, Ferguson, Hillman; over Gamma Phi, Yorkman, McKee. Delta Gamma, Wallace, Lou; over Delta Delta Delta, Mickey, Deurmyer. Independent, Pope, Kinker; over Delta Gamma, Talbot, Koehler. Alpha Phi, Goodrich, Halligan; over Raymond Hall, Sternberg, Galbraith. Wilson Hall drew a bye.

**Miller writes article on Venezuelan oil**

Willard Miller, personal assistant to the chairman of the geography department of Ohio university, is the author of an article "The relationship of structure to petroleum production in eastern Venezuela" which appeared in the August issue of *Economic Geology*. Mr. Miller was a graduate assistant in the university's geography department before going to Ohio.

**Pool has article in Botany bulletin**

Dr. R. J. Pool, chairman of the department of botany, has an article in the October number of the *Bulletin of the Torrey Botanical Club*, entitled "Some Reactions of the Vegetation in the Cities and Towns of Nebraska to the Great Drought." This is the paper which Dr. Pool read before the Ecological Society of America at its last annual meeting at Richmond, Virginia.

There's  
**No Great Mystery**  
 about Cigarette Tobaccos

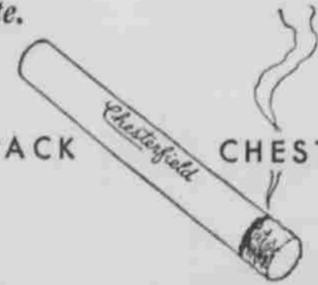

THERE ARE FOUR TYPES of tobaccos found in the more popular cigarettes, namely... *Bright, Maryland, Burley and Turkish.*

ALL THESE TOBACCOS except Turkish (which is bought direct from the planters in Turkey and Greece) and Maryland (which is bought through sealed bids under government supervision) are bought at public auction, just like any other auction where you might have bought in a table or a chair.

AT THE AUCTION SALE the tobacco is piled in baskets weighing from about 100 to 500 pounds and each purchaser buys all of his tobaccos by competitive bidding for the particular piles he wants.

THE CHESTERFIELD BUYERS buy the best of these mild ripe tobaccos for the Chesterfield blend. And it is *Chesterfield's Combination*... the right amounts of Burley and Bright... just enough Maryland... and just enough Turkish—that makes the big difference between Chesterfield and other cigarettes.

IT IS BECAUSE of this combination that Chesterfields are COOLER, have a BETTER TASTE and are DEFINITELY MILD. They are made of the world's best cigarette tobaccos. You can't buy a better cigarette.
