United Nation Policy Good, Says Forum

For the United Nations to remain united there are many problems involved but there are ways of overcoming these, was the decision of the University of Nebraska Forum of the Air, in its inaugural discussion on the topic, "Can the United Nations Remain United," yesterday at 5 p. m. over KFAB. The forum included Dr. David Fellman, who served as moderator; Dr. J. L. Sellers, Dr. J. O. Hertzler, and Dr. N. L. Hill.

Fellman explained first that the union was formally begun on Jan. 1, 1942, with 26 nations signing a joint document at Washington, D. C. The signers have now grown to 33 nations. The president selected the term United Nations meaning to imply that it was a union of people, not of political powers.

Hello Everyone—
For two years I've been in the jungles of India, and I am pretty tired of looking at jungle gals and would give a whole lot to look at a pretty "corn-fed" Nebraska girl again. How about it, do I get a photo for Christmas? Or have you farm gals gone selfish on me since I left?

Love and kisses,
BARON...

TO YOU, MY VERY BEST WISHES FOR A MERRY CHRISTMAS and a HAPPY NEW YEAR!

On the beam, fellow coeds, and never let it be said that a "pretty,

corn-fed, Nebraska lassie" ever let down a homesick soldier!! If our fighting man in India is tired of looking at jungle gals and

Mac Decorates Daily Xmas Tree

There are Christmas trees and Christmas trees, but for the Daily staff and reporters there is only one whose lights burn in their hearts.

Four feet of evergreen beauty decorates the Daily office, and all of it is due to Mac, head Union janitor. It was he who found a base and set it up. It was he who spent hours splicing wire so that the tree could be decorated with lights. And it was he who "found" the twin red and blue lights that complete the other decorations which he "found" on the Union's four other Christmas trees.

Mac has the true Christmas spirit.

Whitney Talks To Sigma Xi Meet Tuesday

Affect of environment and heredity on physical traits in man is the theme for the illustrated lecture of Dr. David D. Whitney, chairman of the department of zoology, to be given next Tuesday at 7:30 p. m. in Morrill Hall auditorium. All students are invited to the meeting sponsored by Sigma Xi, honorary scientific fraternity.

Dr. Whitney will show in his lecture the influence of environment of man, the equal influence of heredity and environment when the two are acting together, and the cases in which heredity has a greater influence than environment.

As the author of a number of articles pertaining to genetics which have been published in the "Journal of Heredity" and in "Genetics" and as the author of the book "Family Treasures" which is a study of inheritance of normal characteristics of man, Dr. Whitney is a qualified speaker on his subject.
