

# Kampus Kaperings

with Marion Cramer

## They are from Iowa

and their romance is going strong. When Steve Davis imported a date from Sioux City for the Sigma Nu Pigge dinner last fall it would have taken a better guesser than yours truly to predict that Carmelita Ganz would come to UN this semester and be wearing his Sigma Nu pin. Oh well, we can't all be prophets.

## Formal

doings of the weekend center around the Sigma Kappas who will treat their dates on Friday; couplings for this event occur between Jewel Tinker and Beta Sig Dick Lundgren, Nelle Dee Carlan and Sigma Nu Ed Wibbels. Both of these dating combinations seem to be getting better and better as the year progresses.

## Off to the Windy City

for the weekend are Pi Phi Joanne Emerson and Shirley Wiley who are going to take in the Phi Rho party at Northwestern. My, what will the local boys say to this transfer of affection?

## Seranades

or a reasonable facsimile thereof have been greeting the Thetas on various occasions when they lifted up the phone. Seems the fellows appreciated the singing the other night but are doing it up the easy way, by using Mr. Bell's remarkable invention.

## The 'Ole Left Hand'

will be the occasion for some new dating combinations. In fact there are some couples that thought Saturday night wasn't enough for they have Sunday dates too. In this category are Kappa Shirley Van Decar and Sig Alph Don Macy who will go to the Sig Alph Buffet dinner on Sunday. Betty Dobbs, Pi Phi and Sigma Nu

Preston Hays who plan on taking in the ball and the Sigma Nu Sweetheart dinner which is scheduled for Sunday.

## He's from Missouri

and is going to show Jean Porter a good time this weekend. Wonder if he is one of the people coming up for the Student Council Convention or if this is just one of those extra special events?

## Do you ever wonder

just what happened, to that keen dating combination between Shirley Khyme and George Abbott which looked so good early this fall to smooth Alice Marion Holmes who saw so much of Phi Psi Jack Judy last year, to that a very constant affair which seems to be not quite so much that way between Tri Delt Fran Keefer and Sigma Nu Frank Scudder, and most of all what ever did happen to all those optimistic souls that told me that spring brought new romances? (I believed them when I was a freshie, but now...)

## Manna

from the Hoffmans greeted Kappa Shirley Hoffman when her family arrived in town with a carload of food (Almost enough to feed all the Kappas) for it seems that people weren't wrong when they wished her a happy birthday. The banquet atmosphere was increased by a lovely bouquet of sweet-heart roses sent by Phi Psi "Rags" Rydman.

Your Cornhusker picture will make splendid application prints—Order now for early delivery. Townsend's Studio.—Adv.

## Callan—

(Continued from page 1.) purposes. Asked to comment on the merits of the bill, the senator said: "It would encourage the use of gasoline as a tractor fuel."

"Being in the implement business I know that tractors will develop at least 10 percent more horsepower, will last longer and will require fewer repairs if gasoline is used as a fuel. Only two states in the country do not have a similar act—Nebraska and Arkansas."

Senator Callan engages in a unique hobby. He likes to take poor producing farms and build them up. Thru terracing and other soil conservation methods, he co-operates extensively with the government's farm improvement program. At present, Senator Callan farms 760 acres. The senator is married and has two sons, one of whom, Dean, is a sophomore in the university.

Mrs. C. J. Haase, a 1936 graduate of Stout institute, Menomonee, Wis., is keeping records of activities of all members of her class. Sixty-seven percent of University of Cincinnati students come from Cincinnati homes.

## February Alumnus features review of first years at UN

With the annual Charter Day celebration coming Saturday, the February issue of the Nebraska Alumnus, out yesterday, features an article entitled, "Remembering Those First Years" by Henry H. Wilson, '78, '85, '95 and '29.

As the years indicate, Wilson's association with the university began two years after the university opened. After receiving his degree, he taught for 28 years in the law college. In 1929, Wilson received an honorary doctor of law degree, his fourth from the University of Nebraska.

Reminiscing in his article, Mr. Wilson recalls his earliest experiences at Nebraska, and writes of many amusing tales of his day. His attitude on what was considered new reforms—such as the formation of an ROTC unit which he opposed as editor of the student publication, the Hesperian Student—have changed today, Wilson writes.

Charter Day affairs will be held in all parts of the country according to reports from 18 chapters which have made definite plans for the occasion.

Rose Bowl talk still fills the letters' columns with correspondence coming from both the west coast and the mid-west.

Development of photography, especially as an aid to teaching, is discussed in an article by Knute O. Broady, chairman of the visual education department.

Illustrated are pictures showing the versatility of the department including a portrait picture, a speed graphic shot from the top of the stadium and a "photo-micrograph" photo of some wheat.

Also in this month's issue are a university page with feature news of the month, a section on books in current affair reviewed by Dr. R. A. Winnacker of the history department, and a digest of the DAILY NEBRASKAN

## Prof. Dana Cole speaks to Economica on taxes

Professor Dana C. Cole spoke to members of Economica on the subject: "What the Business Man Wants in the Way of a Federal Tax System," at the monthly meeting of the organization.

showing the "campus cycle."

In addition, reports from the various alumni clubs and a report on prominent alumni are included. On the frontpiece is a photo showing the statue of Lincoln at the capitol. Among the pictures in the magazine, a full page shot of students taking examinations is outstanding.
