

## Thompson announces four UN scholarships available

Four general university scholarships, for which applications are now being received, will be awarded next year according to T. J. Thompson, dean of student affairs. Application blanks may be secured from Dean Thompson's office in the administration building and should be returned to that office by May 6.

A worthy student studying in the department of chemistry or geology will receive the George Borrowman scholarship which will provide \$60. It was established several years ago by Dr. Borrowman of Chicago, who holds two degrees from Nebraska and is a former faculty member.

In memory of the late Edward Lang True of Schuyler, a perpetual scholarship of \$60 will be awarded to a worthy student registered in any college.

### Broady scholarship.

The Jefferson H. Broady scholarship of \$60 will be awarded to a deserving student in any college. It was endowed by Dr. and Mrs. John D. Clark, graduates of the university, in memory of the late Judge Broady, prominent Nebraska attorney and former member of the faculty.

To the freshman man or woman

## Engineering college plans new courses

### Curricula to be offered during summer include drafting, shop practice

Preliminary proposals for four new engineering defense training courses to be offered during the summer have been submitted to the U. S. office of education by the engineering college, Dean O. J. Ferguson announced.

If authorized the courses will last from June 2 thru Sept. 6 and applications for enrollment may be obtained now from Dean Ferguson's office.

First proposed course is in drafting and shop practice where students will spend six mornings per week in the drafting room from 8 to 12 and five afternoons from 1 to 5. This drawing instruction is planned to develop a technique which will fit students for jobs in drafting rooms of manufacturing industries, while shop practice would train them as skilled mechanics in the production end.

### Advanced drafting course.

To follow an evening course now being given will be an advanced course in drafting, to which students may be admitted only if they have the necessary prerequisite training. It will meet four evenings a week from 7 to 10.

A beginners evening course in drafting, repeating the present course, is also proposed as a result of petitions handed to Dean Ferguson by a group of Lincoln men. Hours will be the same as for the advanced class.

The fourth course will give training in materials inspection and testing with three evening sessions per week of two hours each supplemented by four hours of laboratory work on Saturday afternoons.

### For government, industry.

Students would be prepared for service with the government and defense industries. Three years of engineering training including study of the mechanics of materials or equivalent experience in industry is required of applicants.

Courses will be free, but no university credit will be given. After completion, students enrolled in the

(See COURSES, page 4.)

who has overcome the greatest difficulties in completing the first year of university education is awarded the Walter J. Nickel perpetual scholarship of \$20. It was established by W. J. Nickel of Chicago who graduated in 1916.

For most scholarships, sophomore standing is required, with preference normally given in the order of classes beginning with seniors. Applicants must have earned at least 24 hours of credit during the last two semesters of university residence with a record of high grade work. A scholarship recipient must carry at least 12 hours during the semester for which the award is made.

## Cox speaks at university convocation

### Noted historian talks on 'Pan Americanism in World Crisis' May 9

Prof. Isaac J. Cox, chairman of the history department at Northwestern university, will speak on "Pan Americanism in the World Crisis" at a convocation in the Temple theater May 9 at 11 a. m.

Dr. Cox is being brought to the campus under the joint sponsorship of the university convocations committee and Economica, faculty and graduate student club, which is planning an all-day conference May 9 to which guests from other Nebraska schools and colleges have been invited.

Dr. Cox will discuss "Building Up Pan Americanism" at an informal dinner meeting of the conference in the Student Union. From 3 to 5 a general discussion of "Economic Theory in a World of Controlled Enterprise" will be on the conference program which is being arranged by Prof. E. A. Gilmore, chairman of the economics department.

### Engaged in frontier studies.

A member of the Northwestern history faculty since 1919, Professor Cox has been actively engaged on a series of frontier studies covering the early relations between Spain and the U. S. His books include "Nicaragua and the United States," "The Early Exploration of Louisiana," and "The Journeys of LaSalle and His Companions."

He has contributed to the encyclopedias Americana and Britannica and is a member of the America History association and a past president of the Mississippi Valley History association.

## Czech refugee, author speaks Tuesday at 4

Dr. Oldrich Chyle, refugee from Czechoslovakia, will speak on "What Is Happening in Central Europe?" at 4 p. m. Tuesday, in the faculty lounge. Dr. Chyle was in the Ministry of Foreign Affairs when Germany invaded Czechoslovakia, and escaped thru the Balkans.

Dr. Chyle was born in Prague and graduated there from the famous Charles university, the first university in Central Europe. At graduation he received the Doctor of Laws. As a student he was active in political affairs.

He was especially active in the first parliamentary elections of the republic in 1919, when he was but 20 years old. After graduation he entered the diplomatic service, serving for seven years in the

## Feud on! Lawyers swipe engineers' exhibit combine

It's no longer quiet on the Western Front! In a lightning blow at about 2 Saturday morning, lawyers struck at the engineers' campus structure and began the traditional law-engineering feud.

