

**Sampling . . .**

(Continued from Page 1.)  
 Seconding Athey's opinion, Phil Greedy, sr., declared that "a little military training won't hurt anyone. Most juniors and seniors don't get any physical exercise and they should have physical training at least."  
 One of the dissenting voices out of our test sample of ten belonged to Larry Huwaldt, junior, an advanced officer. Huwaldt said

that "physical education training isn't much good for university students. Their time can be better used along intellectual lines."  
 Along much the same line was Tom Hood's veto of the proposed course. Said Hood, senior, "I wouldn't be for it. It would take time away from studies and for the value it would give you, it's not worth it. The military training wouldn't teach you any more than you had picked up in basic."  
**Develops Leadership.**  
 Steve Wiles, junior, advanced a

new slant on the course, thinking that it would be a good idea because "it would develop leadership."  
 Bud Johnson and Bob Butz, both juniors, were agreed that the program would be fine. "It will be good training for the boys and will build strong healthy bodies."  
 Another junior, Blair Mumhofen said "It sounds all right. The men need some sort of physical training. I personally feel the need for it. Ed Calhoun, senior, gave out with a cryptic "I think it would

be a good idea."  
 Out of ten persons approached, only two were against a program which would institute physical education and military training. One of the dissenting voices was an advanced officer. Five of the persons approached were juniors and would benefit if such a program were installed.  
 University of Connecticut enrollment has jumped from slightly over 1,400 students to 1,700, setting a new record.

Gifts of \$9,200,000 have been reported to the University of Chicago fiftieth anniversary fund, out of a final goal of \$12,000,000 to be raised within the next ten years.  
 A special course in ultra-high frequency techniques is being offered at Iowa State college as a means of filling the need for radio technicians in the armed forces.
