## Boucher Asks \$300,000 Raise Of University Appropriation

Enrolment Decrease

## Boosts Budget Need

Chancellor C. S. Boucher told the appropriations committee of the unicameral Wednesday that although the university has suffered a 31 per cent decrease in enrolment, it will be necessary to increase its biennial appropriation in order to maintain minimum staffs in its essential departments.
"When the university's fee income is reduced, naturally the appropriation from the general fund must be increased," the chancellor explained. "A university, operates the most economically when it is filled to capacity."

Has No Contracts.
In 1941 the appropriation was $\$ 3,584,652$. An approximate $\$ 300,000$ increase was asked for the coming biennium. The chancellor went on to say that the school has no contracts for any single army or navy unit,
but that it seemed likely that the university would house, feed and instruct dental, medical and engineering units. There is also hope for a pre-flight school but there are more definite plans for the other units.
Toward the end of the hearing Senator Don Hanna of Brownlee requested a separate accounting of the city campus and the agridivisions are to be segregated.
Chancellor Boucher said that he was not in favor of such a plan, maintenance overhead and intruction. Senator Hanna, howseparate budgets.
