### Uni receives \$84,375

#### NYA quota

This year's allotment is \$6,210 more than last year's employment fund

NYA part-time employment will pay university students \$84,375, during the current school year according to allotment figures released Tuesday by C. A. Donaldson, acting assistant purchasing agent in charge of university NYA service.

Last year's total allotment of \$78,165 gave aid to 730 students and a similar number are expected to receive aid this year. Included in funds for 1940-41 is an \$8,235 drouth allotment in addition to the regular \$70,140 allotment. Monthly payments to graduate students range from a minimum of \$10 to a maximum of \$30, and for collegiate students from \$10 to \$20.

#### Based on Number.

The monthly fund quota is based upon the total number of resident undergraduate and graduate students, 16 to 24 years of age inclusive, who were carrying at least three-fourths of a normal schedule in the day sessions as of Nov. 1, 1939. A figure equal to 9.47 per cent of this enrollment multiplied by \$15 is the monthly fund quota.

Qualifications for students include U. S. citizenship. No aid is granted to aliens and an oath of allegiance is required this year. Character and ability are taken into account.

law establishing a selective method of augmenting our armed forces. The method is fair, it is sure, it is democratic—it is the will of the people."

### Willkie skyrockets into lead spot in Daily poll

By Ralph S. Combs.

Wendell Willkie's zoomed from second place with 49.1 percent last week to 64.2 percent in the balloting in this week's DAILY NEBRASKAN presidential poll in which President Roosevelt dropped from a slight lead of 50.9 percent last week to follow Willkie with only 35.8 percent today.

A gain as phenomenal as this was entirely unpredicted. Even tho the growth of Willkie's strength the nation over in the past week has been rapid this upswing from a virtual tie to a lead of 28.4 percent is hard to reckon with.

#### Much Willkie activity.

One factor which might be partly responsible for this jump may have been the activity of Willkie and republican organizations against the comparative inactivity of the Roosevelt and democratic club on the campus.

Then, to further influence opinion, might be the interest in Gov. Harold Stassen of Minnesota, who will be the principal speaker at the republican rally in the coliseum next Tuesday night. Governor Stassen is a young man. He would appeal to persons of university age. His rise to prominence

within the republican party has been swift. He is remembered for his key-note address at the Philadelphia convention in which he sponsored Willkie.

#### Stassen influence.

Stassen, a prominent man here in the midwest, would probably influence the opinions of univer-

sity students merely in the fact that he is a Willkie supporter and is to speak not just in Lincoln, but ON the campus. The greatness of this influence on this week's poll cannot be determined.

No poll can be infallible. This is another point to be considered in accepting these figures. The NE-

BRASKAN sincerely tried to conduct this poll with the greatest possible amount of accuracy. We, as we did last week, took a 5 percent sample of the entire university (excluding medicine at Omaha), with the number of questionnaires proportionately divided among the colleges.

A proportional number of ballots were also taken of men and women students. Persons polled last week were not polled this week. Despite all these precautions for accuracy, the element of chance may participate. The degree with which chance, as to persons questioned and the like, influenced the outcome of this poll is not discernable.

#### Willkie wins ag.

Willkie carried ag campus 65.8 percent against Roosevelt's 34.2 percent. These figures are almost identical with the general outcome of the poll. Ag campus figures present a comparison of last week's poll with this week's—Roosevelt and Willkie tied on ag campus last week, and Willkie took the same lead on ag as he did in the totals for the poll in all colleges.

This amazing similarity would (See POLL, page 4)
