S. to "immediately take the initiative in calling a general conference of the United Nations pursuant to Article 109 for the purpose of making the United Nations capable of enforcing world law to prevent war."

#### Peace Preservation

Kermit Rohde, UWF president, stated that the resolutions have been introduced by bi-partisan committees for the purpose of securing an international organ to preserve peace.

The meeting, according to Purcell, is open to interested students and members of the university faculty as well to the people of Lincoln.

### Stassen Group To Hold First Meet Tonight

A meeting to launch the university Stassen-for-president club will be held in the Union at 7:30 p. m., Thursday.

The organization's constitution will be submitted for approval of those present. Election of officers is planned. A faculty sponsor has been contacted, Luedtke said, and will be presented for endorsement by the group.

The leaders of the proposed group have pledged themselves to the policies of the republican party, and have pledged not to hamper the work of other groups in the party.

The club limits itself to promoting the candidacy of Harold E. Stassen for president.

Luedtke also stated that the only way independent voters can insure that the candidate of their preference will be on the ballot is to register now. The final day for registering for voting in the primary election April 13 is April 2.

Refreshments will be served following the meeting.

### NSA Poll Set For Tuesday By Council

The student poll on the National Student Association question has been changed to next Tuesday, March 16. The Student Council came to this decision after several alternate proposals had been voted down during their Wednesday meeting.

The voting will take place in both Ag and City Unions, from 9 a. m. to 6 p. m.

The result of the poll will not be the final disposition of the case. As a council motion of two weeks ago read, if the poll in class Friday morning could not be arranged through the faculty, a regular student election would be held to serve as a guide to the Council's final decision.

The Council took this action because of a fear voiced by a few of the members that not enough students would vote unless the poll were taken in a class period, where it was felt a much larger proportion of the student body would vote.

Because of the nature of the proposed vote, a motion was presented and passed to have the phrase, "Don't Know" stricken from the ballot. Thus, voters will have to vote either "Yes" or "No" on the question of whether or not NSA will be OK'd on the campus.

Dr. Anderson was asked if he thought it desirable to reduce federal expenditures. He answered by saying that it was not possible to reduce federal expenditures because modern times do not allow a smaller budget.

### University Hall History Claims Close Escapes

Squeak, squeak, squeak! If the wooden floors of University Halls could speak a different language they would tell the many narrow escapes and interesting histories of the old building.

One thousand people listened to a large brass band, ate a banquet and danced at the cornerstone laying ceremonies on September 23, 1869.

The building, which was the original and only university building, cost \$128,480, which was \$28,480 more than the original estimate and only after great controversy was it decided that it be built.

Completed in 1871, it was inspected and pronounced unsafe for use.

The building narrowly escaped destruction when an argument followed over whether or not it should be torn down. It was examined, finally repaired and classes commenced.

The next narrow escape came in 1873 when rumors of its insecurity prompted the decision that it be torn down and rebuilt for about \$60,000. Lincoln residents opposed the decision and summoned more architects to investigate, but the building was left standing.