Tearing down an entanglement of barbed-wire that surrounded the 40 inch modern, streamlined combine, on exhibit south of Pharmacy hall as a part of the Engineer's Week activities, running from May 1 to 3, lawyers pushed the 3,000 pound machine to the front door of the law building. Engineers saw their machine Saturday morn-

## I-M debates enter round 4

### SAM meets undefeated ZBT's Tuesday night

Fate of two of the university's intramural debate teams may be decided Tuesday night when Sigma Alpha Mu meets Zeta Beta Tau in the fourth round of the Interfraternity debate tournament. If the defeated Zeta Beta Tau team is victor, they will meet undefeated Delta Upsilon in the finals. If Sigma Alpha Mu triumphs, competition will continue until only one team remains.

Yale Gotsdiner and Robert Passer of Zeta Beta Tau holds the best record of the three teams. The ZBT's have been victorious in all three preceding debates. Delta Upsilon is also undefeated, but has debated only once, winning from Sigma Alpha Mu. Their other two matches were won by default. Robert Chambers and Bud Johnson represent this team.

Sigma Alpha Mu is the only one of the three teams which has been defeated. Altho losing to the DU's, they were victorious over Alpha Tau Omega. Zeta Beta Tau and Sigma Alpha Mu have not yet met in competition.

Question for debate is, "Resolved: That the United States should enter the war rather than see the defeat of the British empire." Art Rivin and Harold Margulies will defend the negative side against Zeta Beta Tau debate team Tuesday night.

## Beauty queen candidates' pictures now on display

Pictures of the 12 Cornhusker beauty queen candidates for 1941, six of whom will be presented at the Student Union birthday party Wednesday night in the coliseum, are now on display in the window of Townsend's studio.

ing covered with white wash and manure that the lawyers had added as finishing touches.

Engineers said yesterday that they were glad the lawyers had gone into action, for now the fun would really start. Altho the engineers promise they'll get revenge, all say that the job was well-done, even for the lawyers.

The engineers' counter-attack isn't expected until Monday since action by insurance men is being awaited before the engineers start the fireworks. The combine was insured.

There wasn't much visible damage on the combine. However, onlookers yesterday afternoon said that it would be about a \$50 job to fix the machine since the entire mechanism will have to be cleaned. Everything has been put in the hands of the insurance company.

About 100 lawyers took part in the raid, according to Dan Maixel, engineering leader who said they must have had a hard time with the barbed-wire.

Engineers were divided into two camps yesterday on what action

## Howard talks at Y meeting

### Legislator to discuss 1941 session Tuesday

Senator R. M. Howard, speaker of the state legislature, will discuss the "Highlights of the 1941 Session" before a YMCA sponsored open meeting Tuesday night at 7 in the Y rooms of the Temple. Howard's address will be a review of the legislature's work this year.

The meeting, Henry Marvin, chairman of the YM meetings committee, said, is open to any who care to attend, particularly university men or women. "Law students and social science students are especially invited," Marvin declared.

Senator Howard is serving for his fourth term in the unicameral. He is a member of the appropriations committee, and chairman of the sub-committee on appropriations for educational institutions. He represents ten counties, more than any other senator, owns over 7,000 acres of grazing lands in McPherson and Arthur counties himself.

This is the second of a series of open meetings sponsored by the Y. Former Congressman Henry C. Luckey discussed the international situation at the first. Other prominent speakers will appear in future meetings.

to take. One faction was for immediate war-fare with old-time fighting, while another group was planning some new strategy.

Prof. E. W. Brackett, head of the agricultural engineering department that made plans for the combine loaned by the McCormick-Deering company to the university, said that nothing would be done about moving the combine until word was received from the insurance company.

## Boucher tells Georgia group of progress

MILLEDGEVILLE, Ga.—More significant experiments and improvements in undergraduate university education have come in the last 10 or 20 years than in the entire previous history of American colleges and universities, declared Chancellor C. S. Boucher in an address Saturday at the 50th anniversary celebration of Georgia State college for women.

Such progress has come as a result of serious study by university and college faculties of defects and shortcomings in their programs, he said.

Stating that the present educational emphasis "is on substance rather than forms," Dr. Boucher said that "the time has arrived when, as far as educational achievement is concerned, a degree from one institution means much more than a degree from another institution. Tho this is not as yet widely known to the public, it is rapidly becoming known in ever widening circles."

## Vestals of Lamp to initiate 17 today in Union

Vestals of the Lamp will initiate 17 new members this afternoon at 5, in the Union, and will elect new officers, Jean Carnahan, president, announced yesterday.

Following the initiation a reception for the members will be held at the home of Miss Lydia Wagner at 1980 Ryons.

To be initiated are: Jean Cowden, Alice McCampbell, Shirley Heidt, Nancy Raymond, Laurel Morrison, Jean Hazen, Mary Louise Babst, Virginia Mutz, Carolyn Held, Barbara Ernesti, Marjorie Johnston, Marjorie Bruning, Betty Klingel, Jean Kerl, Ann Kinder, June Acherman and Helen Kelley,
