Desperate Plea Made, Can You Drape A Tall, Thin Male Shape

BY DEDE MEYER.

This is a plea, desperate and explicit, for tall, thin, male students.

They, too, would like to see their names in "Ragged Edges." They, too, would like to be voted an eligible bachelor, a best-dressed man on campus. Oh, the doom to be a mere schrdlu, gawky and angular.

One might ask why these limp forms are not draped in the best of Joe College styles. Why not, indeed? A quick perusal of clothing stores in this vicinity undoubtedly reveals the quantity of 33 waists, 32 length leg, 27 arm length, short sizes, etc, etc.

Hick?

What can the long-and-thin do? Suits in his size are absolutely unobtainable. Sport coats reach slightly below his waist, while their sleeves may hit his elbow. Pants, if right around the waist, may hang to his knees, while if long enough, could easily envelope two his size. At best, the character with this type of build can look the well-dressed boy who makes it to town perhaps once every three weeks.

So stands the situation. Appar-

Dead or Alive

Activities women and prospective innocents please note. Ten societies and clubs listed with the faculty committee as activities have evidently been neglected during the war years. A Mortar Board committee is unable to locate any representatives of the following organizations, which have letters awaiting any stray members still on campus, according to Eleanor Knoll, Mortar Board president. Letters may be obtained in the Daily Nebraska office.

Included in the group are Sigma Gamma Epsilon, Phi Lambda Upsilon, Childhood Education Club, Iota Sigma Phi, Rho Chi, Omicron Kappa Upsilon, Alpha Zeta, Pegasus, Kappa Epsilon, and Theta Nu.

ently clothing manufacturers have decided that no men reaching six feet two and weighing 140 pounds exist.

Therefore, this unfortunate individual, as he stalks across the UN campus in his weird-looking apparel, should not be laughed at, but pitied. His plight is not his own.

And that's why my only suit is last winter's.
