

Liberty Magazine Publishes Story by Engineering Grad

Liberty magazine will publish a short-short story by Capt. Ed Schmid, university graduate, in the February 9 issue.

Titled "Planned to Perfection," the 500-word story tells the tale of a bank robbery. Capt. Schmid recently received a \$300 check for the story from Liberty.

Began Writing Here.

A graduate of the college of engineering in 1938, Capt. Schmid began his writing career while attending the university. At present mystery novel "Shoot-You're Faded" is in the hands of publishers.

While studying electrical engineering, Schmid had several humorous articles published in College Humor and other humor magazines. He entered three ads in a national ad-writing contest, sponsored by a pipe manufacturing firm. In addition to winning first prize, he received the third prize and honorable mention.

Capt. Schmid is stationed in Hot Springs, Arkansas, and was public relations officer at the Army Redistribution Station there. He wrote the mystery novel while in Hot Springs and is writing another one while waiting for his discharge from the army.

Wrote Advertising.

Prior to entering the service in 1941, Capt. Schmid wrote institutional advertising, publicity and was employed by the advertising department of the American Rolling Mill Company, Middletown, Ohio, and plans to return to that company when he receives his discharge.

He is the author of numerous hunting and fishing stories published in sporting magazines. His humorous verse has been sold to Judge, Our Army and Pathfinder.

While attending the university, Capt. Schmid was a member of Sigma Nu fraternity.

Ag Engineers Gain Praises Of Committee

Nebraska agriculture engineering department has been rated as "one of the three outstanding departments in the country," according to J. D. Long of Tacoma, Washington, president of the American Association of Agricultural Engineers.

The rating was based on a survey made by a committee of national engineering and engineering education societies.

"The University of Nebraska's agricultural engineering faculty is recognized nationally for its ability in this field. Not many Nebraskans realize, I feel, the important contributions it made to this state's record farm production during the war," Long said.

Predicts Increase

He predicted a considerable increase in farm building in Nebraska when materials were available, with the emphasis on home remodeling which, he said, would make them more convenient and comfortable and help farmers keep their children "down on the farm."

Long suggested that veterans undecided on a career might turn to agricultural engineering. "Right now and probably for many years to come the demand for trained men in this field will far exceed the supply," he said.

Lowry C. Wimberly, editor of the Prairie Schooner, university literary quarterly, announced recently that one story appearing in the magazine has been included in "Best Short Stories of 1944."

William Zuckerman, author of the story, "A Ship to Tarshish," of at the present time a member of the staff of a New York newspaper. The story, his first attempt at story writing, was returned twice for revision by Editor Wimberly who saw in it possibilities for an excellent tale.

For the first time in several years a class or laboratory assignment ticket will be issued for each restricted class or laboratory on the city campus, Mr. Wise stated. Following payment of fees on January 23 to 25 these tickets must be retained by the student for presentation to his respective instructors or for return to the assignment committee if a re-registration is necessary, he added.

Blocks of tickets for the most crowded freshman classes are being "frozen" through Monday, Tuesday and Wednesday for Junior Division students who made out schedules with their advisers before Christmas vacation, according to Mr. Wise.

Report By Wednesday.

He advised these students to plan to report to the assignment committee before Wednesday evening. The "freezing" of these tickets should give freshmen who cannot report until Tuesday or Wednesday assurance that they will not encounter closed sections in the most crowded departments, Mr. Wise declared.

"All students should bear in mind that the assignment committee has the duty," said Mr. Wise, "of making such changes in class and laboratory assignments as are necessary to order to maintain limits on class size and to make late adjustments in schedule which inevitably become necessary as registration proceeds."
