THE DAILY NEBRASKAN

Ag Craft Shop To Open Today

The Ag Craft shop will open Tuesday in Room 2 of the Ag Union. The workshop will be open Tuesday and Thursday from

1 to 5 p. m.

Merle Heckenlively will be the instructor for the first project which will be leatherwork. He will be at the shop on Tuesdays to help students make leather goods such as billfolds, belts and the like.

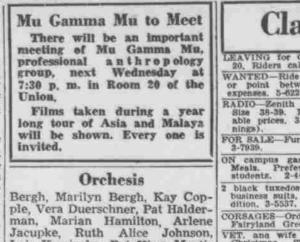

The Craft shop is being spon-sored by the Union Hobbies com-mittee, Members are Phyllis Giesman, Joan Maine and Clarence Beam, Neil Miller is committee sponsor.

Marriage Course Scheduled at Ag

Marriage and home relationships, home economics course 191, will be offered to both men and women students on Ag campus second semester.

The course, which has no prerequisites except sophomore standing, will be taught by Kenneth Cannon, who joined the home economics staff in September after teaching similar courses at Iowa State college. The course deals with factors contributing to successful marriage. The class will meet in the Food and Nutrition building Tuesday and Thursday at 8:20.

Tuesday, December 7, 1948

Foundation Will Launch New Projects Committee

"New" is a word used often in commemorates the 80th anniver-tudent Foundation circles these sary of the University and sells Student Foundation circles these days. Genene Mitchell, president for \$1. The Calendars are on sale of the service organization, has in all organized houses, in camoutlined a number of "new proj-ects for the large student group. pus bookstores, at Miller & Paine's and in special booths around the campus.

New Projects Group

A recently organized phase of the organization has been named the New Projects committee. The group headed by Eugene Berg, will investigate all posible proj-ects suggested to the Foundation. The committee, made of about fifteen selected workers, will attempt to plan prorams which will expand the organization's purpose of publicizing and selling the University.

The New Projects group has al-ready selected certain ideas to consider. Committee members are now working on projects within the scope of the Student Foundation activity.

New Bulletin.

student service group. With a new name, the Student Founda-"New" also is this year's vertion will complete its cycle of sion of the Bulletin, published newness. annually by the Foundation Publications group, Titled "First Glance," replacing last year's "The Language Club NU Look, the booklet is nearing completion. Editor of the book is Nancy Porter, assisted by Dick Kuska. Leon Pfeiffer is business manager of the Bulletin, which is sent to high schools throughout the state.

"First Glance" will be a 28-page booklet, including information on all campus organizations, church groups, Ag campus, social clubs, and honoraries, besides a general picture of the University "at work" and "at play." The Bulletin will be printed by the middle of January. It will sport a colored cover.

A special feature of "First Glance" will be "NU Looks to the Future," a story on the campus building and beautification programs. It will also include pages on the Red Cross College Unit, cheerleaders, and special messages from the Chancellor and Dean Borgmann.

New Directory A "new" version of the annual Student-Faculty Directory will be on sale in "about a week," ac-cording to Miss Mitchell. For 50c the book includes information on all regularly enrolled students and faculty members. The Directory, which had a blue cover last year, will sport red and white this year, Calendar

Offered for the first time on the campus, the Nebraska Calendar has proved to be a popular Foun-dation "new" project. The 30-page date book and memorandum

SEVENTEEN COSMETICS on sale at

GOLD & CO.

THE Bell Telephone Laboratories is known as a leader in communications engineering. On its staff are 1,622 engineers and scientists with college degrees. Among them they have 7,200 years of college training . . . and they are still learning.

They study many things. How to speed your voice across the street or around the world. How to keep your voice natural in tone and volume. How to make central office equipment capable of switching your call even faster. How to produce in laboratories the materials which are hard to get in their natural form quartz, ior instance. How to conserve the scarce metals which go into wire and cable, by making one circuit carry many conversations.

From such studies they learn how to make your service better and better, and keep its cost low.
