

Crossfire

By Norm Leger

Just who does Phaedrus (of NUMBER 1, 2 and 3 notoriety) think he's kidding? The "common" students, whom he so condescendingly addresses? Anyone with most casual interest in campus affairs should be able to put two and two together and get the name of the man who so cowardly hides behind the impressive socratic title.

A person, like Phaedrus, who is so talented at making serious accusations on unproven grounds, in name-calling, and in illogical writing really shouldn't remain in the dark realm of anonymity. In fact, if Mr. Phaedrus doesn't withdraw some time today from the Student Council NSA committee, a could-be worthy organization which will soon be abolished unless the sophism of Phaedrus—a member, of course—is eliminated, we will gladly print in Sunday's column, not the name of the columnist, but enough pertinent facts which should leave no doubts in anyone's mind. We will do this because we believe that any student who will resort to the low means of attacking individuals and organizations without making his name known, making implications which can't be proved and purposely striving to defeat an organization by insidious means has no place in an organization set up to study objectively the National Student Association, to function as the NSA would were it ratified, and to decide whether U. N. should not affiliate or whether it should be put up to a student body or Council vote.

Phaedrus, I'm afraid you've had it, and in the end you'll see that you've blackened not only your own name but those of the persons who apparently were co-operative enough to see to it that you had your say in Daily Nebraska print.

3-Year Cream Study Begins At Dairy Here

The University dairy department has started a three year research study of sediment in cream, according to Dr. L. K. Crowe, university dairy research scientist.

Because of the "substantial" loss to Nebraska farmers and creameries, the program was undertaken to discover: how sediment gets into churning cream; methods of detecting it; types of particles which make up sediment; and ways to eliminate it.

A \$9,000 gift from the Sugar Creek Creamery Co., of Danville, Ill., and its subsidiary, the Harding Cream Co., of Omaha, is financing the project. L. P. McCoun, manager of the Omaha firm is actively co-operating in the plan. The funds were made available to the dairy department thru the University of Nebraska Foundation.

Dr. Crowe said that farmers annually lose thousands of dollars because cream containing excessive sediment is rejected by creameries. Processors also lose by purchasing cream which is later found to have excessive sediment. Poor quality churning cream and poorer quality butter and thus, lower returns to the butterfat producer, also occur from the presence of sediment.

Exam Schedule

Laboratory classes for several continuous hours on one or two days shall meet for examination as follows: Classes meeting on Monday and Tuesday shall be examined on the date scheduled for the first hour of their laboratory meeting; Wednesday or Thursday classes on the second hour of their meeting; Friday or Saturday classes on the third hour. Unit examinations have been scheduled for all sections in the following subjects: (1) Business Organization 3, 4, 21, 141; (2) Civil Engineering 1; (3) Economics 11, 12, 115; (4) Education 30, 61, 62; (5) Electrical Engineering 135, 198, 237; (6) English 1, 2, 3, 4, 11, 17; (7) French 11 and 13; (8) Home Economics 41 and 42; (9) Mathematics 11, 14, 16, 17, 41, 42, 105, 106, 107; (10) Mechanical Engineering 1; (11) Psychology 70; (12) Spanish 51 and 53. If students have regularly scheduled examination conflicting with the above specially arranged schedule, arrangements to take such specially scheduled examination at another time should be made with the department concerned on or before January 15. For example: If a student is scheduled for an examination which conflicts with a specially scheduled examination in French, arrangements should be made with the French department to take such French examination at another time.

*Why I'm an
Air Force Pilot*

"I guess it began when I was just a kid, making non-stop flights around the dining-room table. Later on, the town got an airport. I got to know every plane, right down to the smallest bolts and screws.

"During the war I took off with the Aviation Cadets. The folks were all for it. They figured—correctly—that it was the best way to get me into the air where I belonged.

"I made it all right. Trained in the best planes the Air Force has, and now I'm heading for transition work in jets. The pay? Now that I'm a pilot, \$336 a month, plus \$500 for each year of active duty. And there's plenty of room for promotions.

"But that's not the real point. Some men belong in the air. They were born wanting wings—with the action, the pride, the freedom that go with them. There's no better way to have all that, along with the world's finest flying training, than to join the Aviation Cadets. And the future—in civilian aviation or in the Air Force—is as wide open as the horizon. If you want the fast-moving life, why not drop around to the Recruiting Station in your community or the nearest Air Force installation."
