medal at the banquet as winner of the afternoon's Tall Story contest. Jokes and humorous events of the engineering college were related in Sledge Senior report, a tabloid sized pamphlet distributed at the banquet.

Following the presentation of awards was an address by Mayor Lloyd Marti. "The postwar period offers great opportunities and presents a real challenge to those with engineering ability," he declared.

Marti stressed the fact that the rebuilding of the world is largely the task of the engineer.

conomic world orders. Peace makers must guard against an elaborate peace structure as "we had plenty of structure after the last world war and it broke down," he said.

The five points outlined in his speech were: that the peace will be preserved; that power will continue to reside in the hands of those who will possess it—the United States, Britain and Russia; that this power will be exerted globally; that there should be no notable shifting of long-established national holdings; that there should be no violent changes in forms of government and in social and economic organizations.

zal, Peggy William, Jean Frescoln.

The quiz covered questions on current events, music, literature and the arts. Any member of a team could answer a question for the entire team, and one minute was allowed for each question.

One team, the ASTs, received a perfect score of 100 percent. These "quiz kids" even confused the quizmaster by answering, correctly, an estimate of the German fighting strength. They answered with the number of men and the answer on the question sheet was 300 divisions. Judge Janet Krause was obliged to inquire the number of men in a division and do some quick figuring to grade the answer.

When the three teams come together this afternoon brains will be buzzing and the contest should be an interesting spectacle for anyone wishing to attend.
