My, how we all wish Kosmet Klub would come and go so that the male talent could once again spend a few quiet evenings at home. . . Two couples with a host of such evenings before them are surprise newly-weds, Paul Matthews, Kappa Sig, and Joan Long, Chi O. They took the final vows in Rockport, Missouri, Friday night. Along with them in the same state of happiness are Cadet Colonel Roger Cox, who married Margaret Holman of Lincoln Thursday night. It was all so sudden, but we say congratulations to both. . .

Add Sudden Steadies.

Congratulations are also due to new pledges of the Sig Ep boys, namely Lauren Calhoun, Audrey Kreizinger, Leon Brown, Lambert Bartels and Floyd Blanchard. . . Another one of those sudden affairs will reach its terrific climax today when Virginia Trowbridge, DG, and Warren Van Norman, Delt, start their steady round. Saturday night was Virginia's last fling before she is all tied up. . . Celebrating their 25th anniversary last night were the Alpha Gamma Rhos with their annual spring formal at the Cornhusker. Carl Ervin we understand took an old flame of his who just blew in town the night before. . .

Betas 'Crud' Again.

Quite a different kind of a party was the famed Beta crud party. A raid was fully expected, they having already received a warning from the war early in the day. You might ask some Beta if all turned out as was hoped for. . . Dorothy Theissen, Theta, was almost scared out but finally showed up with Clem McCarthy. Bill Scribner brought one Deal Worella, former Lincolnite and now modeling in Chicago, while Bud Stewart with DG Betty Simodynes, and Bob Munson with Kappa Marty Palmer also had themselves one rare time. . . New pledge at the Delta Sig house now is Bob Garey of the "Music by Garey" fame. . .

Clyde Irwin, another Delta Sig was seen at the Tri-Delta house party last night with Pat Hunting of that house. . . Many a sorority was sorry to lose Don Hartman, Sigma Chi, to the navy yesterday. These songs of his really take your breath away. . . We wonder if the picnic planned last night which took away so many of the Kappa Sigs from their house-party lived up to everyone's expectations. . . Can't seem to dig up anything more so see you, tomorrow.

HO HUM! What to do on a Sunday afternoon with no car and no tires even if you did have a car. Why not toddle on down to the STUART and audit WE WERE DANCING, a swell comedy with Norma Shearer and Melvyn Douglas. You'll knock yourself out, it sez here! (Adv.)

Emory Burnett Wins Defense Report Award

Emory Burnett, graduate student in the college of business administration, has been awarded the \$50 prize by the Lincoln defense committee for a report "to best contribute toward industrial development for Nebraska."

The report entitled "Industrial Utilization of Nebraska's Agricultural Products," summarizes agricultural production and presents a survey of manufacture in the state. The information will be used as a basis for more general treatment of industrial possibilities in Nebraska, according to Harry Grainger, chairman of the Lincoln defense committee.

The university's committee on business research of which Prof. C. E. McNeill is acting chairman, made the recommendation for the award.

Ohio State's Professor Henne Delivers Address . . . At Chemical Meeting

Prof. Albert L. Henne, chemistry instructor at Ohio State university, will speak on "Aliphatic Fluorides" at the meeting of the Nebraska section of the American Chemical Society Monday, room 208 Avery at 4 p. m.

Flourine, one of the most recently discovered elements, has rapidly grown to be one of the most important chemicals used in industrial fields.

Professor Henne, a native of Brussels, Belgium, received his

doctor's degree from the University of Brussels in 1925. From 1925 to 1926 he was a fellow of the Belgian American Educational Foundation of the Mass. Institute of Technology. In 1933 he received his final citizenship papers.

Ever since his arrival in the United States he has worked in the refrigeration industry as a research chemist. It is in this field that flourine has become so important.

Since 1938 Dr. Henne has been associate professor of organic chemistry at the Ohio State university and associate supervisor of the American Petroleum Institute Project. He is a section vice-chairman and an official investigator of the National Defense Research Committee.

Dr. Henne's papers on various chemical subjects have also been well received in chemical circles.
