## Mystery Pervades Final University Theater Play

Fifth and final production of the University theater for this year will be "The Lady Who Came to Stay," to be presented the 26, 27, and 28 of April, under the direction of Berne Enslin.

A psychological mystery taking place at the turn of the 19th century, the plot centers around three old maid sisters living in an ancient Victorian mansion. A sister-in-law coming from the concert stage is forced by poverty and illness to seek refuge with these aunts. She brings her young daughter with her, leaving her

son in the care of friends. Each of the three sisters has a different opinion of their younger sister by marriage, and none of them are pleasant in their relations.

### Daughter Falls in Love.

The health of the concert singer grows worse instead of better, and soon she dies, leaving her daughter in the hands of the conniving aunts. The only bright spot in the daughter's otherwise dull and uneventful life is her interest in a young man who shows her the love and attention she so much desires. One of her aunts takes an unseemly interest in this love affair, so Katherine comes back to haunt her for interfering in her daughter's life.

Two of the sisters die, leaving the third to be surrounded by ghosts of the family. She decides to put an end to all the evil and unhappiness of the old mansion, and burns the house, barely escaping with her life.

### Select Tentative Cast.

A tentative cast has been selected with the roles of the three old maid sisters—Emma, Phoebe, (See MYSTERY, page 4.)
