

## 'Promising Future' Label Placed on Oil Seed Crop

University chemistry department has pasted a "promising future" label on sesame, an oil seed crop, for Nebraska agriculture.

Dr. E. V. Staker, chemistry department agronomist, described three major results of a five year breeding program to adapt this highly drought resistant crop to Nebraska's soil and climate. They were:

(1) Eight varieties have been developed which produced an average of 869 pounds of seed per acre in 1947. One variety yielded 1022 pounds. The average yield dustry depends on foreign imports for most of its sesame oil at present.

for the group is well above the U. S. average.

### Yield Above Average.

(2) Seeds of several Nebraska

varieties averaged more than 50 per cent oil content, also above the national average.

(3) The Nebraska varieties test high enough in protein content to make sesame meal equal to cottonseed as a livestock feeding supplement.

Chief problem in the breeding program, Dr. Staker said, is development of a sesame variety with non-shattering pods. This may be achieved "within a few years," he said. It will permit harvesting sesame with combines. Sesame must now be cut with binders. The crop matures in a shock and then is combined for the seed.

### Brings 12-13 Cents.

Sesame is a row crop which currently brings a price of 12 to 13 cents a pound. The chemistry department has seed available for only experimental work in 1948. Sesame is not grown commercially in Nebraska at present.

The oil seed crop is used for flavoring baked goods and confections, for salad and cooking oils, for use in making lard substitutes, and as a "carrier" for penicillin and other medicinal products. The stalk of the plant can be made into paper.

## Stassen Policy On U.S. Issues Held 'Positive'

Stassen is no Mr. In-Between.

So declared Bernhard W. LeVander, state chairman of the Republican central committee and campaign manager of Harold Stassen, as he spoke before the Stassen-for-President Club at the Y.M.C.A. building Tuesday night. Discussing the program and possibilities of the Republican party and Harold Stassen in 1948, Mr. LeVander epitomized his remarks with the words of a popular song "Accentuate the positive, eliminate the negative, latch on to the affirmative, don't mess with Mr. In-Between."

In other words, the youthful campaign manager explained, the Republican party must present a positive program, eliminate their negative approach to crucial problems, bring about a definite affirmative program, and avoid the wishy-washy politics of the Mr. In-Between.

### Stassen Qualified.

The speaker discussed the qualifications of Stassen which would enable him to carry through successfully such a Republican program. He declared, "Stassen has always stood for a clearly defined program."

"Stassen's work in Minnesota," he explained further, "proves that this presidential candidate is a man of action." He pointed out that Stassen has always stood for "constructive opposition."

### Possibilities In 1948.

In discussing Stassen's possibilities for 1948, the state republican leader said, "Stassen has a demonstrated strength with the people. But this strength must be translated into party action by individual supporters."

## Final Tryouts In Uni Theatre Set For Today

Feature of "Taming of the Shrew" is a witty plot combined with a clever character analogy. The story concerns a troubled father who has two daughters, one sweet, the other carefree and wild.

Complications that arise from the father's wily attempts to marry off the wild daughter and the unlucky husband's desperate endeavors to "tame the shrew" of a girl, carry the play through to a rousing finish.

## Notice to Veterans

No books or supplies for the current semester will be issued to veterans at government expense after Saturday, April 10. Because of the time involved in gathering together all charges from the several stores for such books and supplies, which in turn causes a delay in billing the Veterans Administration and in being reimbursed therefor, the University has found it necessary to establish this deadline.

Books which are on order and which, therefore, may not be available at the bookstores until after April 10th, may be obtained after that date provided the veterans who are authorized to obtain such books report to the store before April 10 and sign a charge ticket in advance. The store may then issue a due bill or make some such record so that the veteran may obtain his book after April 10, the expiration date.

Veterans who will graduate at the end of the present semester should retain their Purchase Authorizations after April 10 for the purpose of renting caps and gowns for commencement exercises.

Veterans in the Graduate College who will receive their degrees at the close of the present semester and who find it necessary to obtain research or thesis supplies after April 10, 1948, should pay for the same and take cash receipts. These receipts, together with their claim for thesis typing, should be filed in the office of the Veterans Consultation Board on or before June 5, 1948. Veterans in the Graduate College who will not receive their degrees at the close of the present semester must obtain necessary supplies on or before April 10, as indicated above.
