

Add to Post-War Fund . . .

Buying \$50.10 worth of war stamps from Tassels Ann Seacrest and Lauralee Mundil is Col. James P. Murphy, PMS&T. These stamps were turned over to the War Scholarship Fund as a contribution from money collected through the coke machine in Nebraska Hall.

A \$100 war bond recently changed hands when members of Coed Counselors added this amount to the War Scholarship Fund. Shown signing the check is Ann Kinder, president of Coed Counselors, (seated) while Polly Ann Petty, president of the Fund sponsoring organization, Student Foundation, looks on. Standing behind the desk in silent approval are Gertrude Lyons, Shirley Kyne, Catherine Wells, and Nancy Raymond, Coed Counselors.

School Makes Adjustment For March Call of ERC

Anticipating a possible call of the army enlisted reserve corps this month, Dean T. J. Thompson announced yesterday that:

1. One-half credit will be given to ERC members called who are in good standing as of March 26.
2. Students should stay in school until called so as to meet ERC requirements.
3. There will be a ten to fourteen day interval between call and induction.

Meanwhile, the status of the ERC and the advanced ROTC was outlined by Col. Raymond Briggs, civilian components officers of the Seventh service command, to the Daily Nebraskan in a telephone conversation.

Col. Briggs told the Nebraskan that members of the ERC would receive orders on March 15, would probably go into the service at the very last of March or early April, depending on Slective Service quotas.

Approximately 300 UN men will be affected, university officials said yesterday.

Original plans announced several months ago provided that members of the advanced course ROTC would be activated upon arrival of a special army program on the campus. Col. Briggs said, however, that this might be foregone to avoid difficulties arising from the need for housing men for a few months.

The colonel also warned students not to drop out of school before receiving orders. Such students will be treated apart from regular ERC members, he said, adding that the ERC will probably entail certain advantages to the students.

Bengtson Outlines Junior Division at Kansas Convo

Dean Nels A. Bengtson, head of the junior division spoke at a University of Kansas convocation at Lawrence Friday.

He talked on the Junior Division, which Kansas is planning on emulating in the future. A member of the KU faculty made detailed observation of the Junior Division setup here several weeks ago.

Beginning Tomorrow . . . Sophomore, Junior Women Apply for AAUW Awards

. . . At Ellen Smith

Women filing for the annual American Association of University Women scholarships must hand in application blanks to the office of the Dean of Women before noon, Tuesday, March 16.

Blanks may be obtained now at Ellen Smith. Applicants will meet the AAUW Scholarship committee for a short conference between 4 and 6 p. m. on either Thursday or Friday, March 25 or 26.

Applicants must be either sopho-

mores or juniors, and registered for at least twelve hours of work, either wholly or partly self-supporting. A scholastic average of 88 percent is required, according to Mrs. Ada S. Westover, assistant to the dean of women and Lincoln member of AAUW. Winners of the scholarship awards will be announced at Honor's Day Convocation, Tuesday, April 20.

Further information may be obtained from Mrs. Westover at Ellen Smith.

Survey Discloses Cigarette Supply Can Meet Demand

An extensive survey recently completed by the War Production Board shows that the American public doesn't need to worry about its cigaret supply.

Altho demands have been large, and some of the ingredients—such as glycerine and sugar—are on the scarce list, "no restrictions on the manufacture or distribution of cigarets are necessary at present," the WPB reports.

The survey discloses that stocks of cigaret tobacco in the hands of dealers are adequate for the time being, that the 1942 tobacco crop was large, and that imports of Turkish tobacco are still sufficient to fill the needs of the trade. Unlike most industries, the cigaret industry has no labor problem because it is highly mechanized. Also the industry functions on coal, so the oil shortage doesn't hamper it, the WPB reports.

Students 'Kick In'

War Fund Drives Hit Highest Peak

Nebraska students opened their hearts and their pocketbooks last week and "kicked in" to three campus war drives for money.

The campaigns to raise money for the funds, two of which are national drives—one is solely for university students—have met with great success.

The war scholarship fund, which is meant for university students' use at the end of the war, has been created and is being created out of the donations of students, organized houses, alumni gifts, other organized groups and through various social affairs.

The total, which now stands at \$2,010, was recently raised to this amount by \$25 bond donations this week from the AWS, Beta Sigma Psi, Love Memorial hall, Pershing Rifles and Phi Delta Theta.

The drive for the World Student Service fund set a goal of \$1,000, but this amount was passed in the first week of the campaign by \$175. Fraternity-sorority box socials began the activities of the drive, and since then pledges and contributions have added \$500 to the previous

Rx: UNEB? . . . UN Begins Radio Class For Adults

Two new courses in fundamentals of radio will be offered at the University of Nebraska for adult citizens beginning March 15. Each course will last for 16 weeks and classes will meet three nights a week from 7 to 10 p. m.

No university fees will be charged, the cost of these courses being borne by the federal government. Certificates will be given for satisfactory completion of the work. The courses are planned to meet the need for radio technicians and broadcasting in civilian defense and in the army and navy.

To be considered in Course I, applicants must be high school graduates with two years of mathematics and one year of physics in the high school, must be at least 17 years of age and in

Approximately 6000 Students . . . Release Jr. Division Survey . . . Take Tests in Two Years

More than 3,000 students have made use of the consultant service of the University of Nebraska junior division during the two and one-half years of operation of the junior division, to which all entering students are assigned till sophomore standing is attained. These students, mostly freshmen, have held more than 4,000 conferences about problems of vocational choice, the identifying of aptitudes and personal and social adjustment.

Approximately 6,000 individual tests of aptitudes, interests, and personality traits have been given in connection with the conferences. These figures were revealed by Dr. N. A. Bengtson, dean of the junior division, in describing one of the many functions of the division.

Dean Bengtson called attention

to the fact that the conferences and tests are arranged voluntarily by the students. Students are never obligated to take tests or schedule conferences related to interests and aptitudes. While some of them are urged by their junior division counsellors and advisers to avail themselves of these services, the majority arrange for them after talking with other students or after hearing the measuring and consulting service described in orientation courses.

A recent investigation by Dr. Warren R. Baller, the guidance consultant, shows that, contrary to what might be expected, the majority of students who ask for tests and counselling to help with the choice of vocations and the planning of college courses are individuals of better than average

Armed Forces Offer Courses To Grant Credit

. . . Thru Test Series

Men and women in the armed services who have taken courses, picked up languages, or learned new techniques while in service will have a chance to test their "educational growth," the war and navy departments announced last week, and will probably be able to get college or school credit on the basis of these tests.

The war and navy departments reported that the tests were being prepared now and would be available when finished to any serviceman who wants to take them. Re-
