

University to prevent nepotism

Dean Oldfather named acting chairman political science department

Under a new university policy taking effect immediately, the not retroactive, not more than one member of a family may be employed by the university in any temporary or permanent capacity, according to the Board of Regents decision made Saturday.

"Members of a family," according to the rule, "shall be interpreted as including relatives of the fourth degree—uncles and aunts—or closer, including relatives of the same degrees resulting from marriage or adoption."

However, "employment of two members of the same family by the University of Nebraska shall not be regarded as violating the spirit of the regulation if the following is true: that either member is in the university primarily in the capacity of a student and only secondarily in the capacity of an employee. This will cover such cases as irregular work by the hour done by students, those engaged as fellows, scholars, assistants, readers and the like."

The Regents also approved several changes in personnel, naming Dean C. H. Oldfather, of the arts and sciences college, as acting chairman of the political science department during the one year leave of absence of Prof. Lane W. Lancaster.
