Original Research Wins Increasing Acceptance

Original work by Drs. M. Grodinsky and E. A. Holyoke of the university Anatomy department on the fascial spaces of the foot, neck and hand regions is finding increasing acceptance in anatomical circles as evidenced by expansion of the references to their work in the latest editions of Gray's Anatomy and Morris' Anatomy. In both

of the new editions, description of the fascial planes and attachments in these regions leans heavily upon the published works of Drs. Grodinsky and Holyoke.

This work is of prime importance clinically in the analysis, treatment and prognosis of infections in these regions since suppurative processes are confined by, and travel along, fascial

These investigations, first begun in 1930 and carried thru until 1941, were rather slow to find wide-spread acceptance since the concepts postulated represented a marked departure from the older literature. However, due to thoroughness and accuracy of the work of Dr. Grodinsky and Holyoke and the highly lucid drawing by Miss Rose Reynolds, these concepts seem now to be prevailing over the usual conservatism in this field.

This program is not restricted Ag. Editor's Note

The Medical College News now completing its first month of existence may safely report that it has been received with impressive apathy.

The editors, for some reason or other, do not find themselves hunted down by persons bearing scoops, features, articles, or sundries which might be of general interest. No one stuffs our pigeon hole; it is bare.
Such response, while thus far
handled with magnificent
equanimity by your high
strung editors, is beginning to
jangle our editorial nerves. We
are drinking more coffee these days, seeing less movies, cutting down on our salt intake,

So let us once again remind you: This is your newspaper, published for your benefit to publicize your doings. A newsworthy item, personal or general, a feature, a scoop, handed to Editors Jim Harkin or Isaac Levine, or just stuffed in our pigeon hole, will find ready and appreciative audience among your friends, family or selves.
