Now that all the grads have departed and the campus has settled once again into its peaceful little groove, we will look into the ravishes that Homecoming has left . . . First of all among the hundreds soaking their feet in hot water last night after the Corn Cob-Tassal dance were Pi Phi Barbara Sturges and DU Ed Hiebbler, Phil Holbrook and Bill Munson ATO, Dorothy Black, Chi O and Bob Buxton, another Tau man, and Triple Delt June Griffen and ATO Dick Hunter.

If anyone finds a stray Beta pin out without an owner please notify John Anderson. His is missing and he swears he didn't hang it.

Pat Chamberlain just flashed in hot on the trail of Glenn Miller who is evidently a very elusive guy if Pat can't track him down. . . Another celebrity on the campus over the weekend was Alf Landon who stayed at the Phi Gam house. . . Also visiting the Fiji hut was Indiana's No. 44, Bill Hillenbrand.

We hear that Kappa pledge Dolly Clinton and DU Frank Maroney are on the verge of the big break although she still has his golden DU. . . Back on the campus for homecoming and the big game is Lt. Walt Rundin, Sig Alph of last year. He's working for Uncle Same these days. . . Phi Delt Steve DeVoe and Pi Phi pledge Dorothea Duxbury are dating quite regularly these days, a carryover from high school.

The campus looks sorta lost with all the scrap gone but it was

**Women Phys Ed Grads Aid In War Work**

The UN physical education department has many women graduates who are now co-operating extensively with the war effort.

Miss Helen Young, class of '38, recently received an appointment as USO recreational director in California.

The class of '31, is represented by Miss Ruth Diamond, who recently resigned her job as director of physical education at the University of Omaha, to accept the appointment as director of recreational activities in overseas service. This is one of the highest appointments given by the Red Cross to women. She is now in Washington, D. C., getting instructions. She will sail, with six staff members under her, for overseas duty.

Virginia Wolfolk, class of '32, received appointment as recreational leader in the overseas unit of the Red Cross.

Emma Harr, class of '30, is a staff member at Walter Reed hospital, Washington, D. C., where she is training physiotherapists for the war effort.

Sue Hall, class of '30, resigned as director of physical education at the University of Louisville has accept an appointment as an officer in the Waves.

a swell job well done and congratulations to the winners and the new Pep Queen.

The average co-ed wears a size 14 dress.

**From 2 o'clock . . . Morrill Hall Opens to Air Base Men, Visitors Today . . . Until 9 p. m.**

With its famous exhibits on display, Morrill Hall at UN will open its doors today for visitors. Each Sunday the museum will be open to air base men and others from 2 o'clock until 9 p. m.

The UN museum boasts one of the finest paleontological collections in the nation. Charles H.

Falkenbach, senior field man for the American Museum of Natural History in New York, spent last week studying the exhibits and collections in the museum.

**Rearrange Floor.**  
To accommodate the visitors, the university plans to rearrange the lower floor of the hall. A display room with mounted birds and mammals will occupy the lower floor this fall. Half of the room will be occupied by an anthropology display with relics of ancient peoples. The other half will contain a systematic display of modern vertebrates.

One of the finest new fossil exhibits is that of the ground sloth (pronounced with a long "o") in the west corridor on the main floor. These remains were found in Garden county, Nebraska, in 1936, by a university museum party. Mingled with these fossilized bones were those of the giant camel, largest ever mounted anywhere, which is also on display.

**Sloth Exhibit.**  
The ground sloth exhibit is of particular interest because it is the only one ever known to be found in the Great Plains. It stands six or seven feet high, with long claws and powerful teeth. But Dr. C. Bertrand Schultz, director of the museum, says it is small compared with its enormous, room size successor.

Ground sloths are now extinct, though they are related to the tree sloths of South America and the armadillos of Texas and Mexico. The sloth on display is probably of the type that migrated from South America when the continents were joined by land several million years ago. After getting into North America these ancestral types developed into the giant sloths of later eras.  
Exhibit of the sloth was made possible through the Charles Frick fund, and it was mounted for the museum by Henry Reider.

**Faculty Takes Part in Annual UN Reception**

New members of the University of Nebraska faculty were in the receiving line at the chancellor's annual faculty reception Saturday evening at Carrie Belle Raymond hall. This year the occasion was informal.
