

14 Delegates To Attend YW Estes Meeting

Fourteen representatives of Y.W.C.A. will attend the Estes Park Y.W.-Y.M. Intercollegiate Christian Conference, June 10-19.

Girls attending are Willistine Clark, Analine Kano, Pat Larson, Camilla Palmer, Audrey Rosenbaum, Kathleen Schreiber, Marcia Tepperman, Wanda Young, Janet Nutzman, Mildred Nutzman, Norma Long, Muriel Nelson, Lois Thorfinnson, and Lavernna Acker.

The conference includes a program of group discussions, leadership training, vesper services, and recreational facilities. Groups from the entire midwest will attend.

A chartered bus will carry Nebraska, Nebraska Wesleyan, and

Mexican Journey Offered to Students

An extensive 18 day sightseeing tour of Mexico is being offered by the Educational Tours for this summer.

Price for the trip is \$249.50 which includes round trip transportation, A-1 hotel accommodations, all meals on trip, all paid fees, all baggage transfers, experienced guides, and your own Mexican tourist card.

The tour leaves St. Louis June 29. Students interested should contact Mrs. M. G. Volz, Lincoln Representative at 1651 Otoe, 4-6898.

Kearney college representatives to Estes Park. Only a limited number of spaces are available and Y.W. members who wish to attend must leave their names with Eileen Hepperly, reservations chairman, immediately.

Nebraskan Will Head Research On Atomic Use

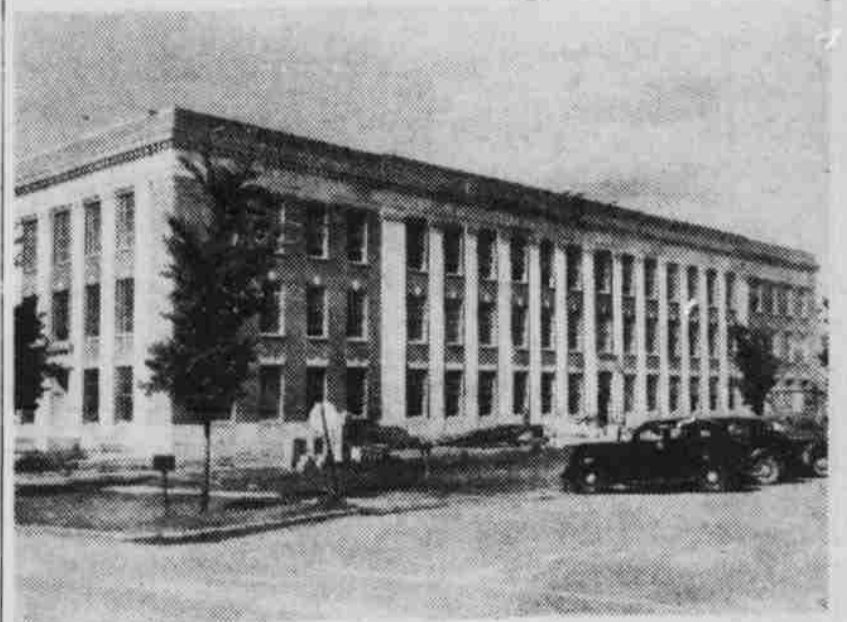

Dr. James H. Jensen, native Nebraskan and former university staff member, was appointed to head the U. S. Atomic Energy commission's research in the use of atomic energy in biology and agriculture.

Dr. Jensen will be concerned with encouraging public and private agencies to develop atomic energy use in the effects of atomic radiation upon plants and animals.

A native of Madison, Neb., Dr. Jensen attended the university where he received his bachelors degree in 1928 and his masters degree in 1930. He obtained his doctor of philosophy in plant physiology at the University of Wisconsin in 1935.

Following research work in Cuba, Puerto Rico and various research stations in the U. S., Dr. Jensen joined the University staff as a plant physiologist in 1937. While at Nebraska he was particularly concerned with breeding experiments designed to increase the disease resistance of beans and potatoes. In January, 1945 he resigned his Nebraska post to take a similar one at North Carolina State College.

New Class Building . . .

Burnett Hall Costs Estimated At Approximately \$512,000

"The little red schoolhouse stands by the road
A ragged beggar sunning . . ."
The days of that little red schoolhouse are over.

Students at the University of Nebraska can verify this fact by looking at the newest, not yet completed building on the campus—Burnett Hall, pictured above. According to J. S. Blackman, director of buildings and grounds, the hall cost approximately \$512,000, slightly more than a little schoolhouse.

Started in 1946.
The building, a sister of Andrews Hall, was started one and a half years ago in June 1946. The date of completion is not yet known.
Classes to be held in the new

building will be Philosophy, History, Math, Modern Languages, graduate social work, anthropology, with the school of journalism occupying the top floor and the Journalism photography lab in part of the basement.

No "Squeak"
Burnett Hall will not have the annoying "speak squeak" characteristic of the floors old University Hall which will be torn down in the near future. The floors will be concrete with a finishing of asphalt tile.

The steel-framed hall will hold thirty classrooms, one lecture room holding 200 people, sixty-five offices and 12 laboratories.

The building is 238 feet across the front and 67 feet deep from North to South. It is 883,700 cubic feet.

Burnett hall was named in honor of a previous chancellor of the university.

Bill Reuter Heads Summer YMCA

Bill Reuter, YM cabinet member and vice-president for next fall, will take over the duties of summer cabinet chairmanship.

The cabinet is planning an effective program for the students attending summer school. The Y facilities will be open for use as usual and programs, foreign movies will be announced later.

UNESCO . . .

(Continued from Page 1.)
training course for representatives of 54 UN member nations.

"The United Nations," Dr. Olav Pass-Grunt, UN Educational Officer, said recently, "is particularly interested in stimulating the program planned by the University of Nebraska. Nebraska is the only state outside of the United Nations Headquarters area that is considering an educational program of this scope. Only through this type of cooperation can the United Nations be properly understood in all the nations of the world."

In addition the UN has agreed to send its famed "UN Display," featuring pictorial information about UN and all the member nations to the University where it will be housed during the summer session in Love Memorial Library. The display heretofore has been shown only in a few eastern seaboard cities.

Dr. Sorenson and other educators are now preparing a 10 point program to implement this work.

"We want to make Nebraska citizens the best informed people in the world about the ways of the United Nations," Wayne O. Reed, State Superintendent says.

About the program, G. W. Stewart, Jr., chief of the Information Division of the American Mission to UN says: "The program for education about the United Nations will be a sort of pilot project for the U. S. and the world as well. We hope to encourage other institutions to do as you are doing. The Nebraska undertaking is the most enterprising of its kind. We all hope it succeeds."

RANCH PAY-OFF
Alan Ladd, starred in Paramount's "Saigon," has turned his Hidden Valley ranch into a successful business proposition by breeding racehorses for sale.
